AlHamy Legacy

- In 1954, Al Hamy Metal Factory was Established by the visionary Mr. Mohammad Riad Daouk who had extreme interest and knowledge in metal, metal work and metal casting. Upon his arrival to Kuwait city, Mr. Daouk opened a workshop where he started doing metal work and metal casting including gold, silver, aluminum.
- Few years later he saw and realized the upcoming change in the market demand due the petrol boom At that time palaces and villas.
- It was not until 1971, after the United Arab Emirates unification that AlHamy decided to establish a factory in the UAE. Their move came after a planned and thorough study where they saw a good opportunity for the new born country with a virgin infrastructure. Once again the decision was correct and the small factory became bigger attending 1000 employees. Today and after the death of Mr. Mohammad, his sons took control of the company following the path placed earlier by their father.

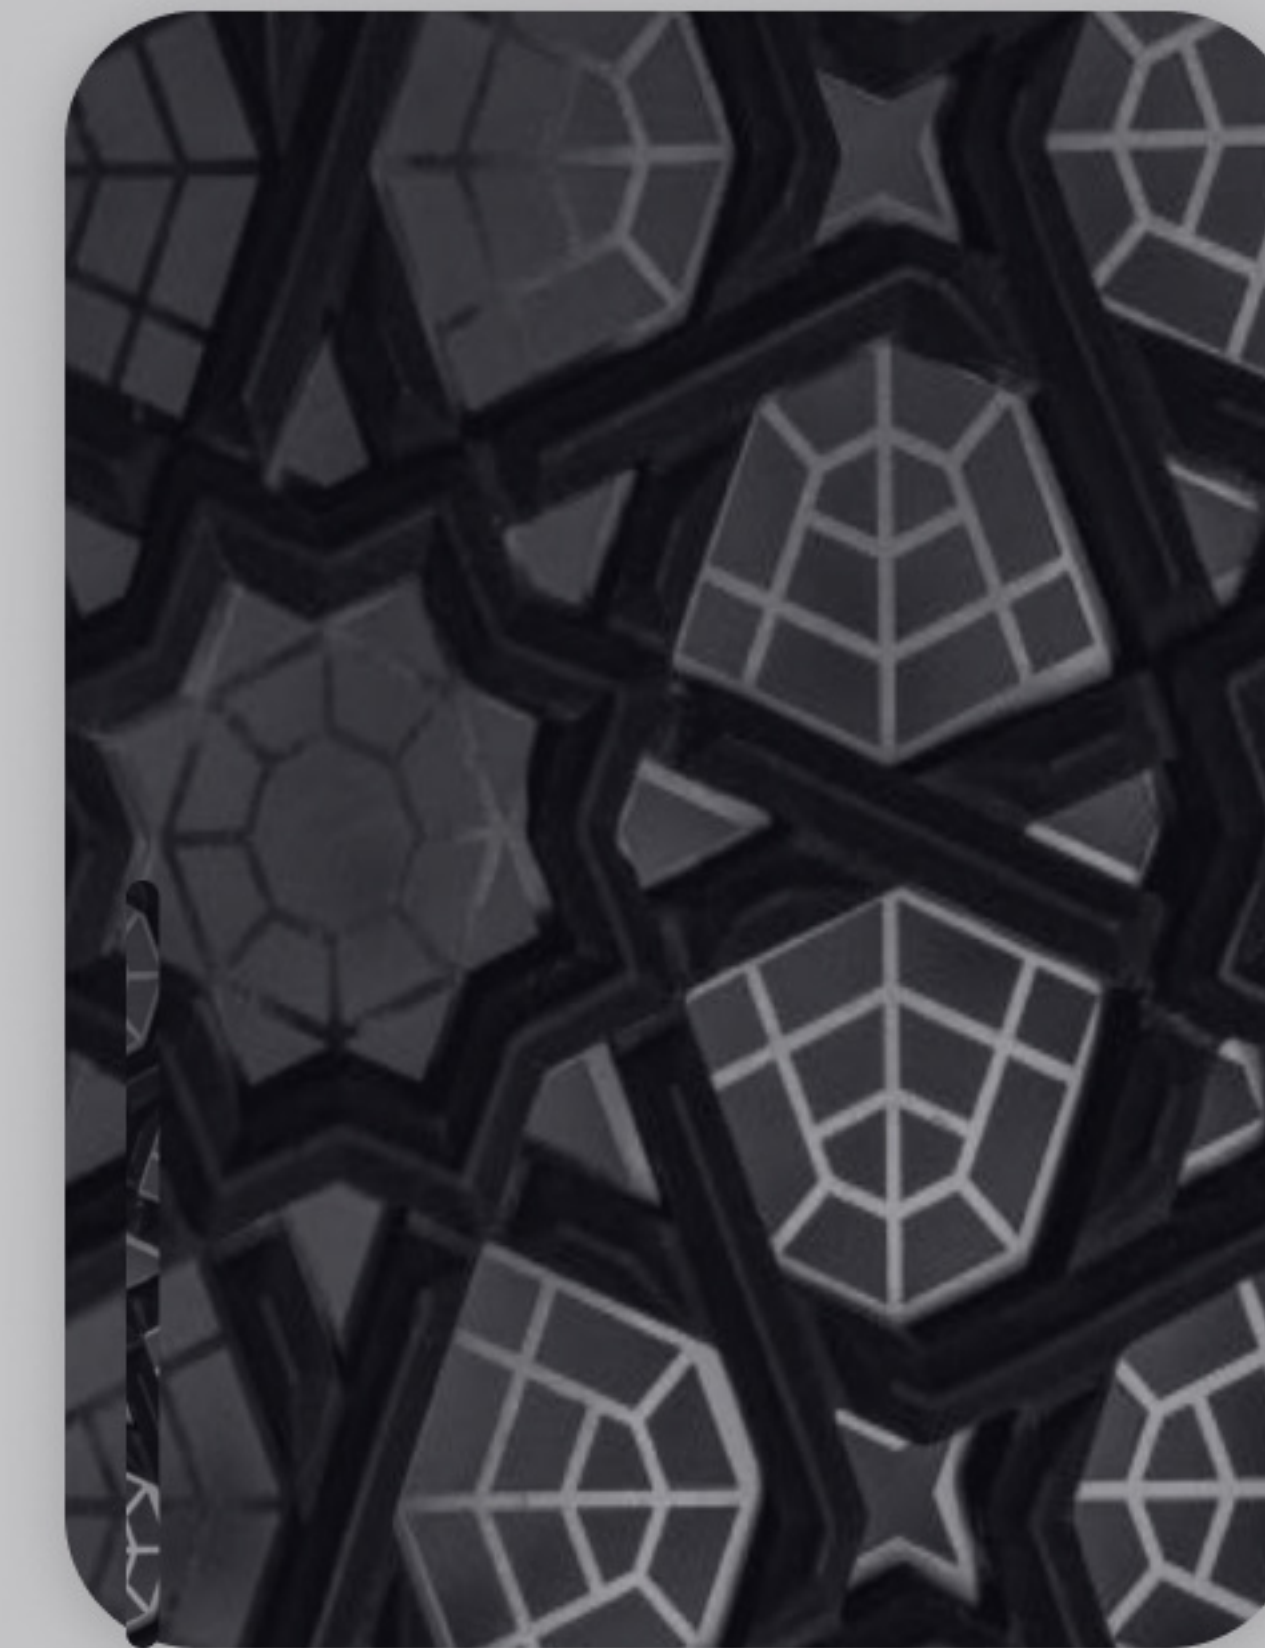

Our Mission

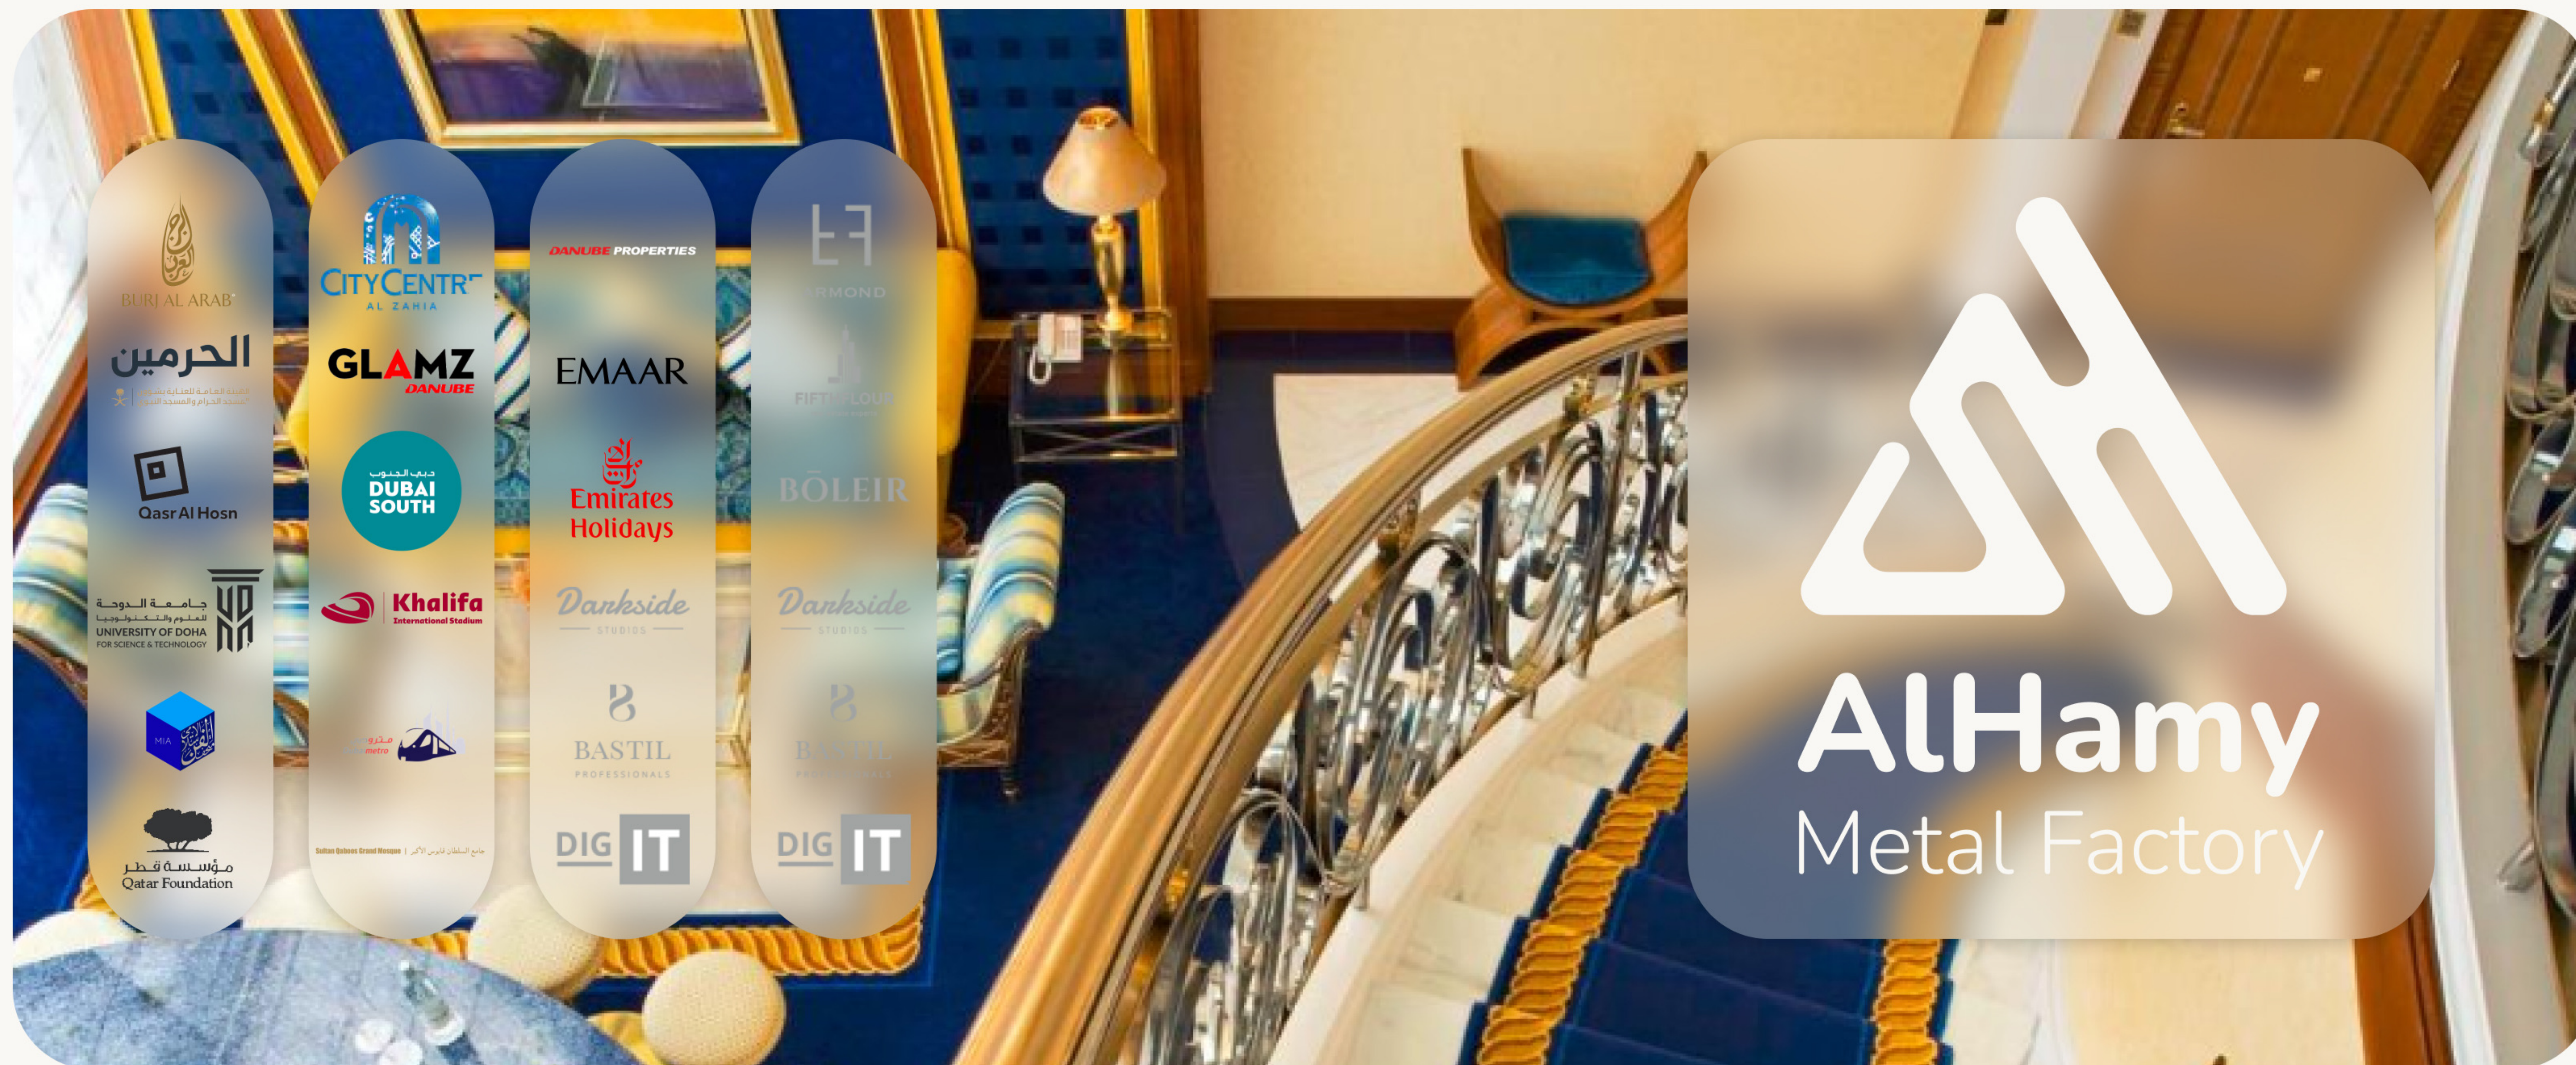

- To maintain safe and environmentally friendly practices in our operations
- To provide the construction and industrial sectors with high-quality metal works (steel, aluminum, brass, copper etc).

Our Products

Metals, Stainless Steel, Mild Steel, GI Steel, Aluminum, Brass, Bronze, Titanium, Zinc, Lead, etc.

- **Processes**| Casting (All Types of Casting), Laser Cutting, Laser Welding, Robot Welding, Water Jet Cutting, Shearing, Bending, Perforation, Reshaping, Fabrication, Polishing, Drilling, Milling, Turning, Etching, Bead blasting, and more.
- **Products**| Decorative Screens, High-Security Bollards Tested and Certified, Grills, Facades, Cladding (Straight, Columns), Ornaments, Handrails, Balustrades (Glass, Screens), Gates, Main Gates, Decorative Metal Doors, Corbels, Space Frame, Pergola, Fences, Skirting, Trims, Domes, Crescent, Threshold, Posts, Bollards, Structural Bridges, Ladders, Steel Structures, Catwalks, Tables and Furniture, Raised Roofs, Raised Floor, and more.
- **Finishes**| Gold Plating, Black Nickel, Chrome, Patina, Antique Brass and Bronze, Painting, Powder, Coating, PVDF, Mirror, Hairline, Mat, Bead Blast, Hammer tone, and more.

Our Projects

Construction Work

Al Haram Makkah مكة - المسجد الحرام

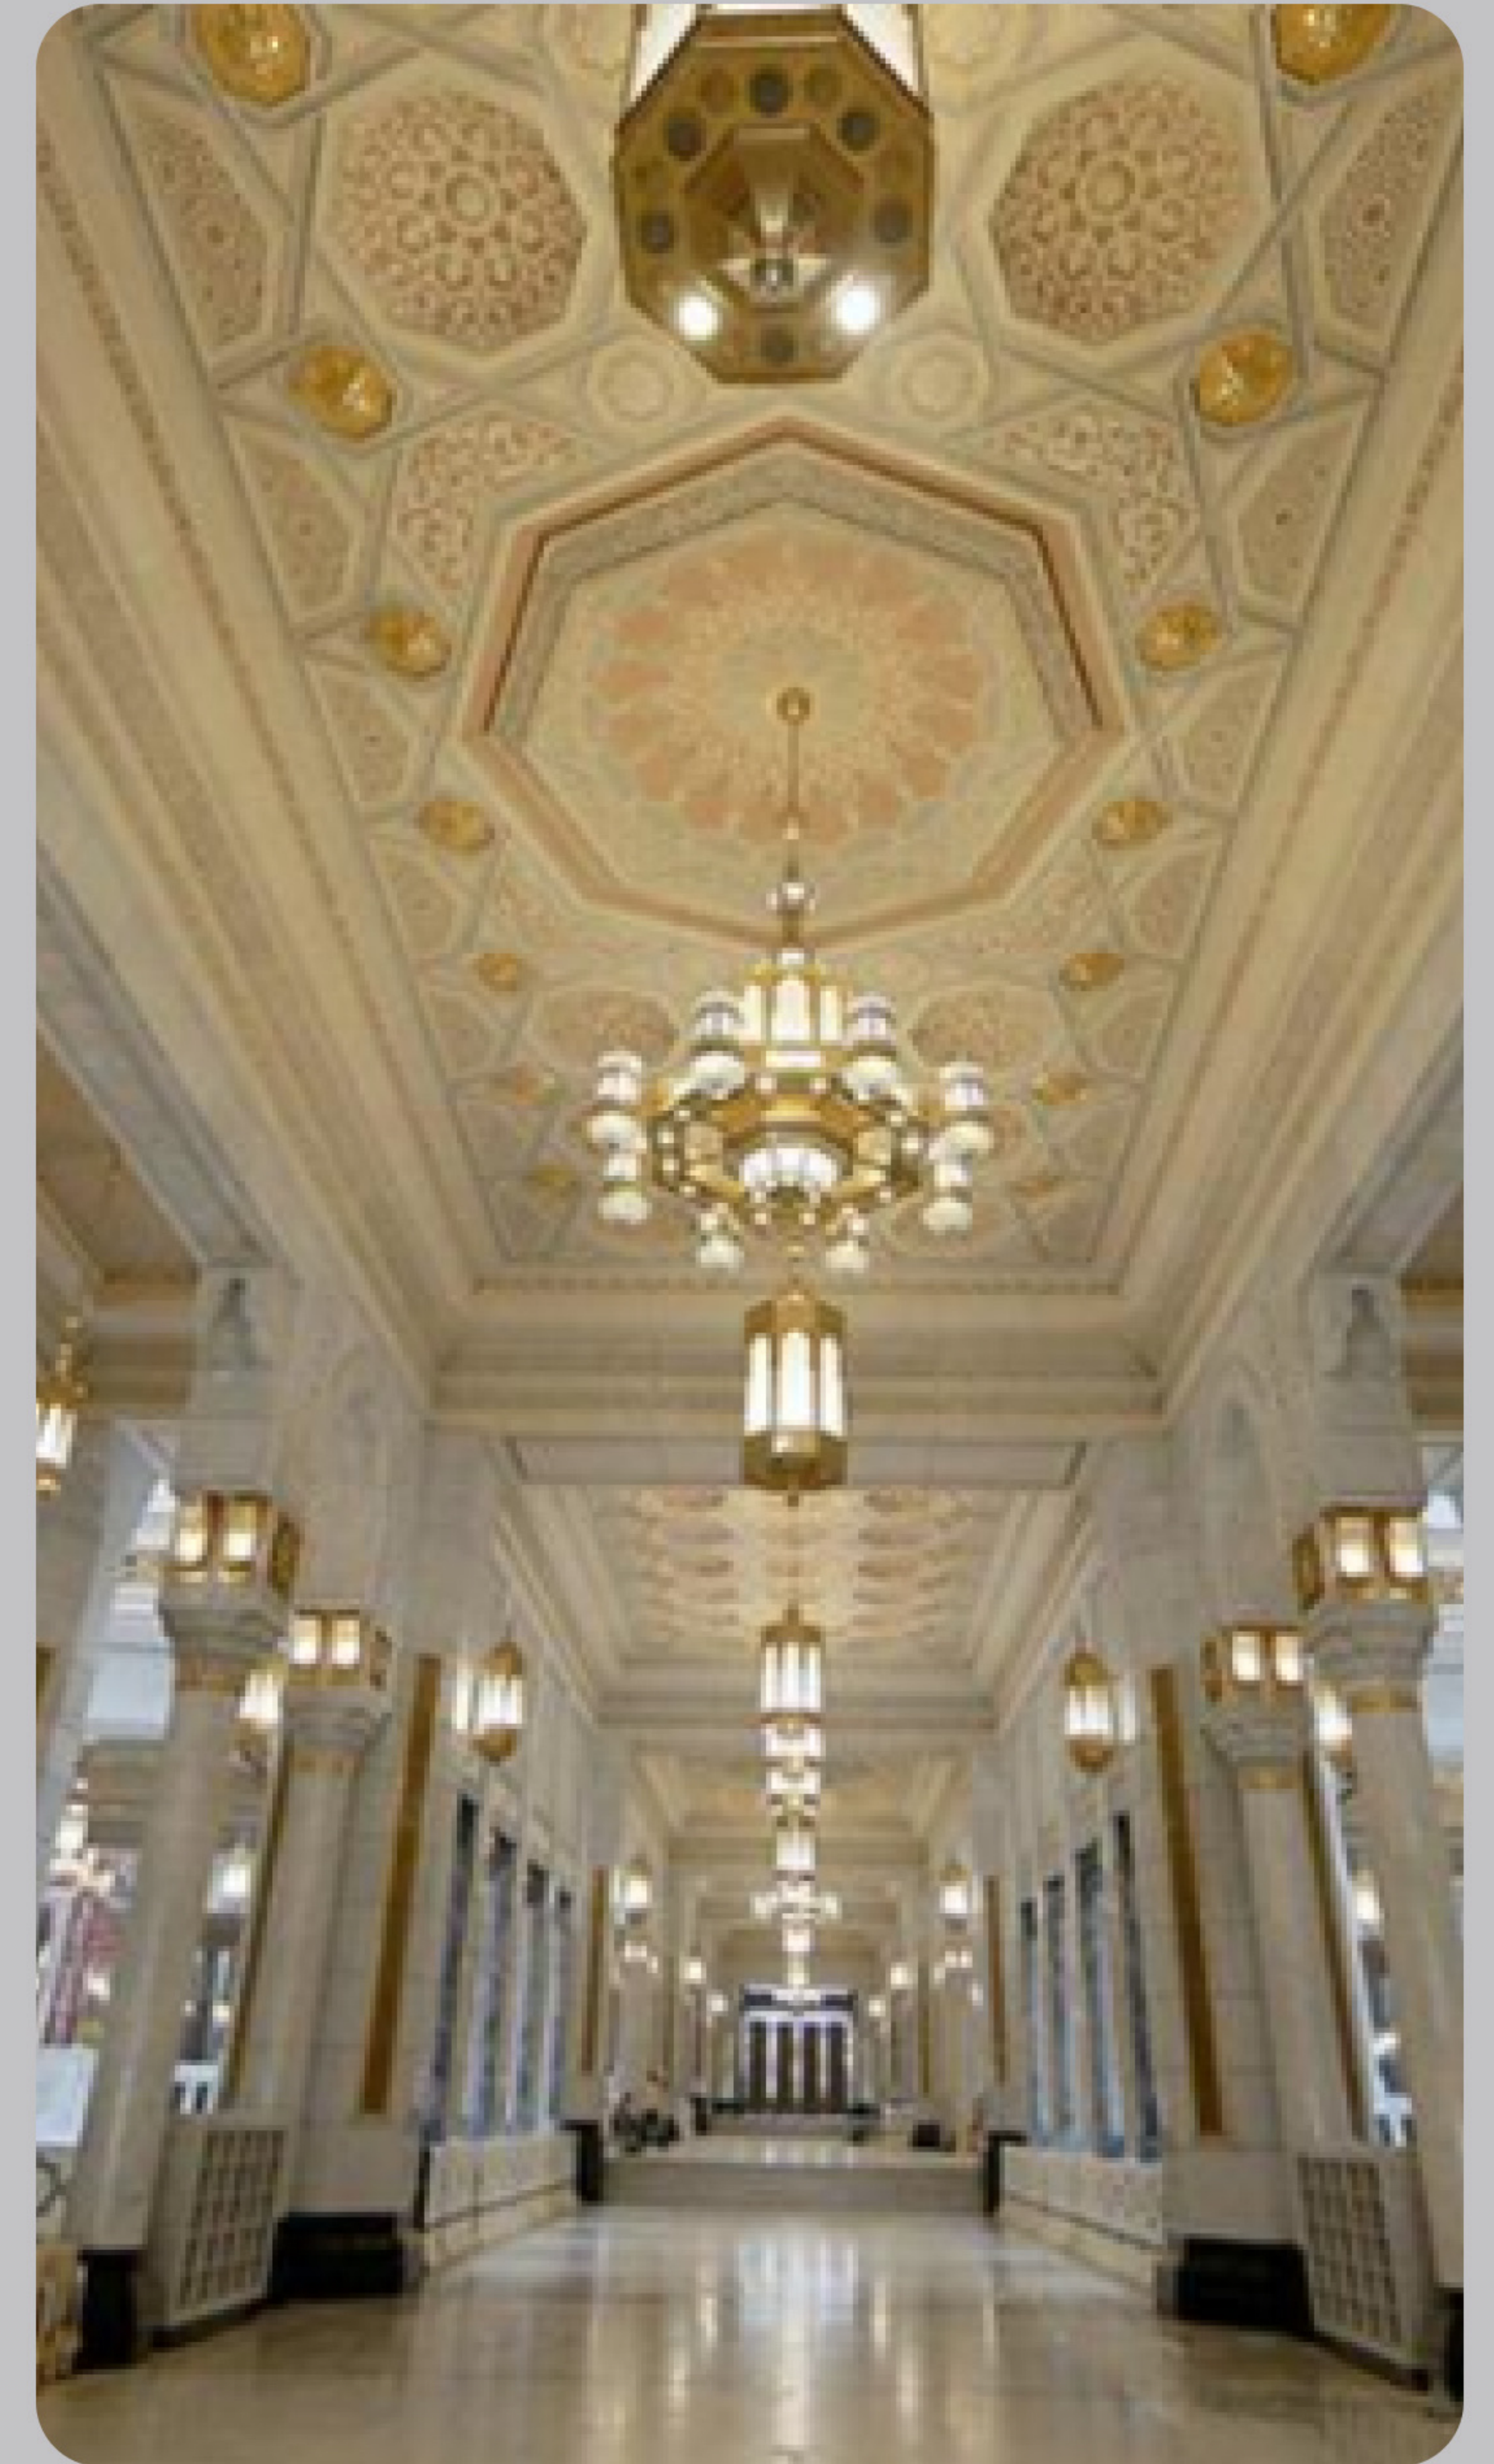

For more than 12 years now we have shared our experience in fabrication and casting most of AlHaram copper decorative items with gold plated affects.

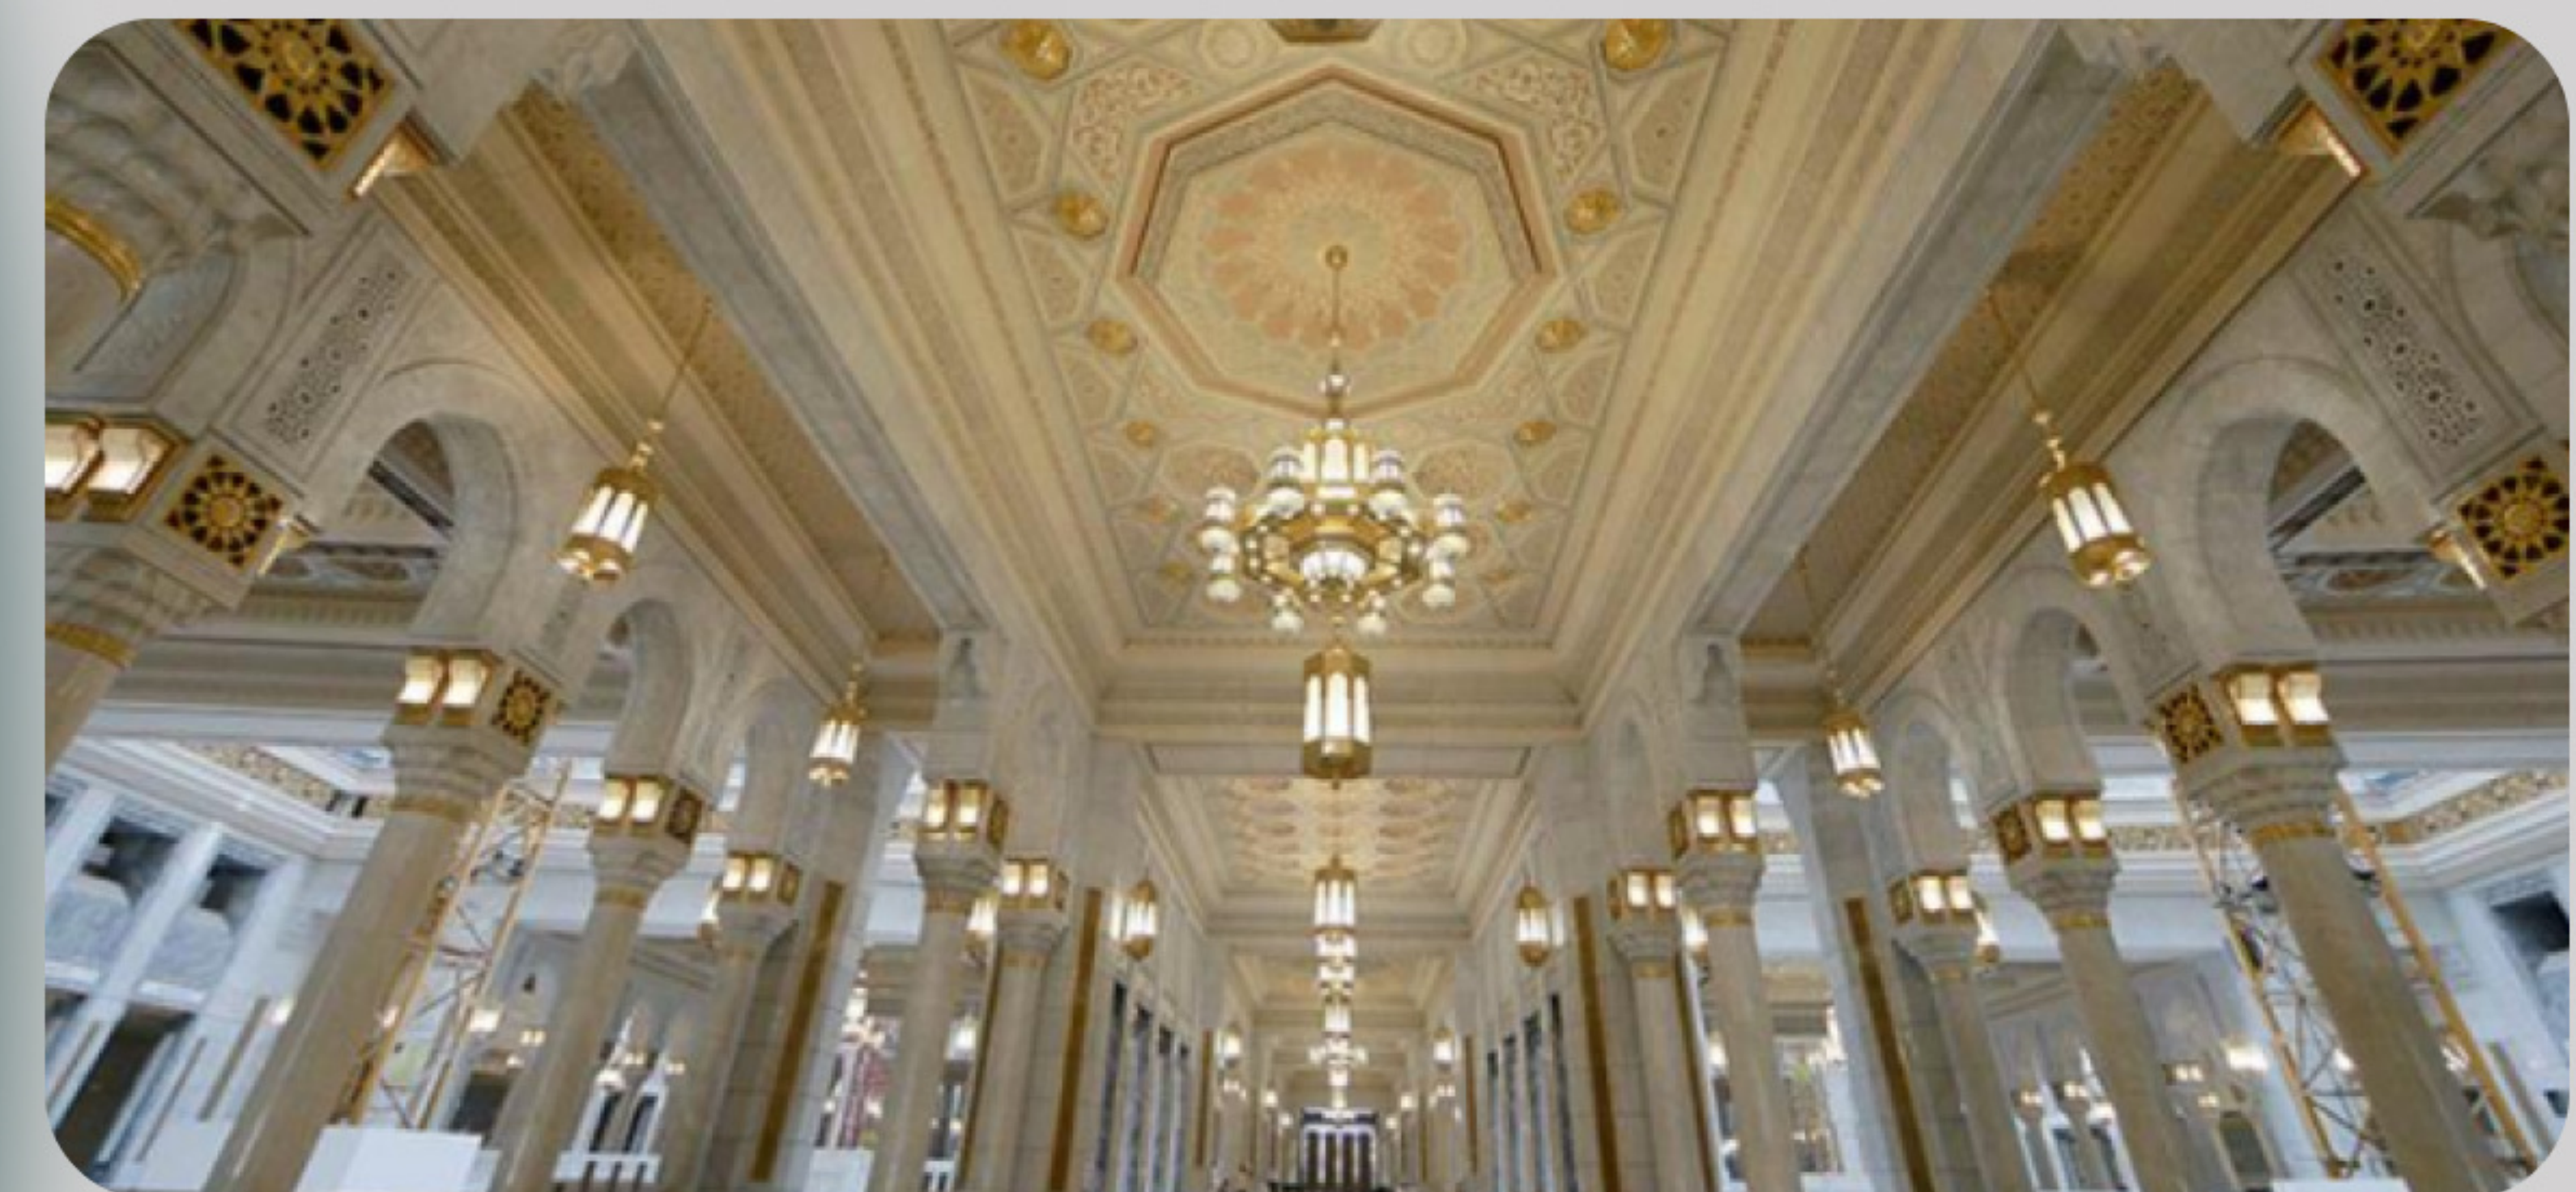

AlHaram third expansion project, we have done the following:

- Bronze Casting Panels.
- Gold Plated Decorative AC Grill.
- Gold Plated Decorative, Demountable Octagonal.
- Gold Plated Metal Screen with Air Return
- Gold Plated Air Diffuser Panel: AlHamy had introduced new design to the air diffusers with stainless-steel spider mesh.
- Gold Plated Columns Lighting.
- Gold Plated Brass Ring for Columns.

Ongoing Project:

- Gold Plated Screens for Minaret.
- 12m Casted Aluminum and Glazing Screens.
- Stainless-Steel Waste Pin.

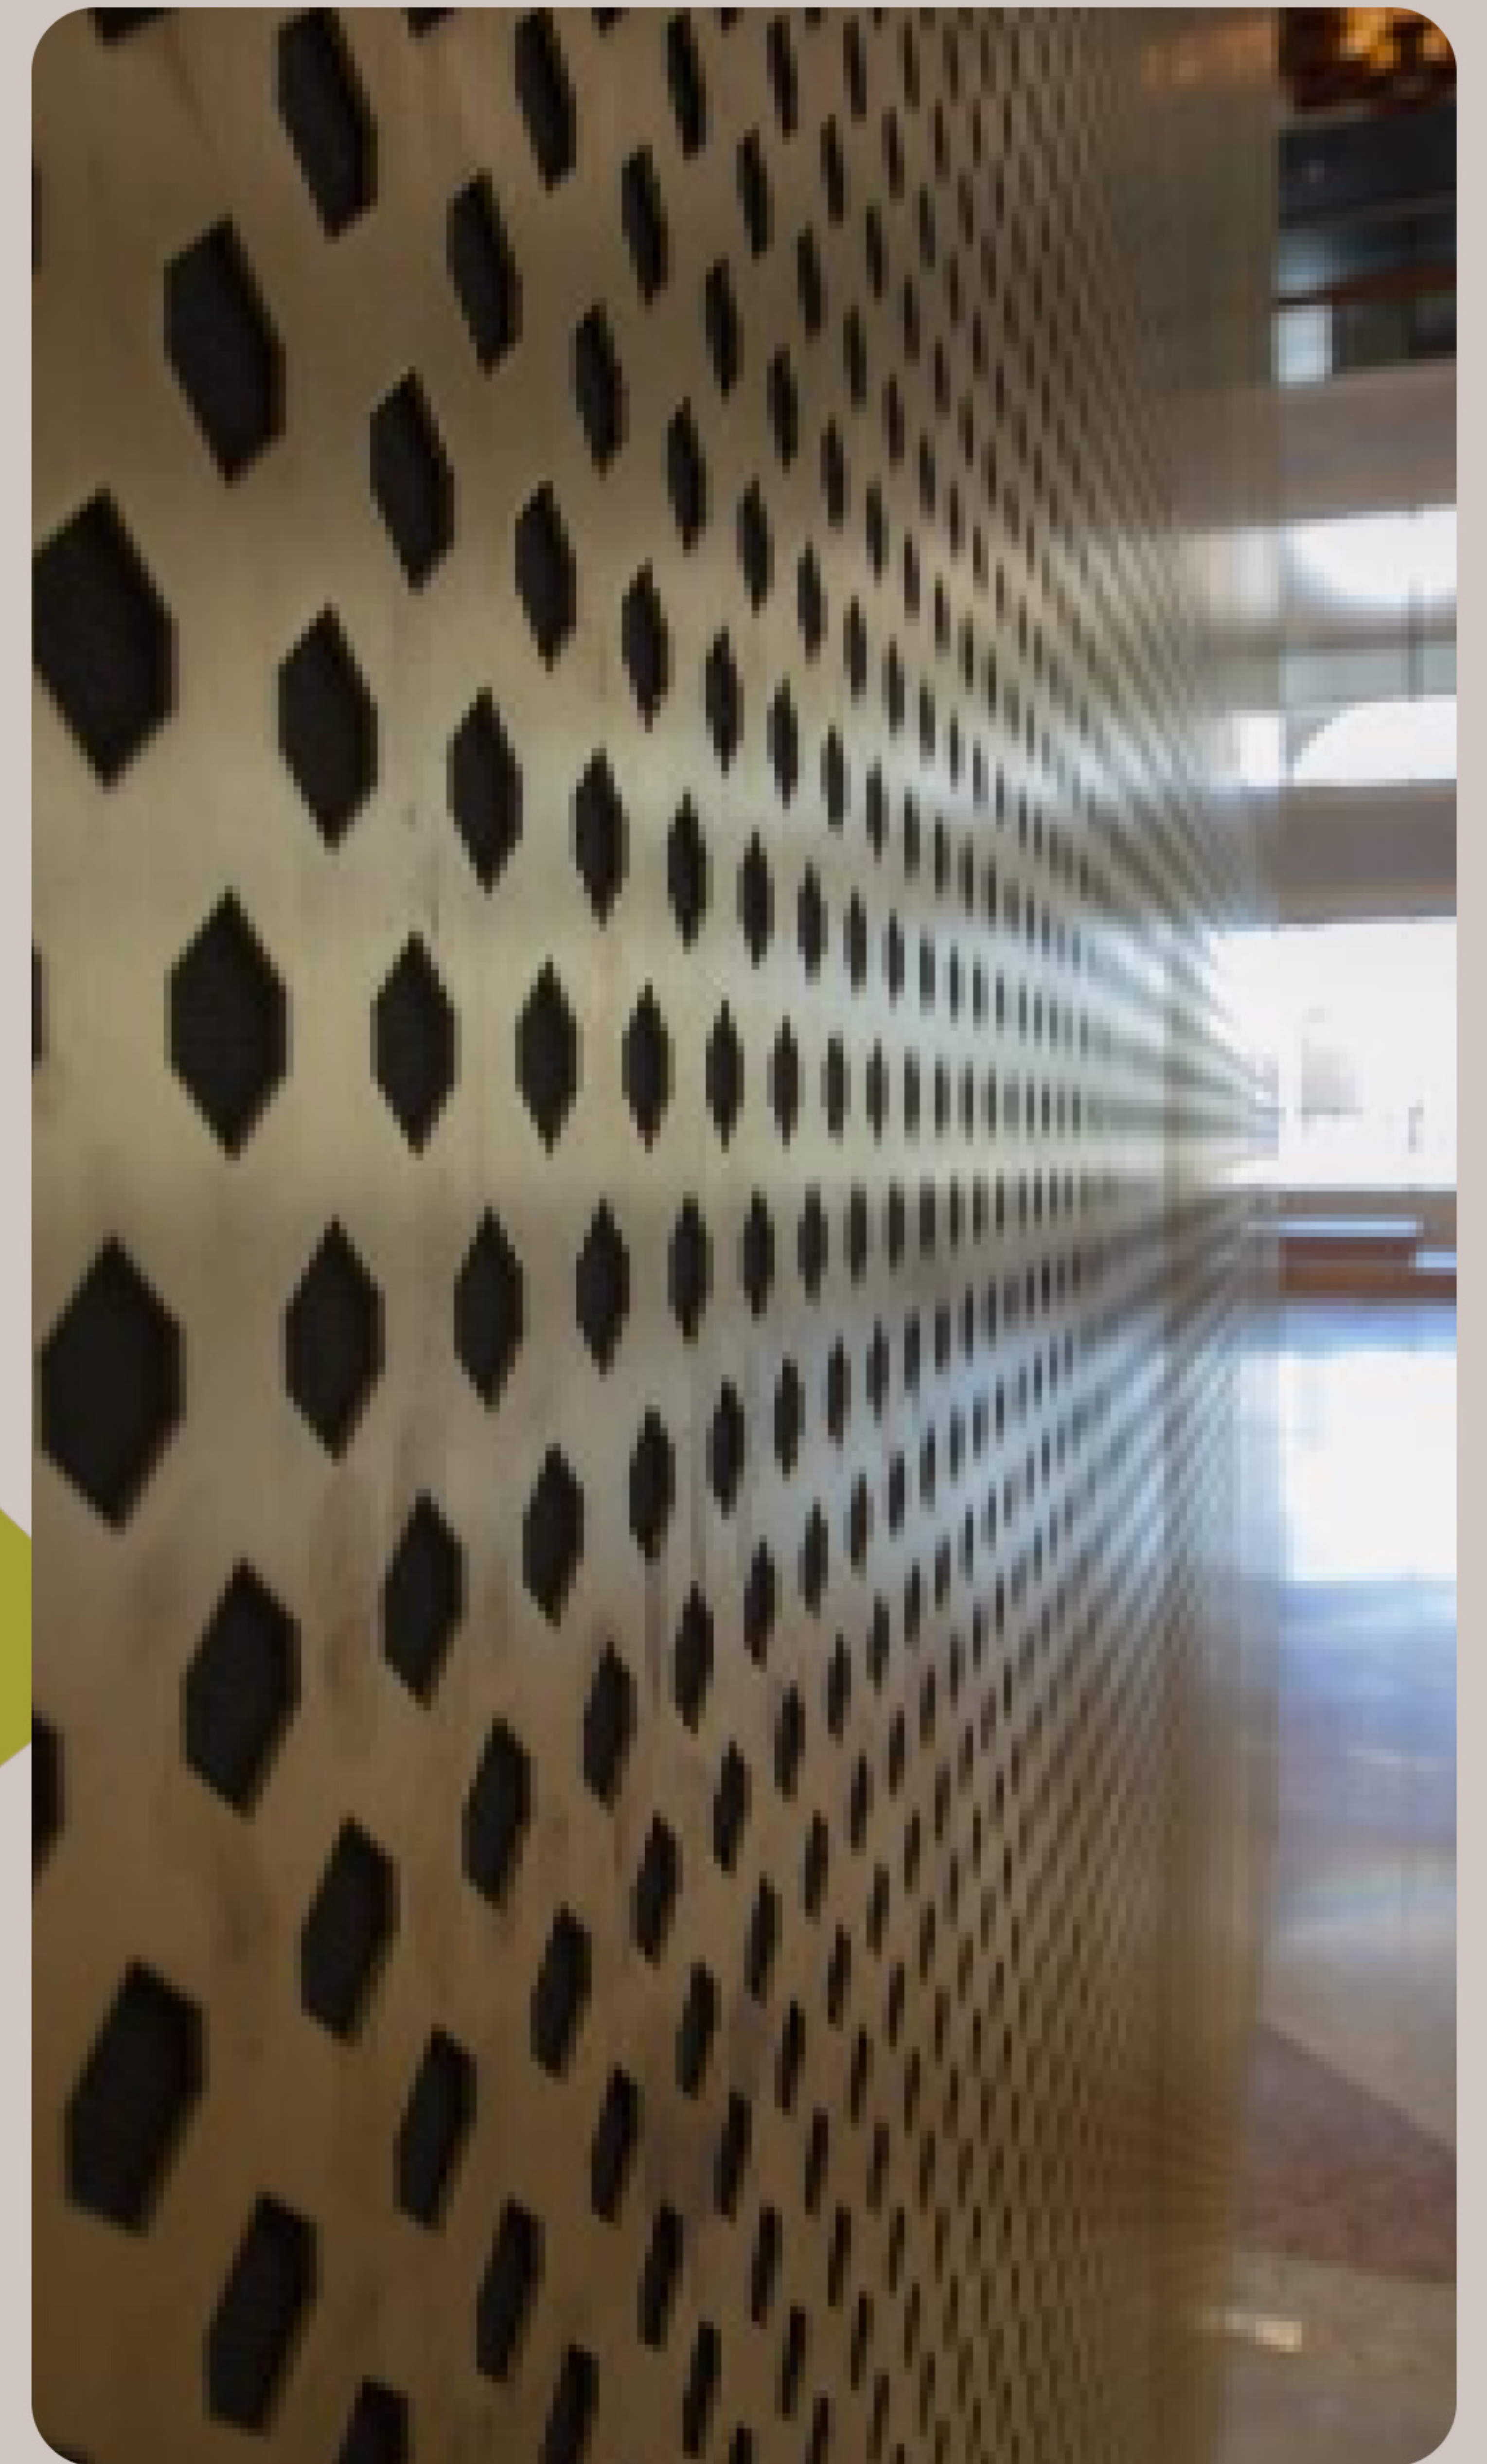

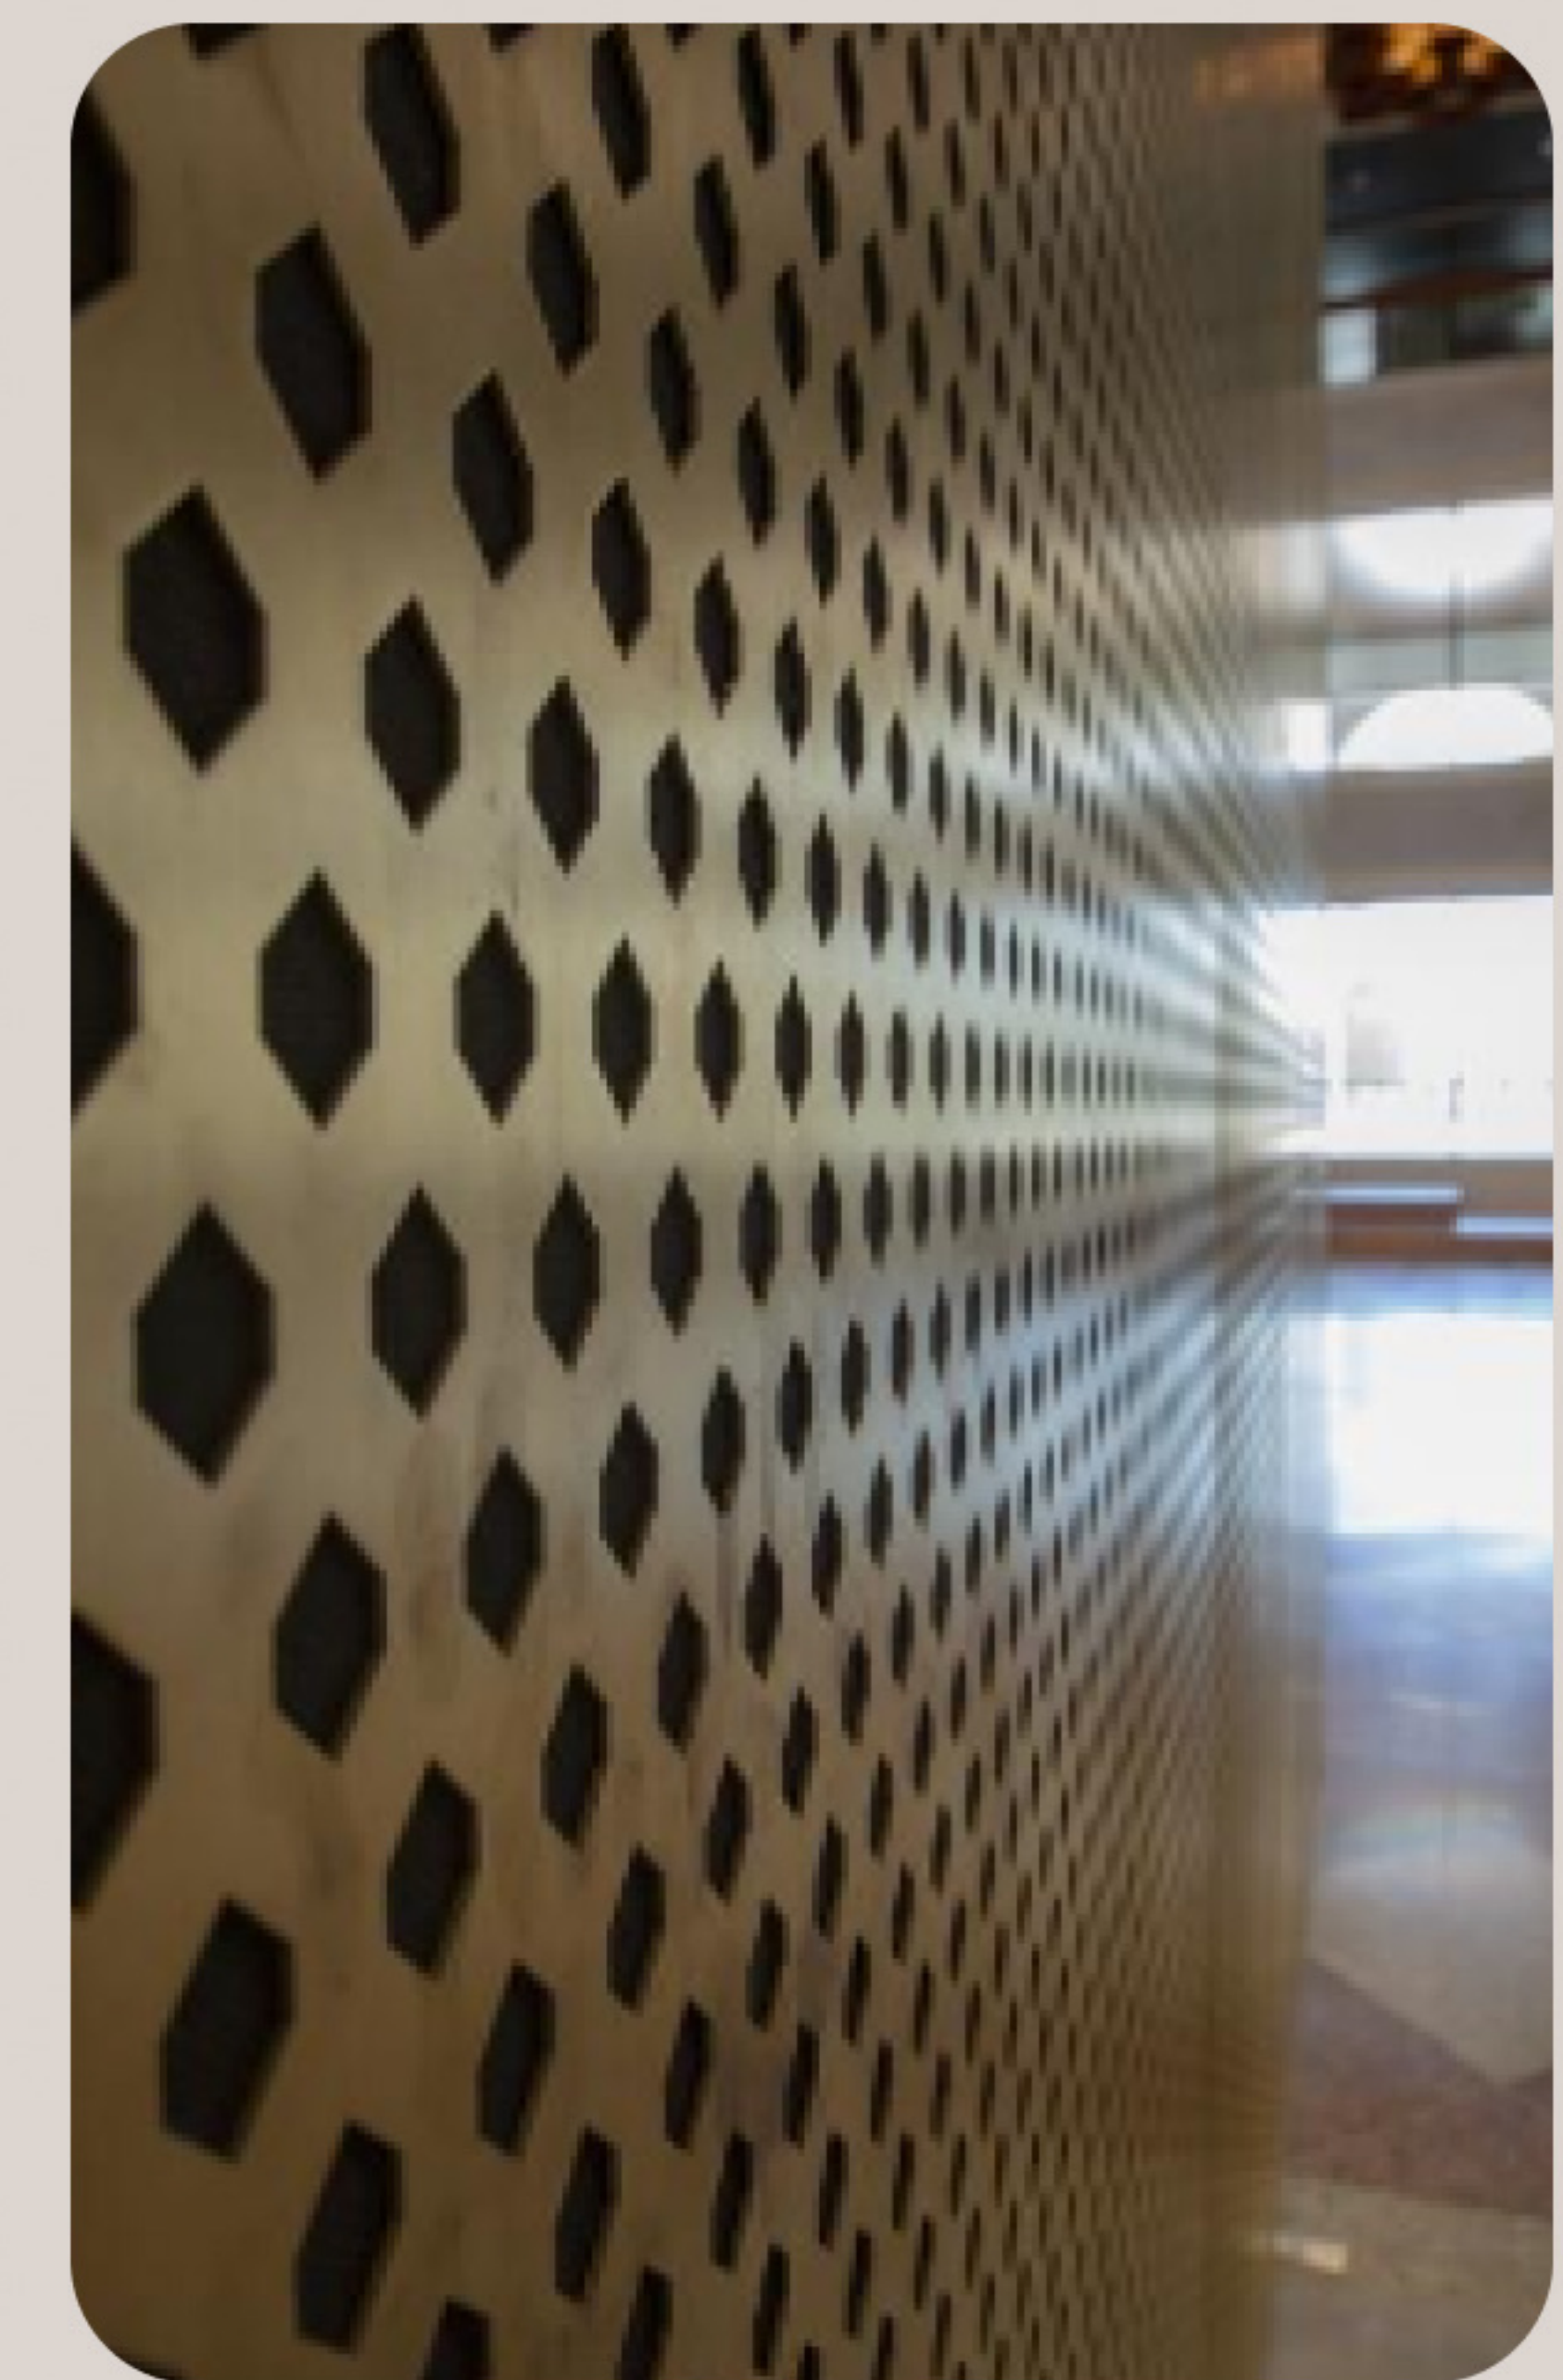

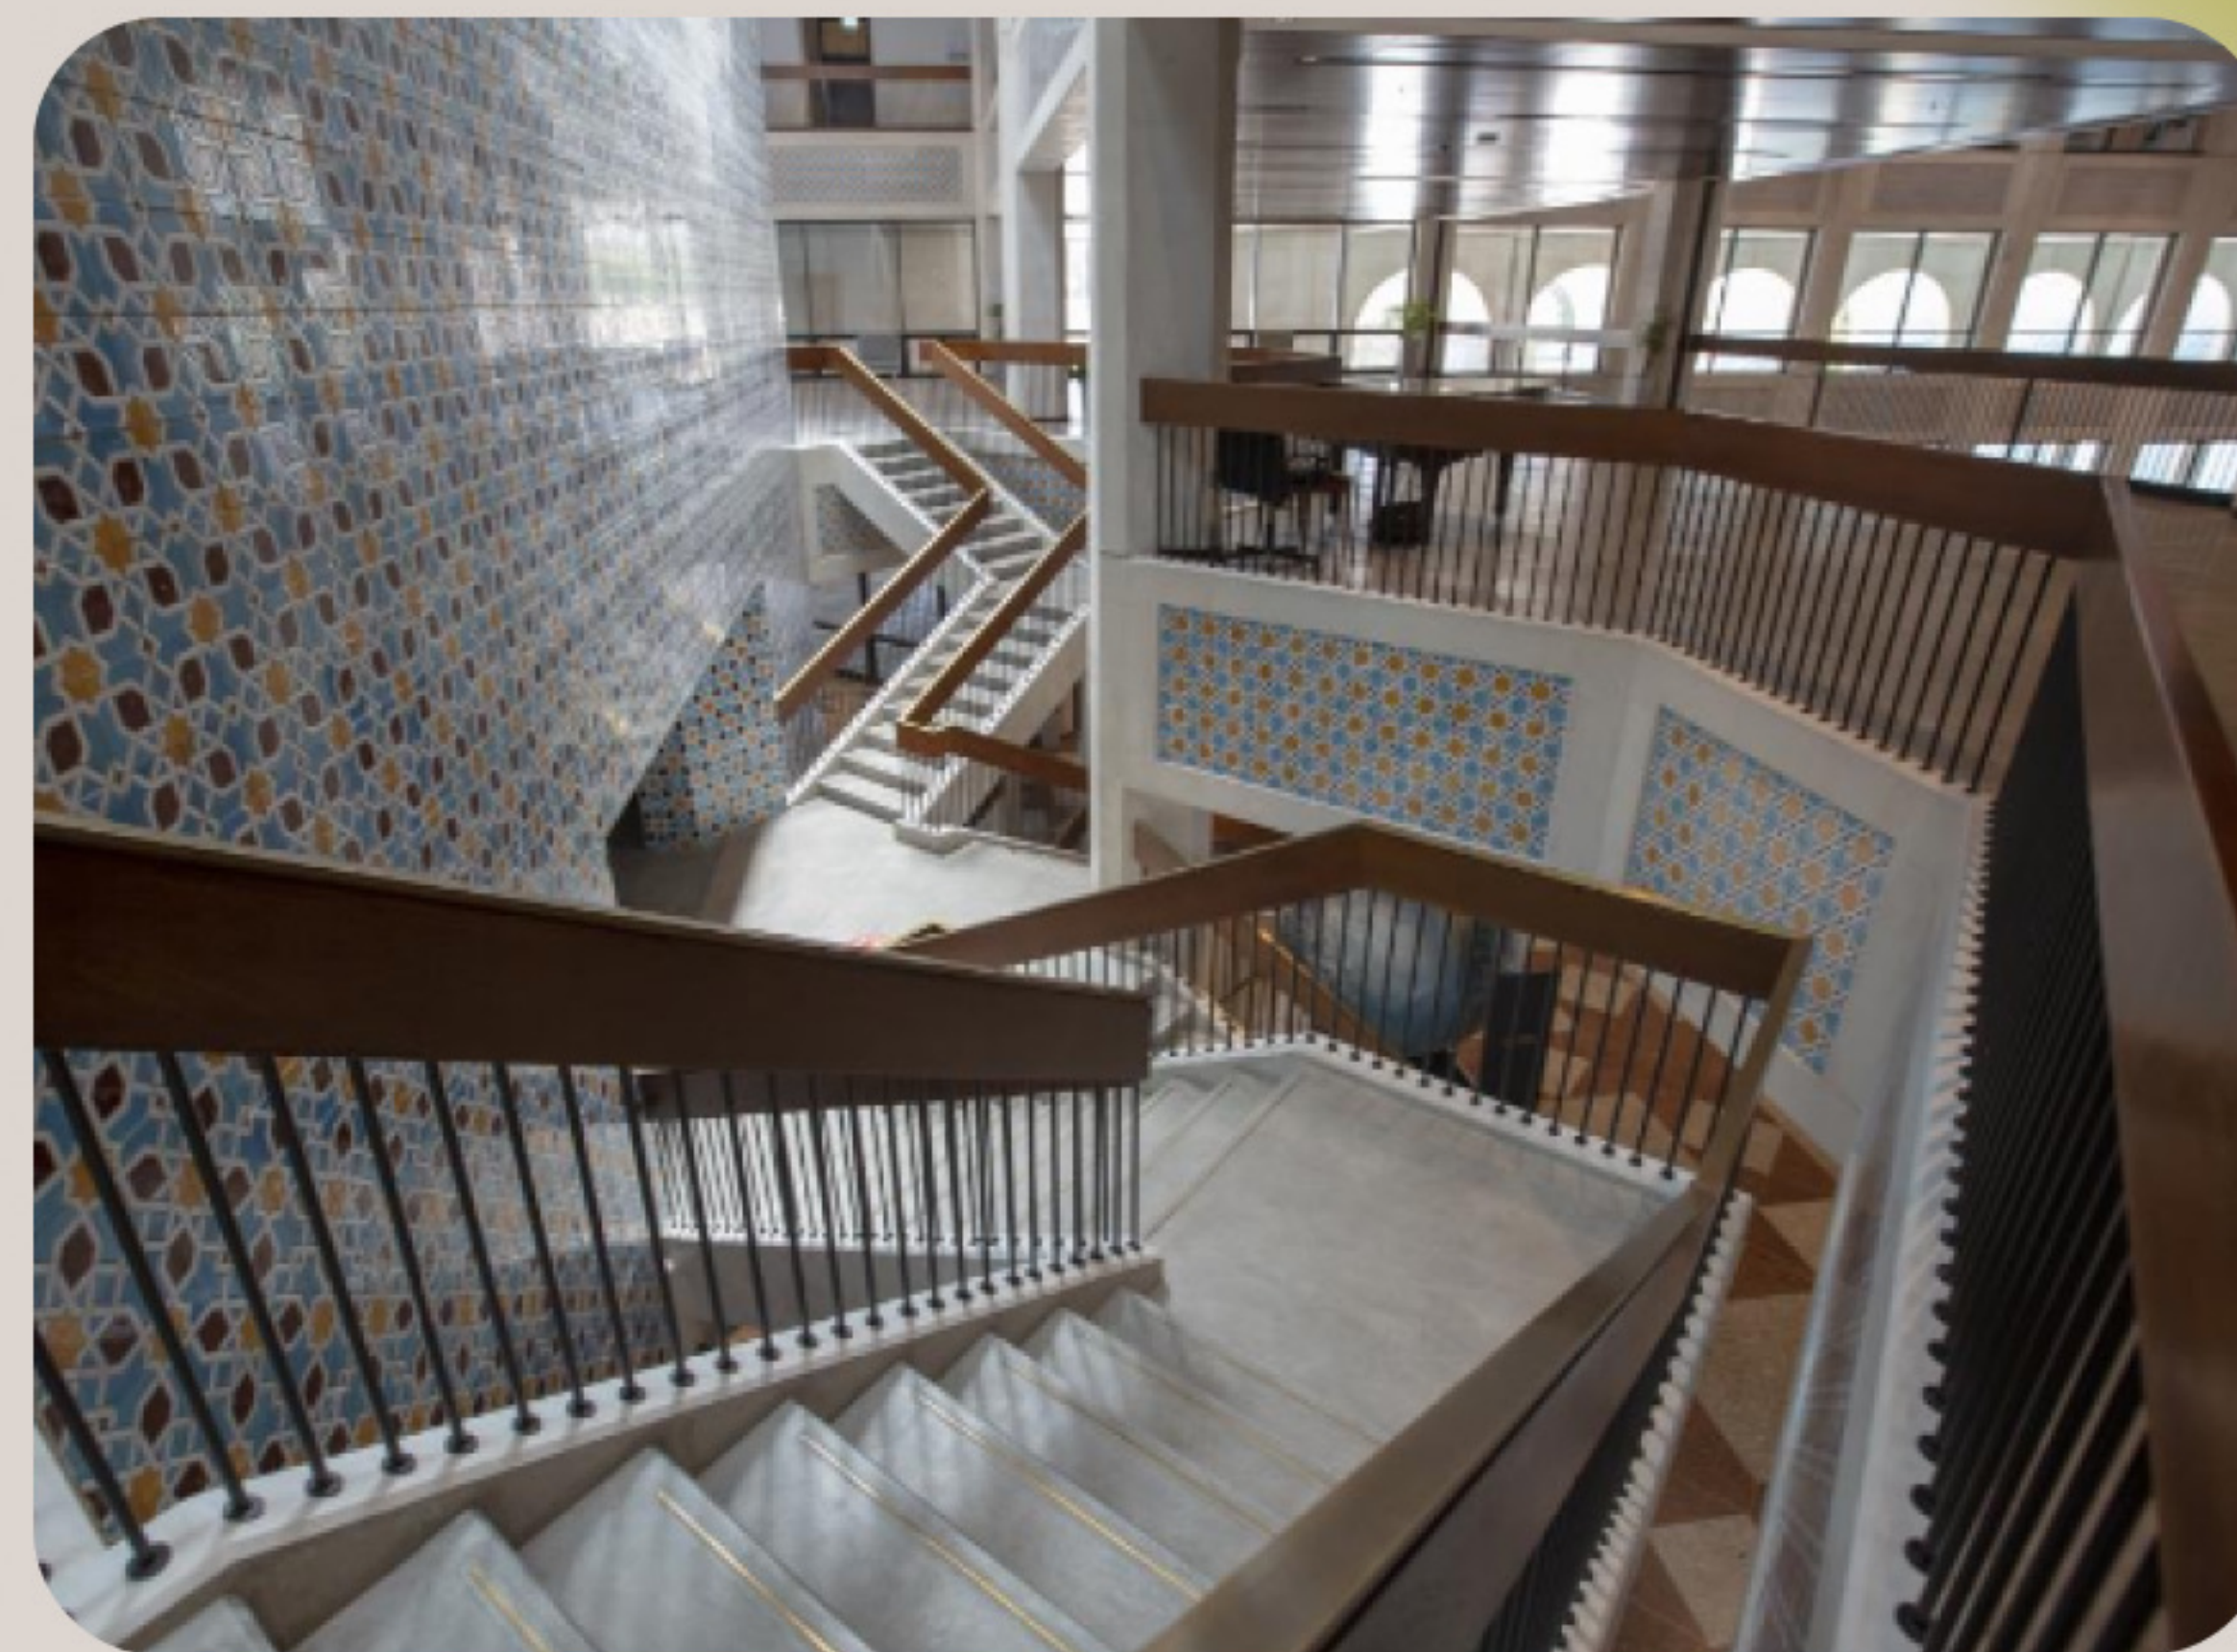

Alhoson Palace قصر الحصن

Abu Dhabi Iconic Museum Design, we have done the most complicated huge copper doors with special pivot design.

AlHamy was assigned to do the following work :

- 6.5m x 6.0m Swing Special Copper Door.
- All Internal Balustrades Consisting of Wooden, Copper and Bronze.
- Glass Balustrades for the External Lobby.
- Glass Screens for the Roof Area.
- Brass Handrail for the Landscape

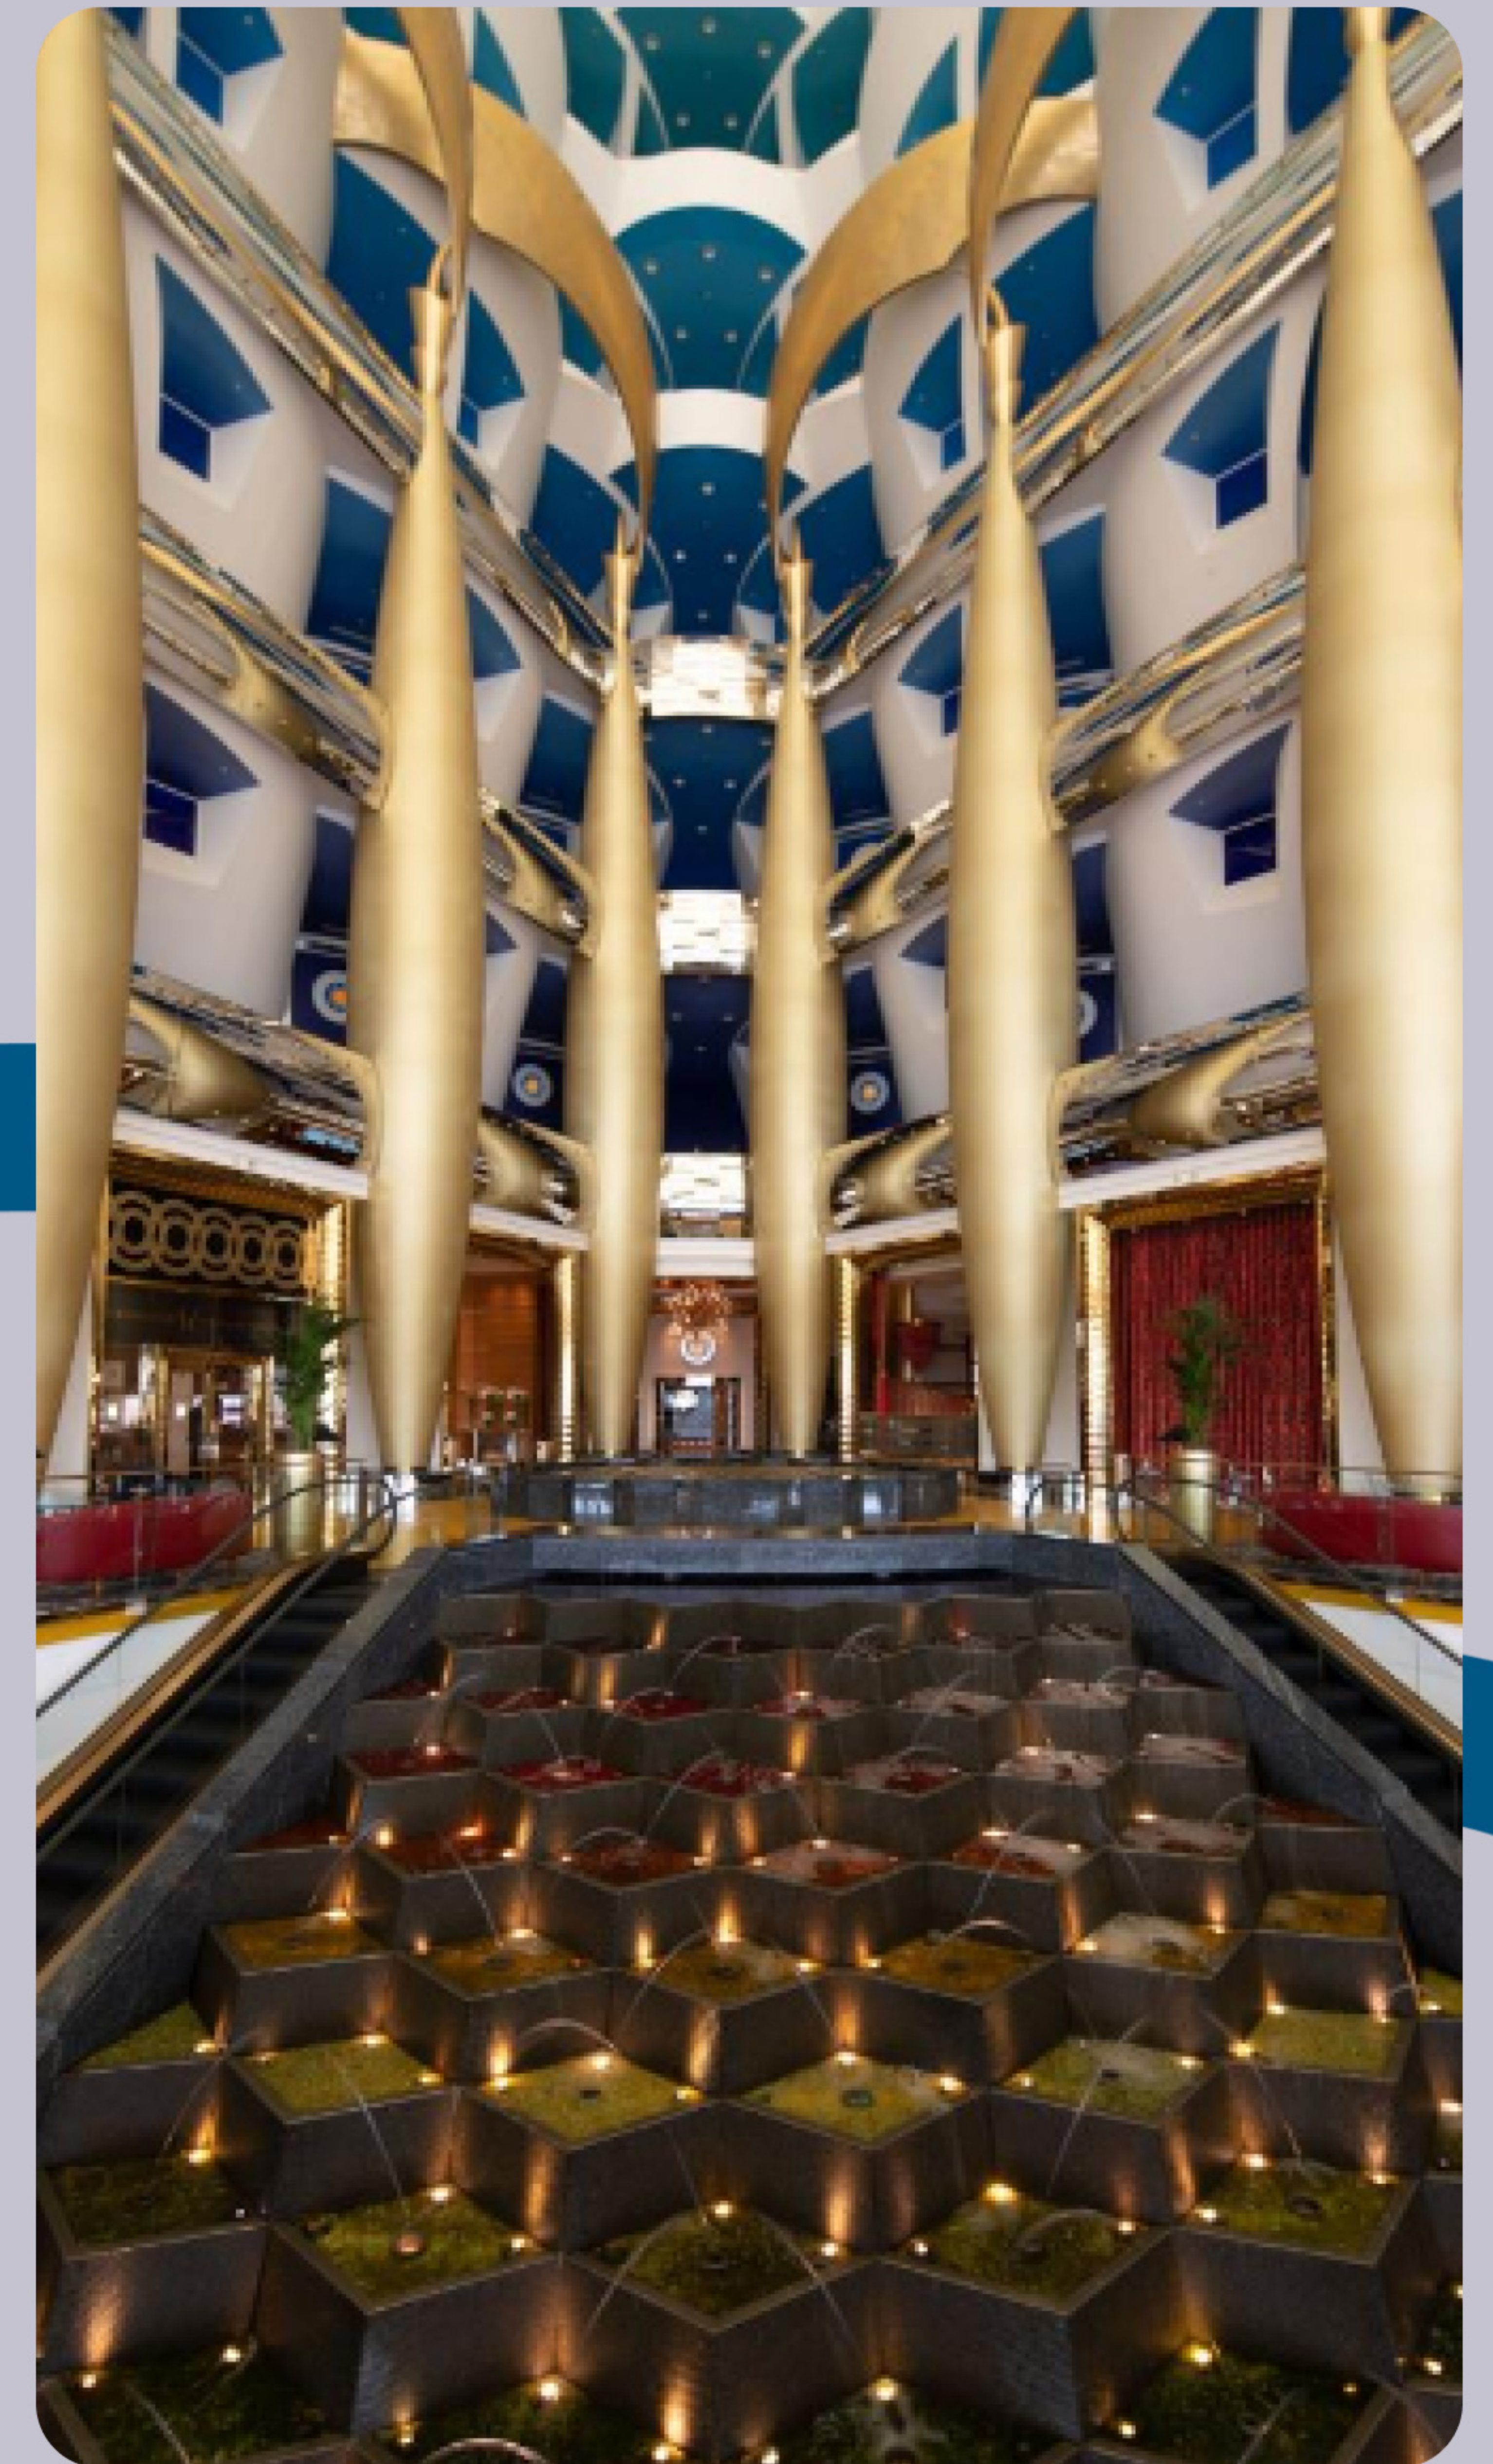

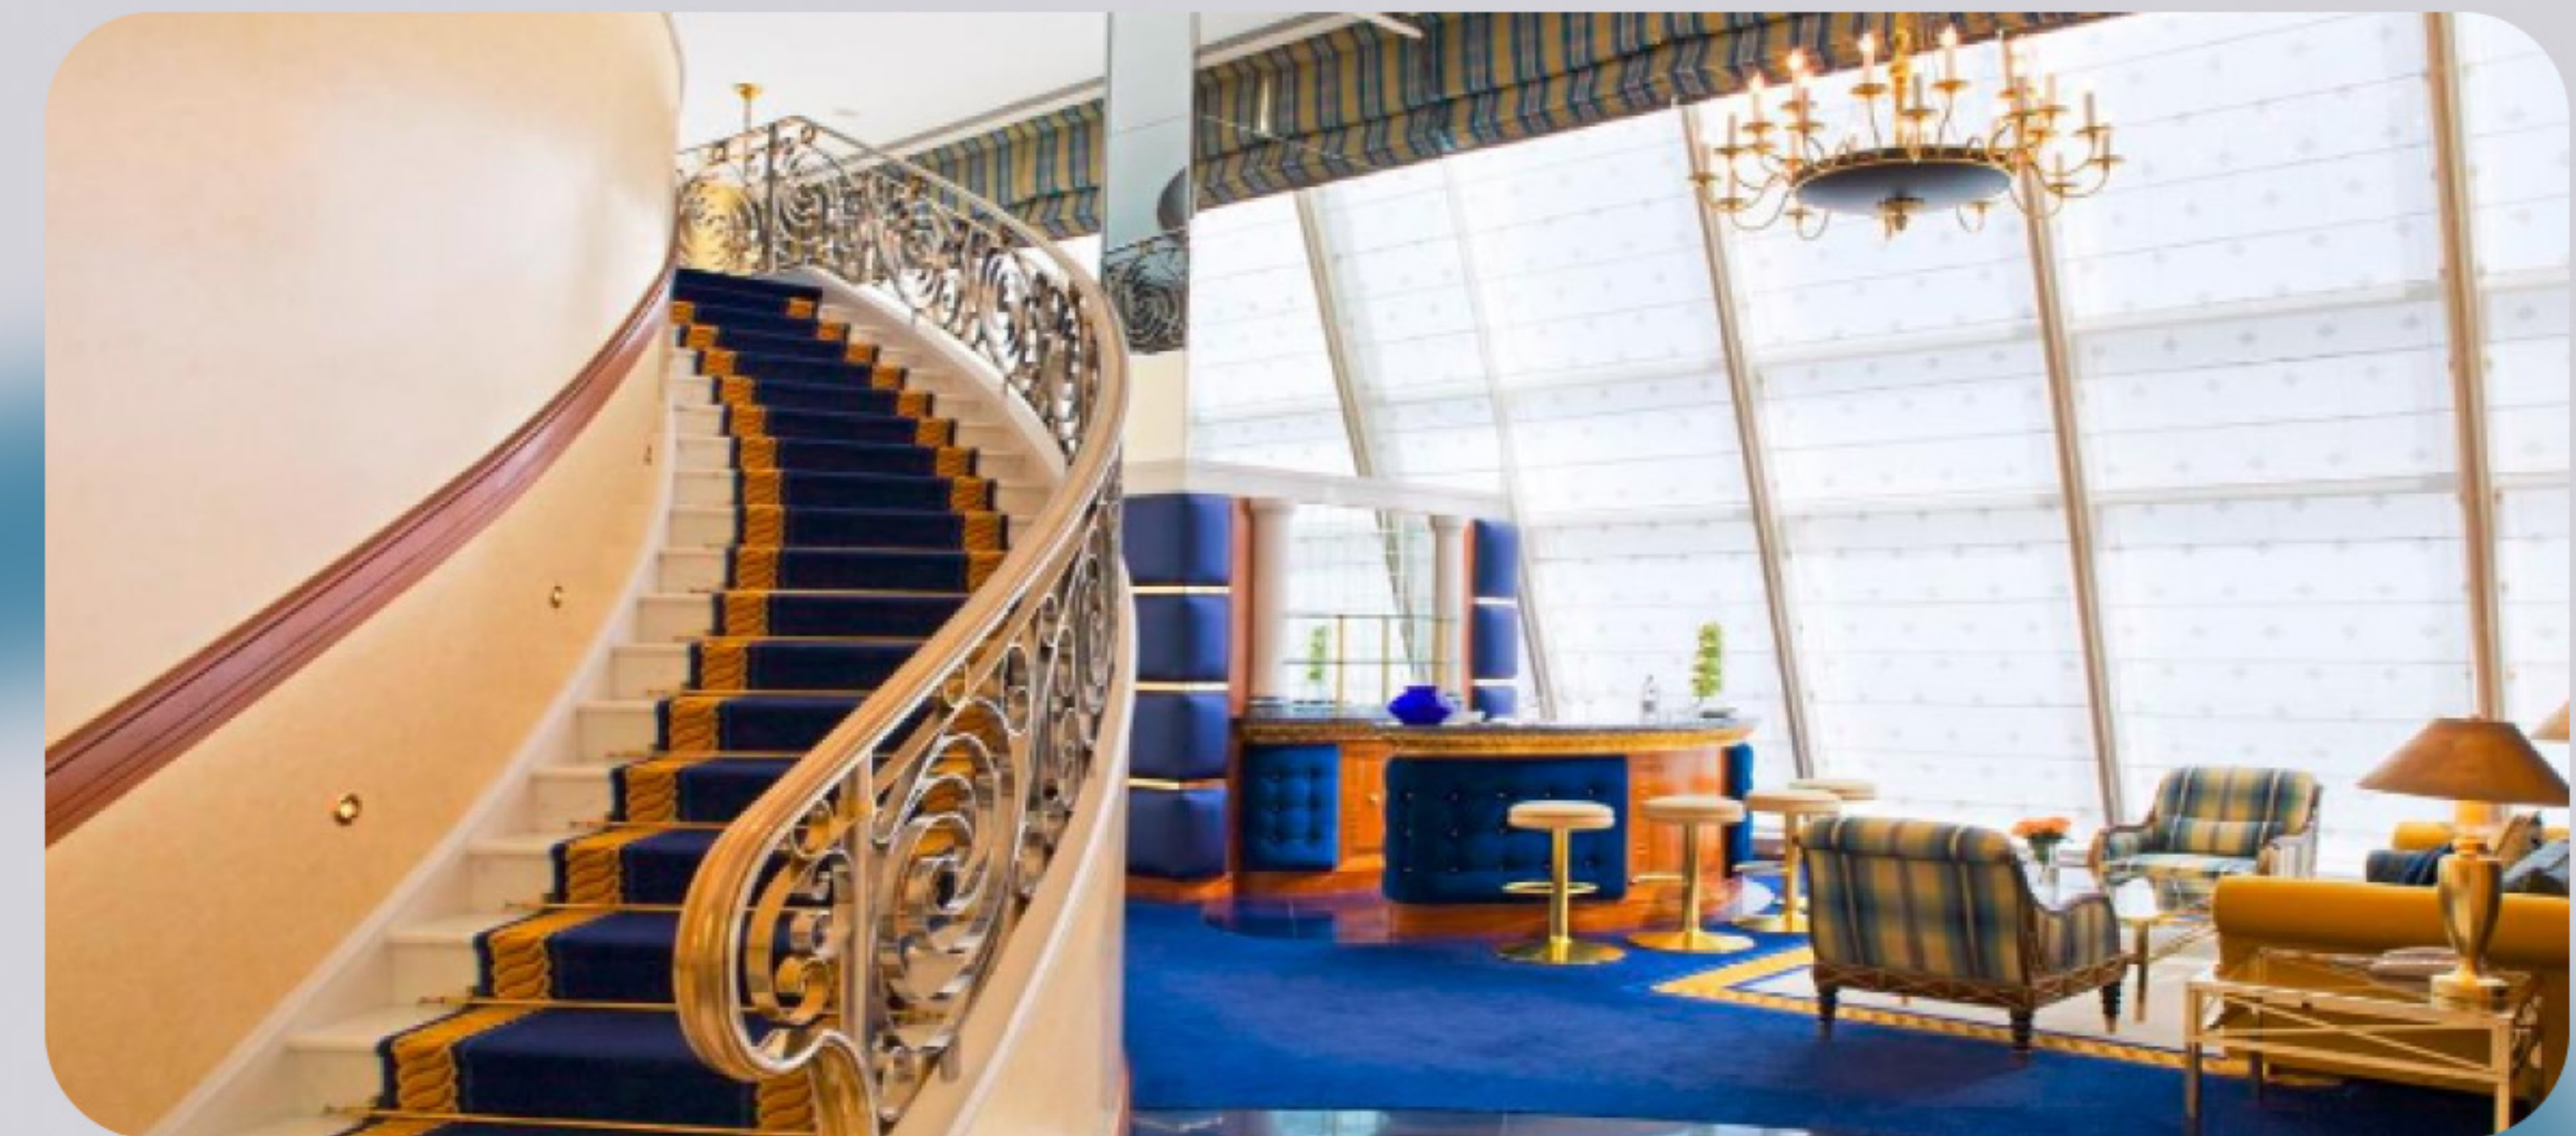

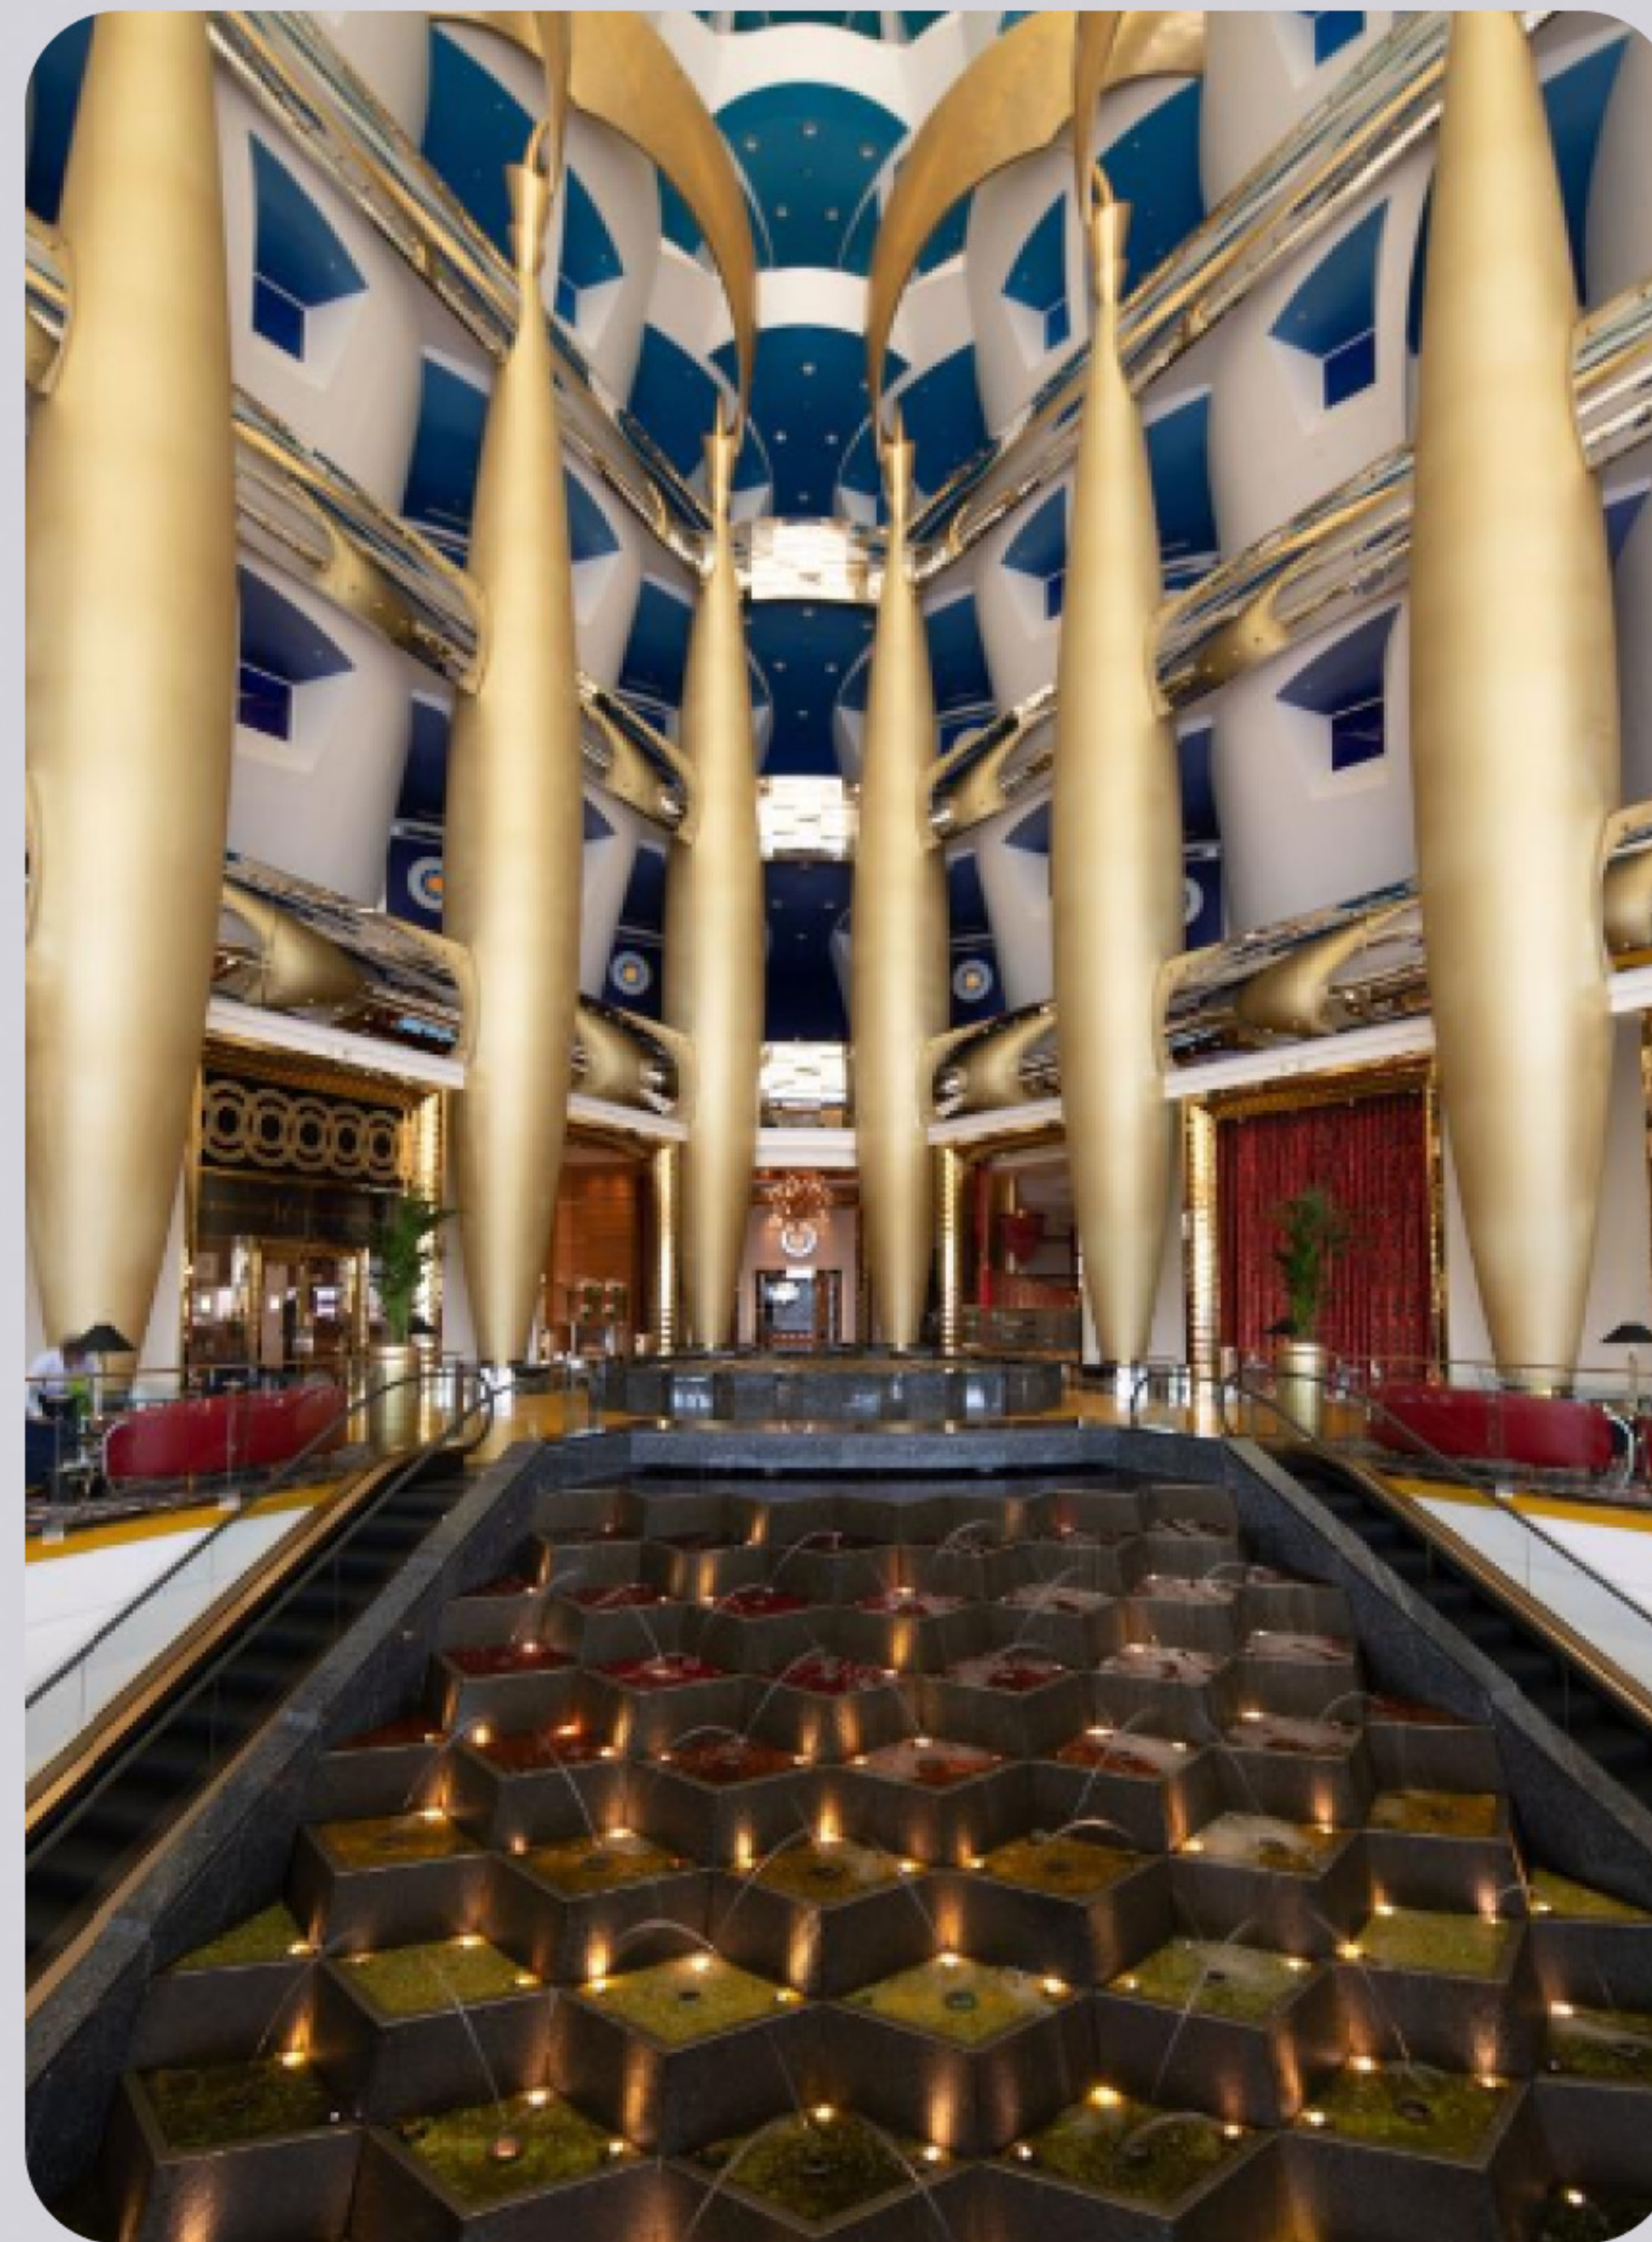

Burj Al Arab برج العرب

We've done the Main featured Fountain and the main fountain of Burj Al Arab hotel in Dubai, UAE.

AlHamy was assigned to do the following work :

- 220 rooms Internal stairs Railing consisting of Brass and Stainless steel.
- The Main Lobby fountain.
- The Dancing Fountain in the Main Lobby.

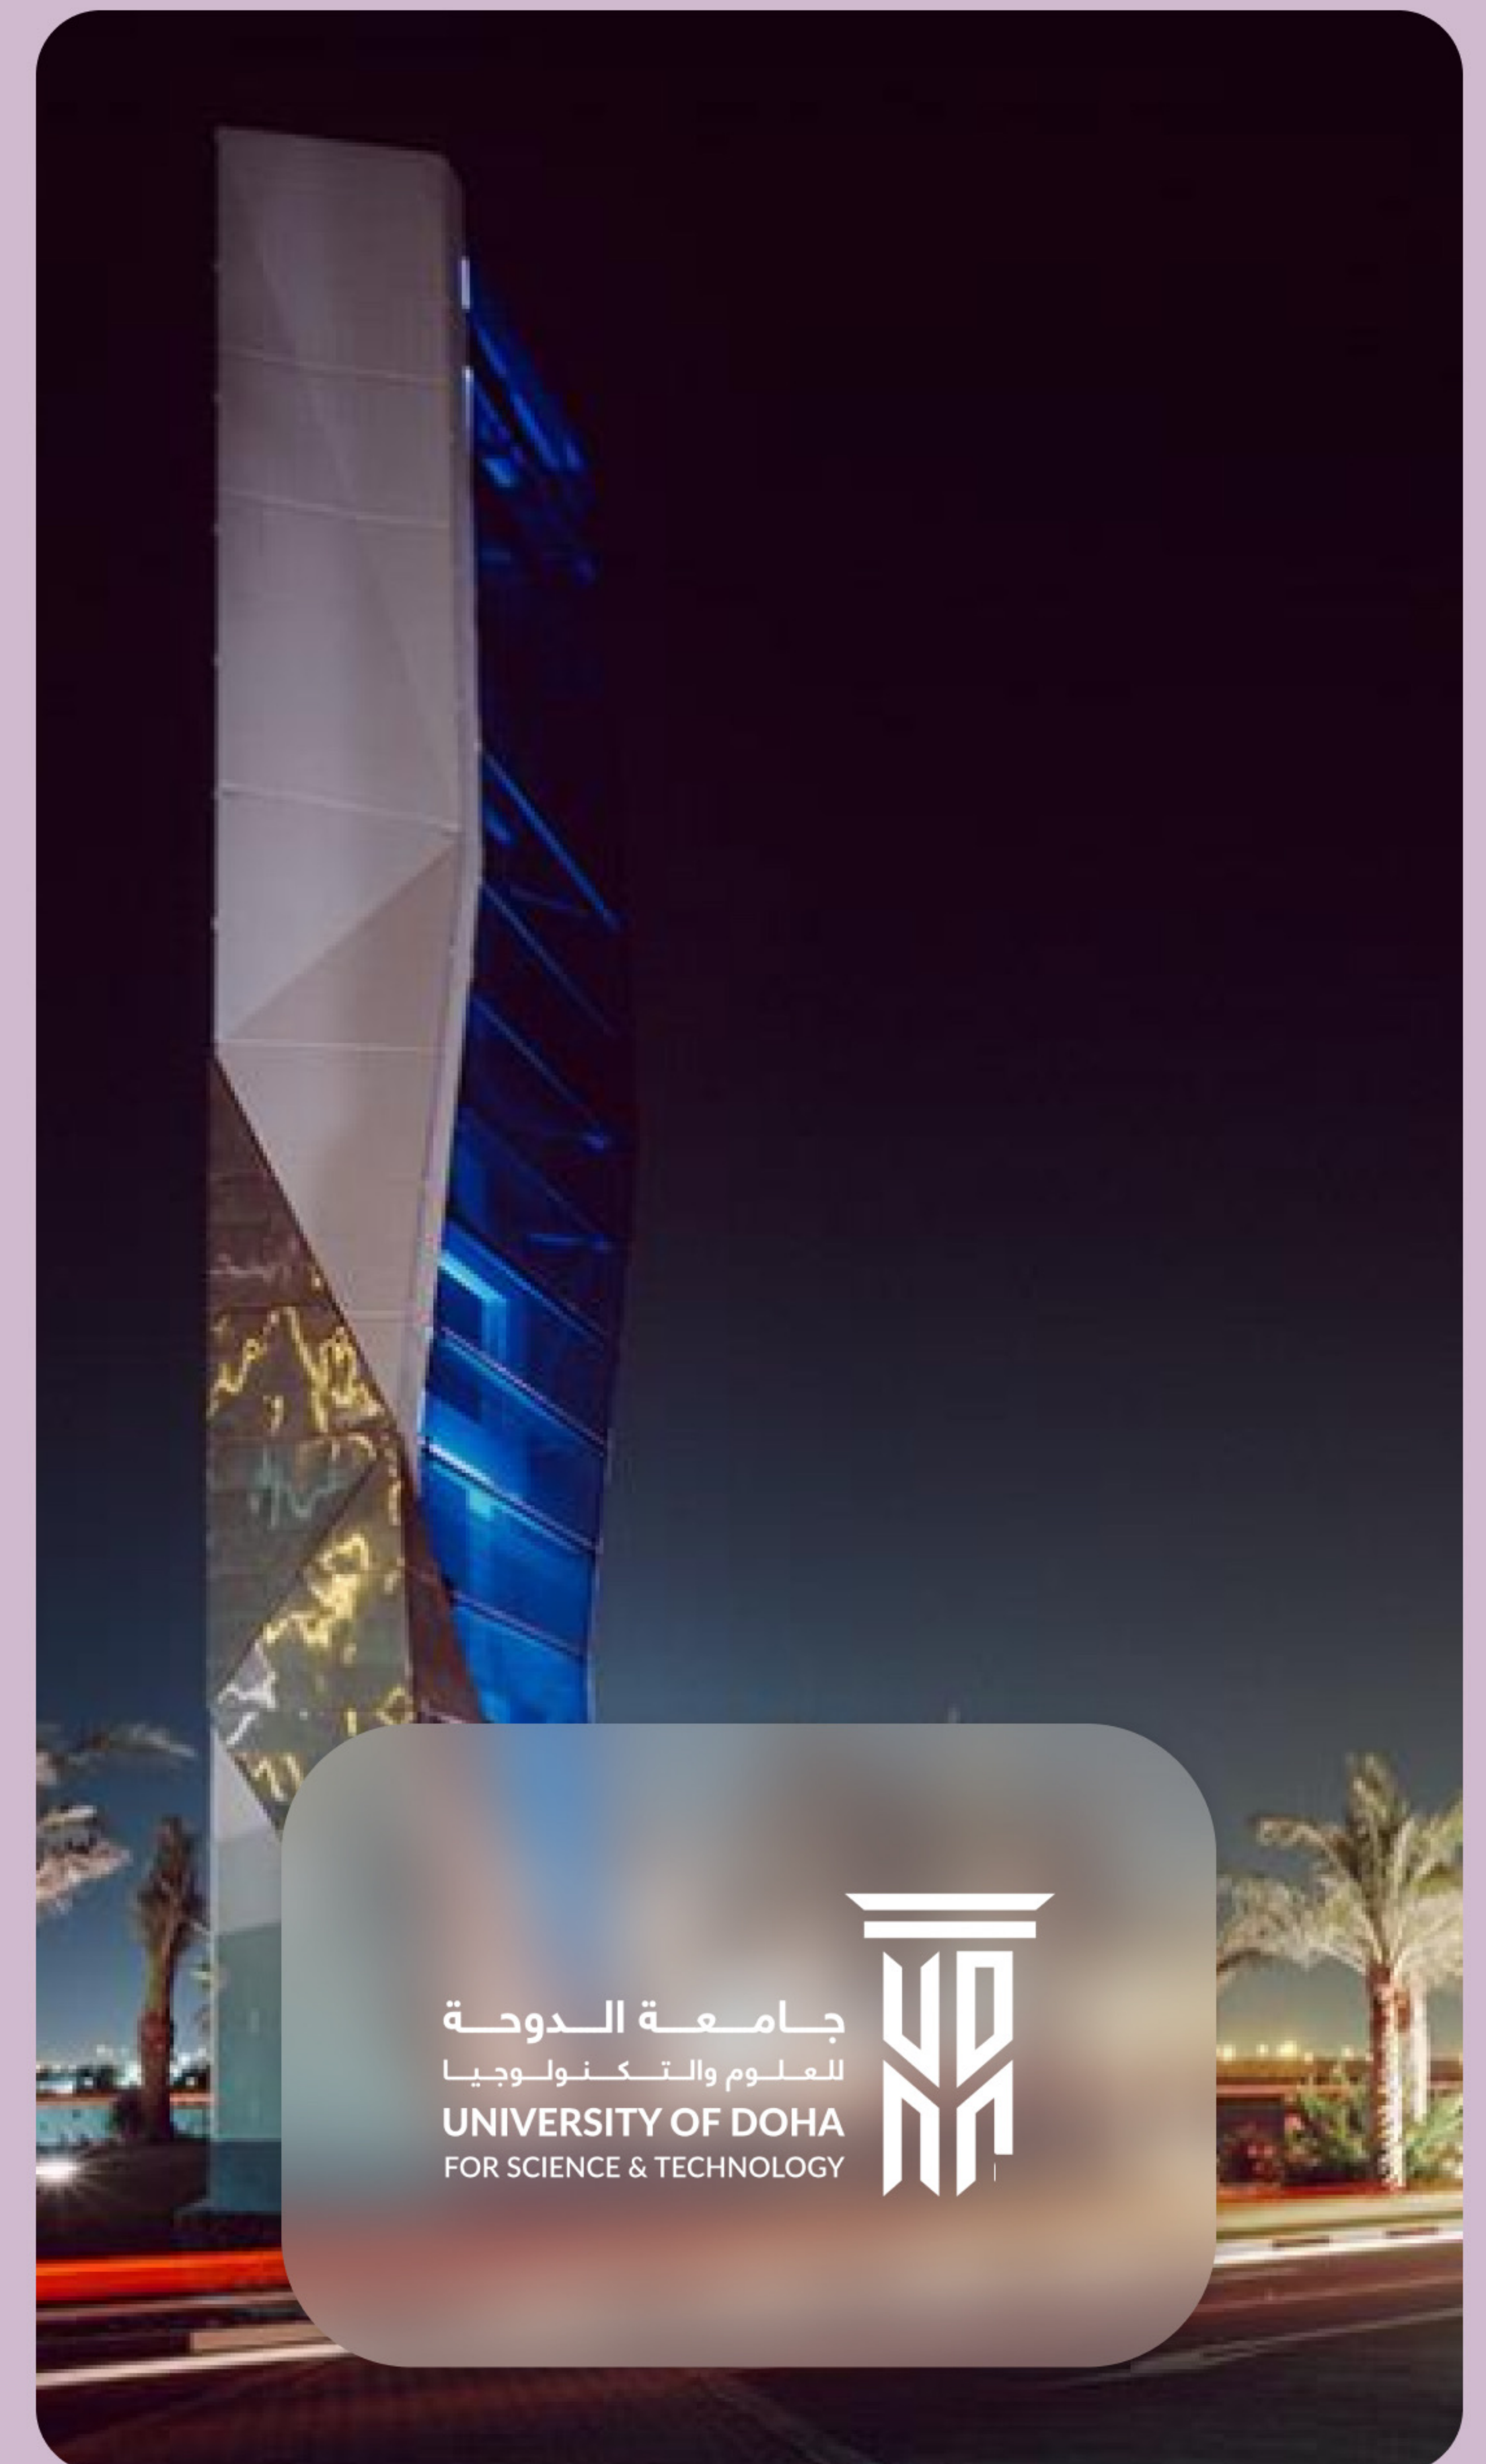

North Atlantic University – Doha

5000 Square Meter of stainless Steel metal Cladding and all internal and external handrail including glazing Balustrades

AlHamy was assigned to do the following work :

- 220 rooms Internal stairs Railing consisting of Brass and Stainless-Steel
- The Main Lobby fountain
- The Dancing Fountain in the Main Lobby

جامعة الدوحة
للعلوم والتكنولوجيا
UNIVERSITY OF DOHA
FOR SCIENCE & TECHNOLOGY

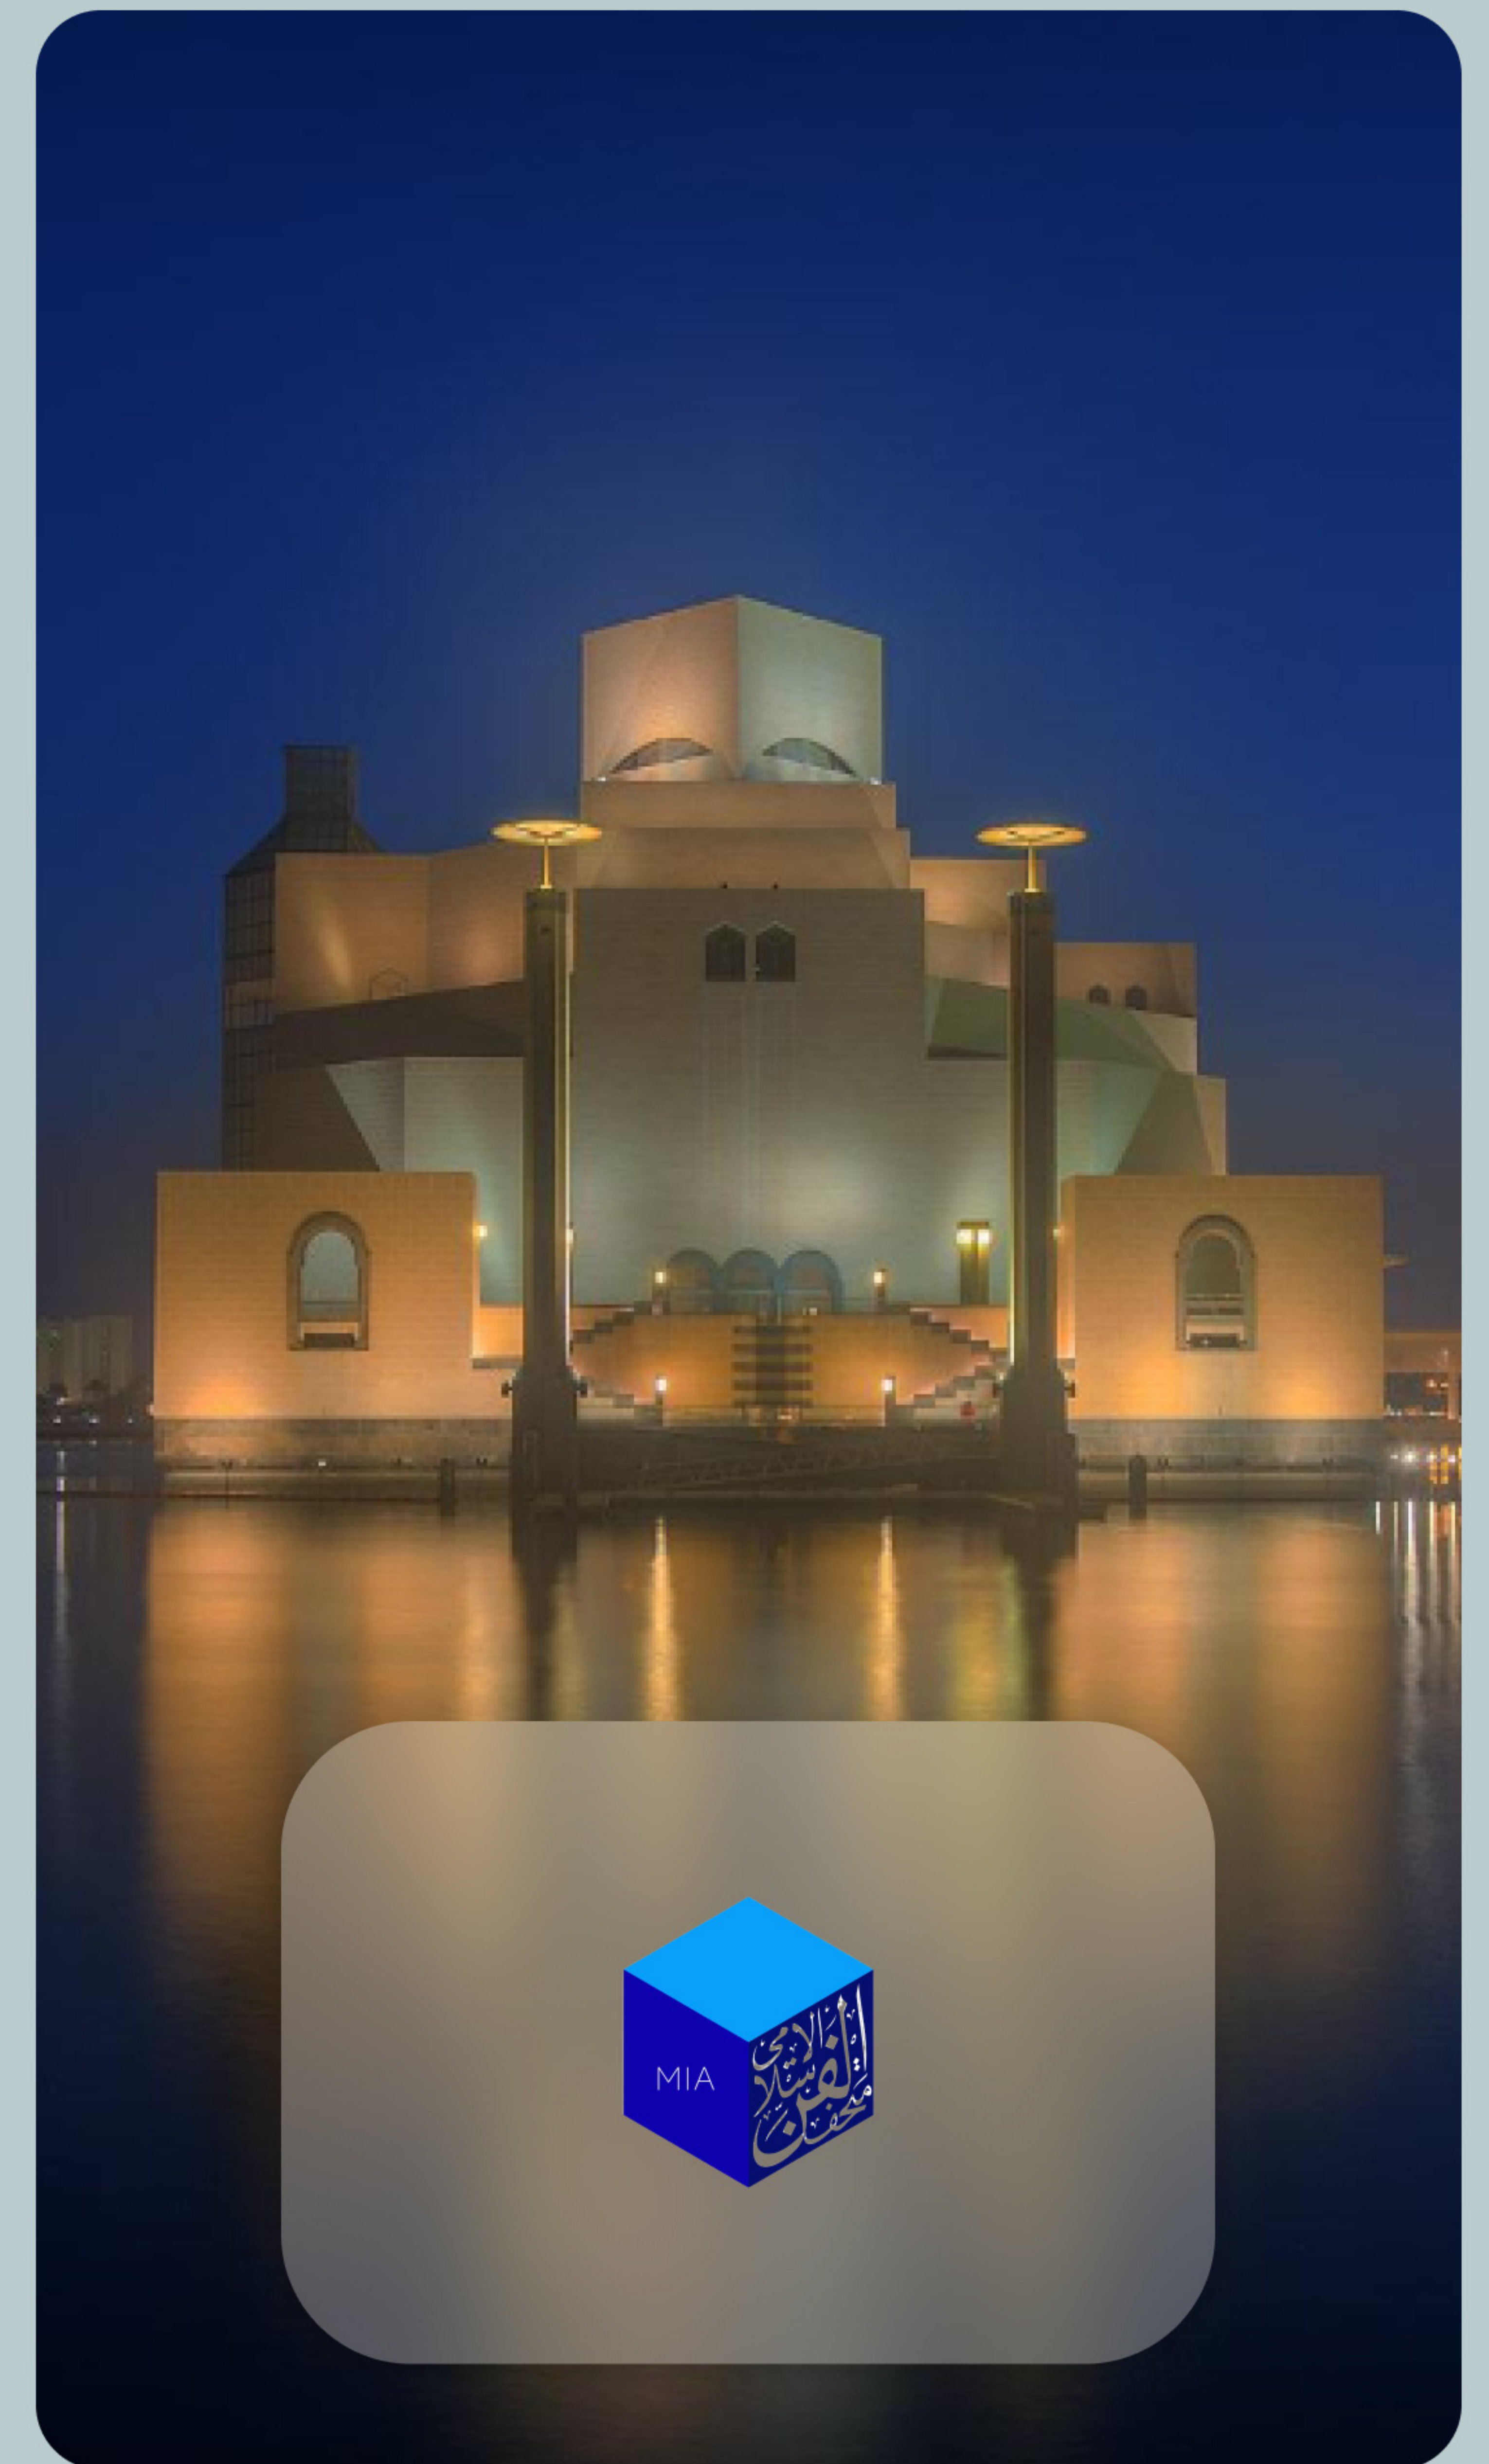

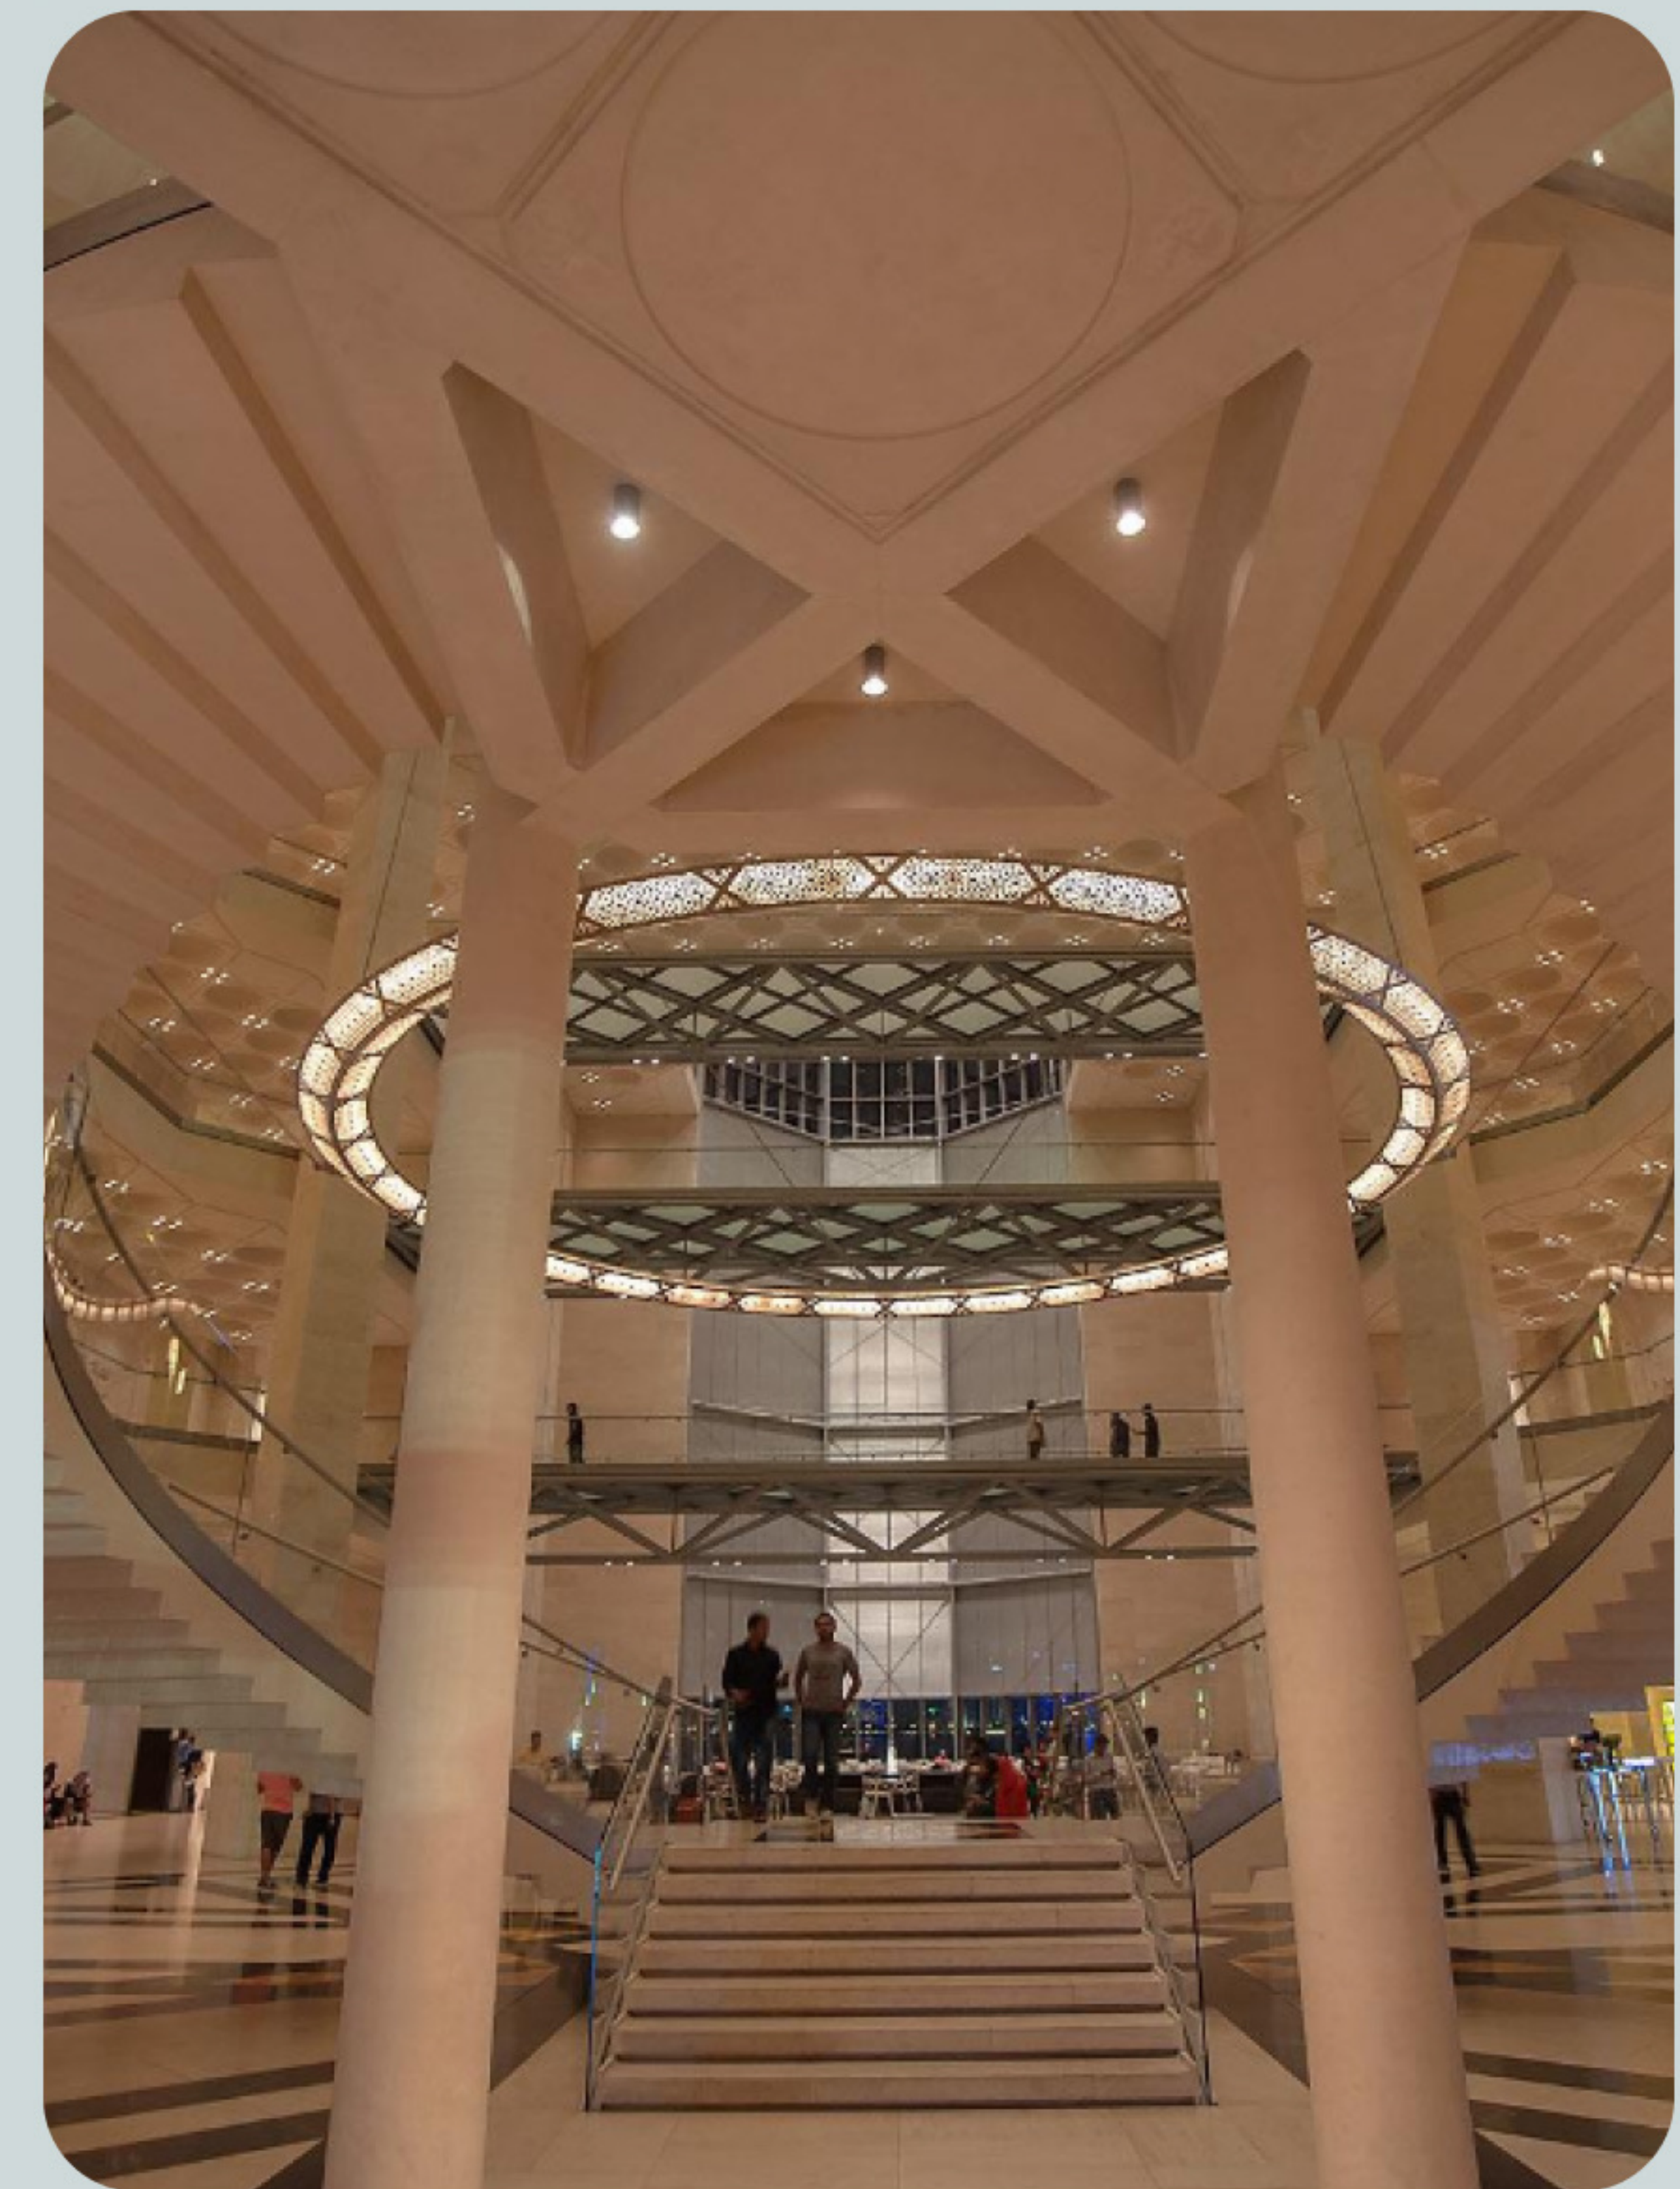

The Islamic Art Museum

When of the Iconic Islamic modern design project in Qatar , we've done most of the work related to Balustrades internally and for the external landscape.

AlHamy did all the balustrades work for the internal and external landscape with special spiral main features stair cladding with stainless steel to cover fixation

QF Ceremonial Court

The Ceremonial Court Education City Education

Doha's ceremonial court designed by the pritzker-prize winning, Japanese architect, arata isozaiki. the scheme of the project provides a multi-functional, open-air space in which to host events in the capital's 'education city' campus.

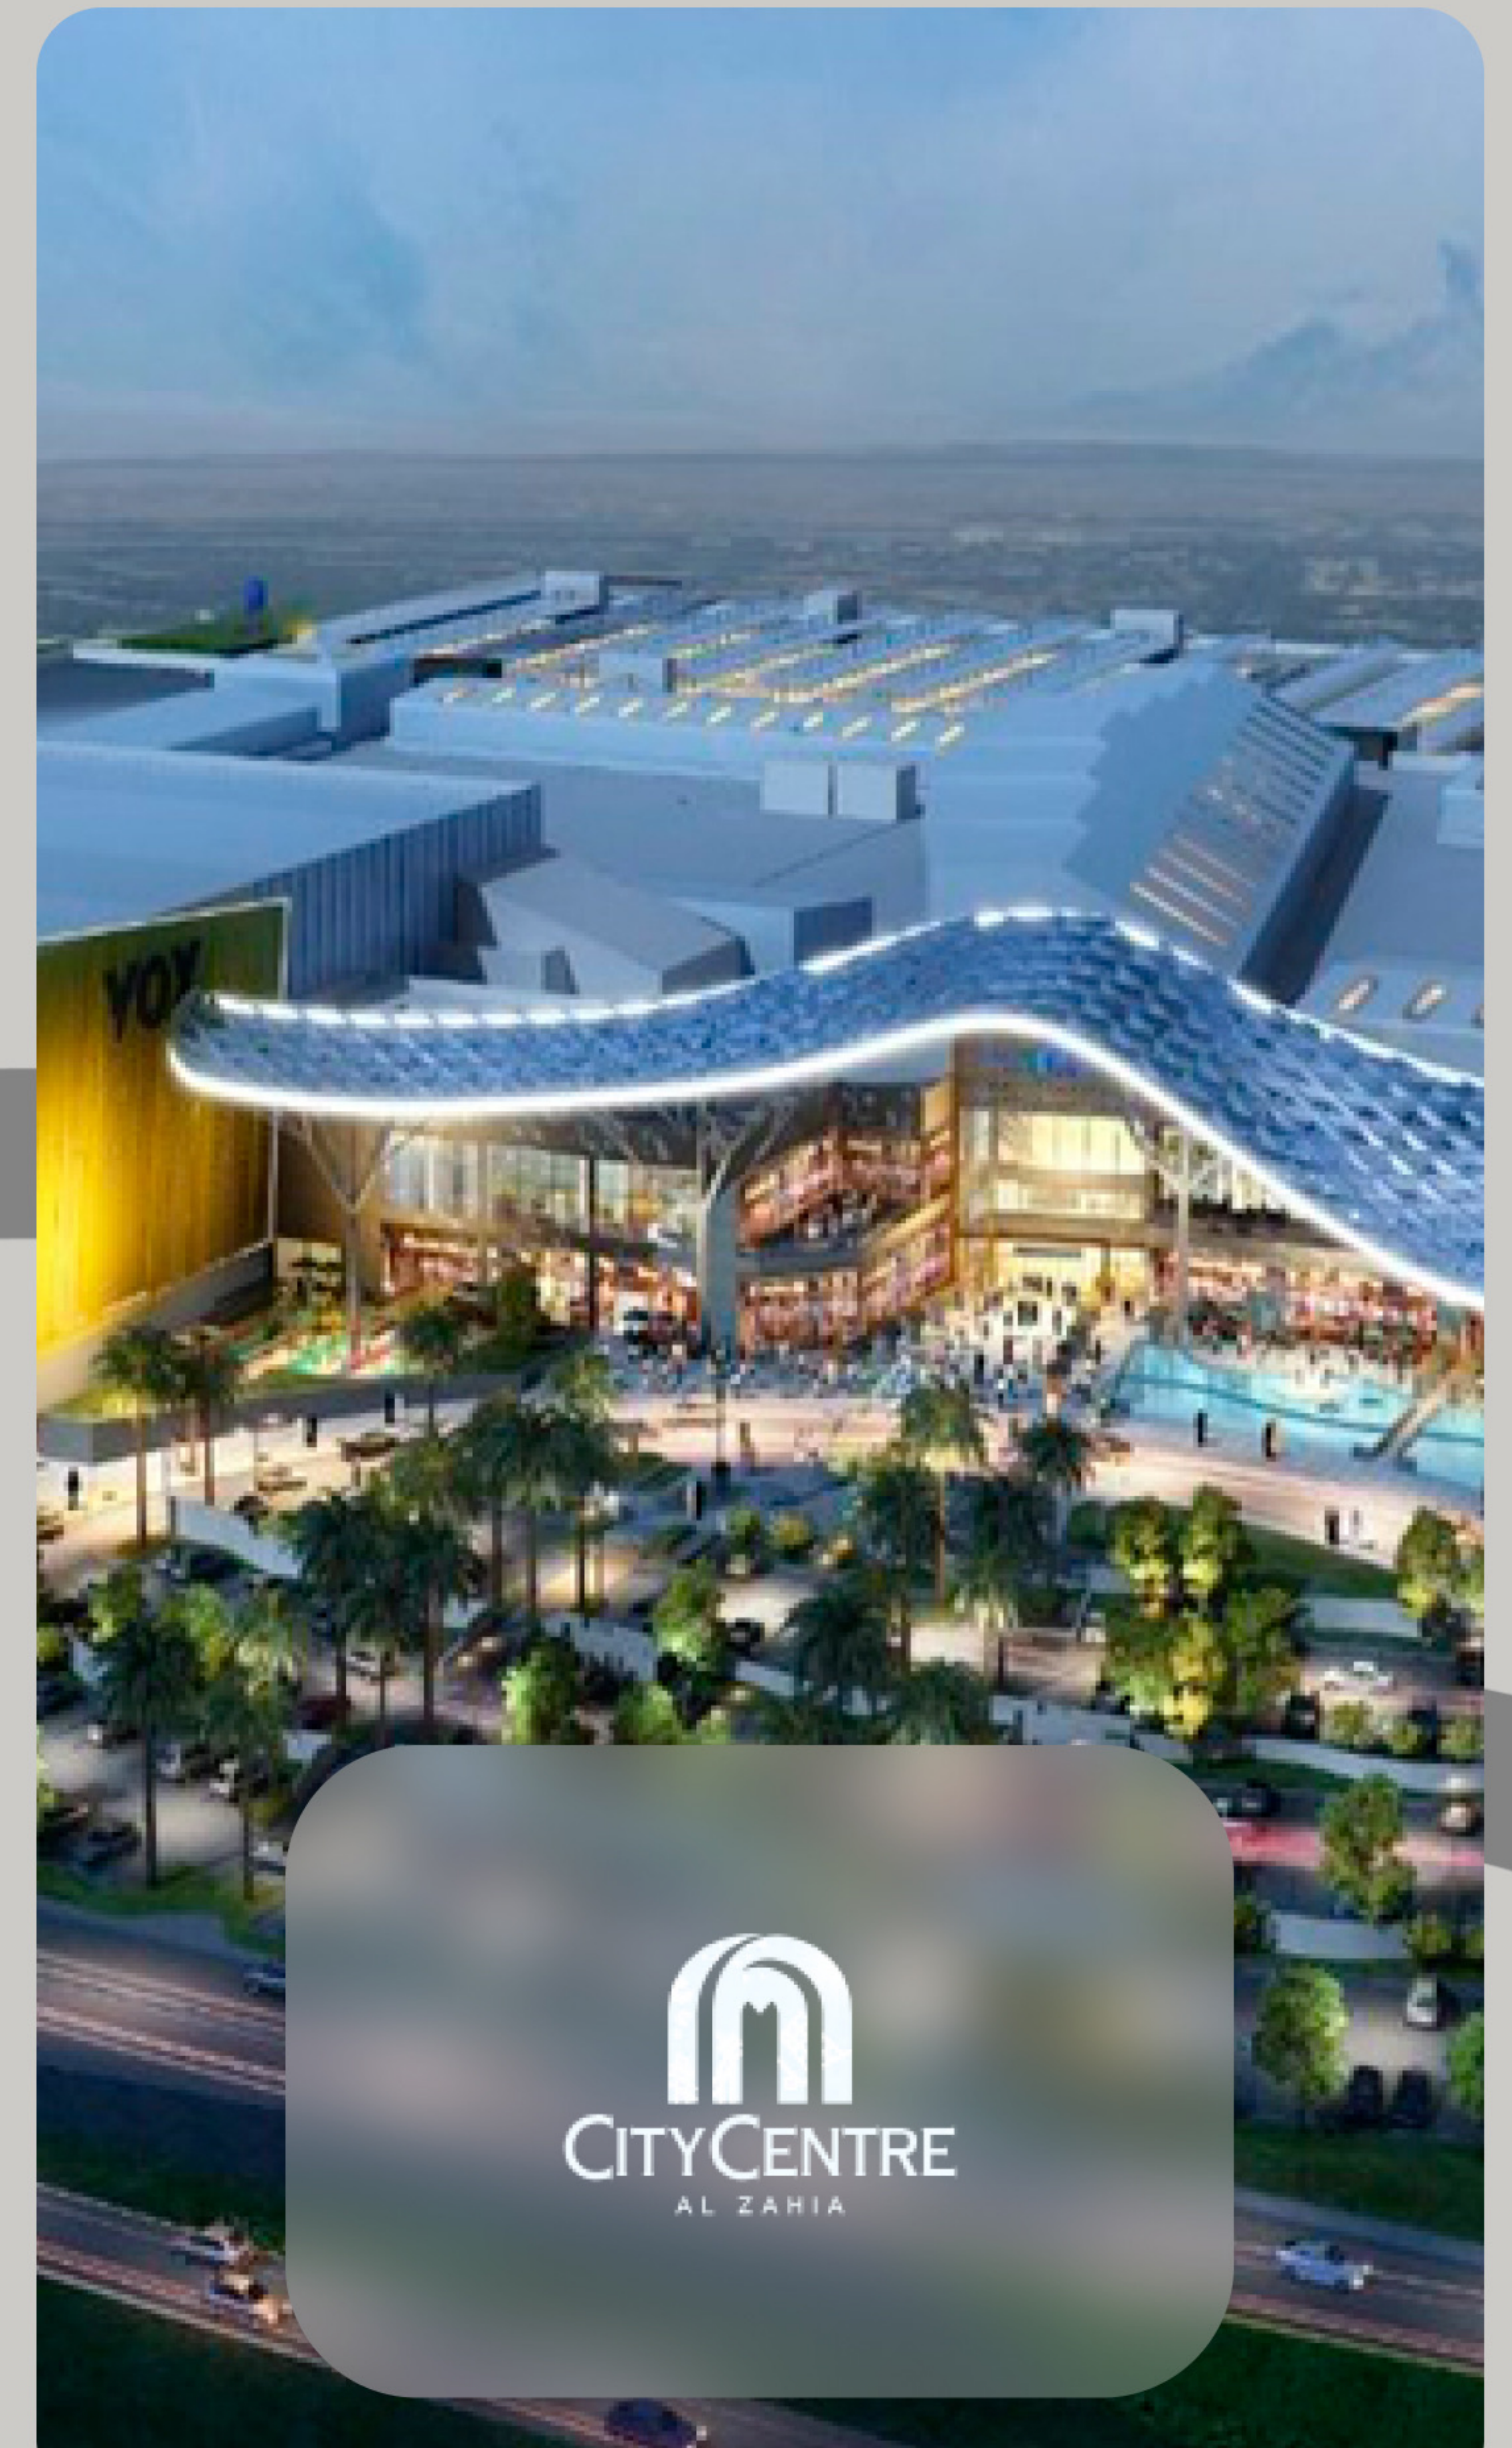

The photos captured by karatzas embody a muted tonal palette and effectively convey the vast expanse of uncovered space and the light, horizontal elements of the architecture, AlHamy did the complete work from Steel Structure to the stainless steel cladding.

Alzahia City Center

AlHamy was assigned to complete a 2400lm of glass balustrade with wooden rail top in city centre al zahia's, we have introduced a separated system design to allow other trades progressing their work without being affected by the glass installation where it is advisable to be fixed at final stages.

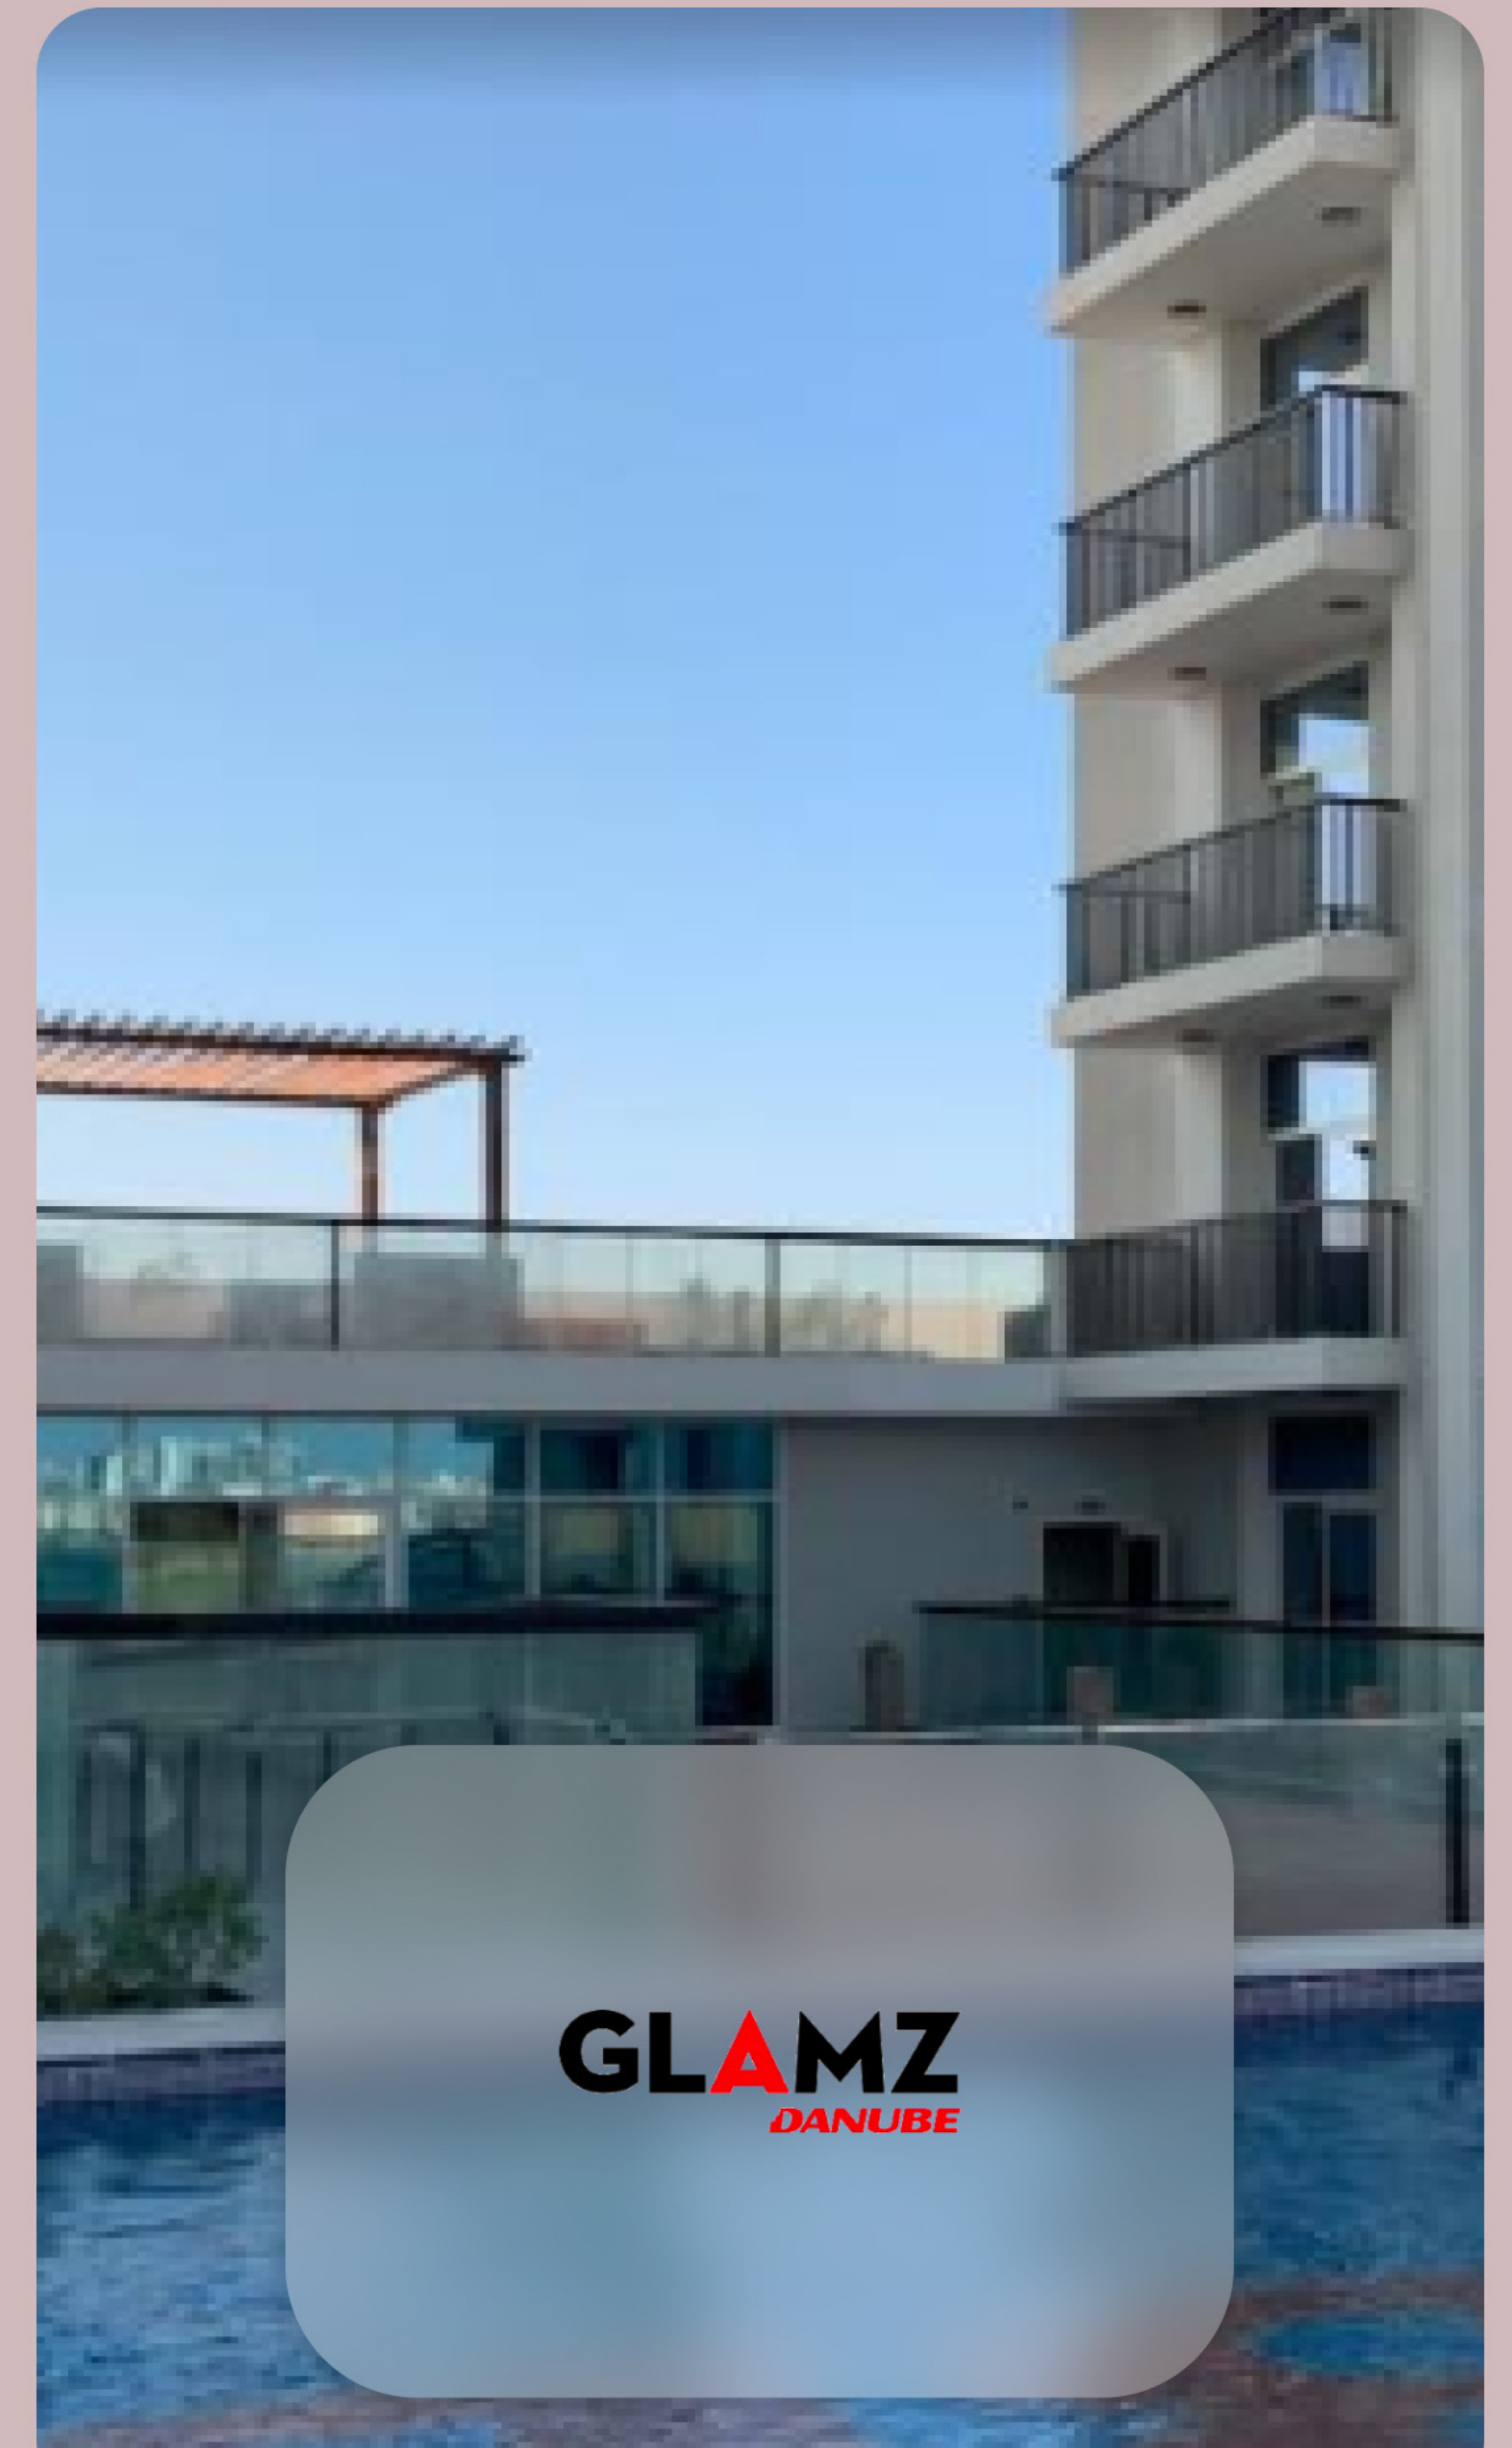

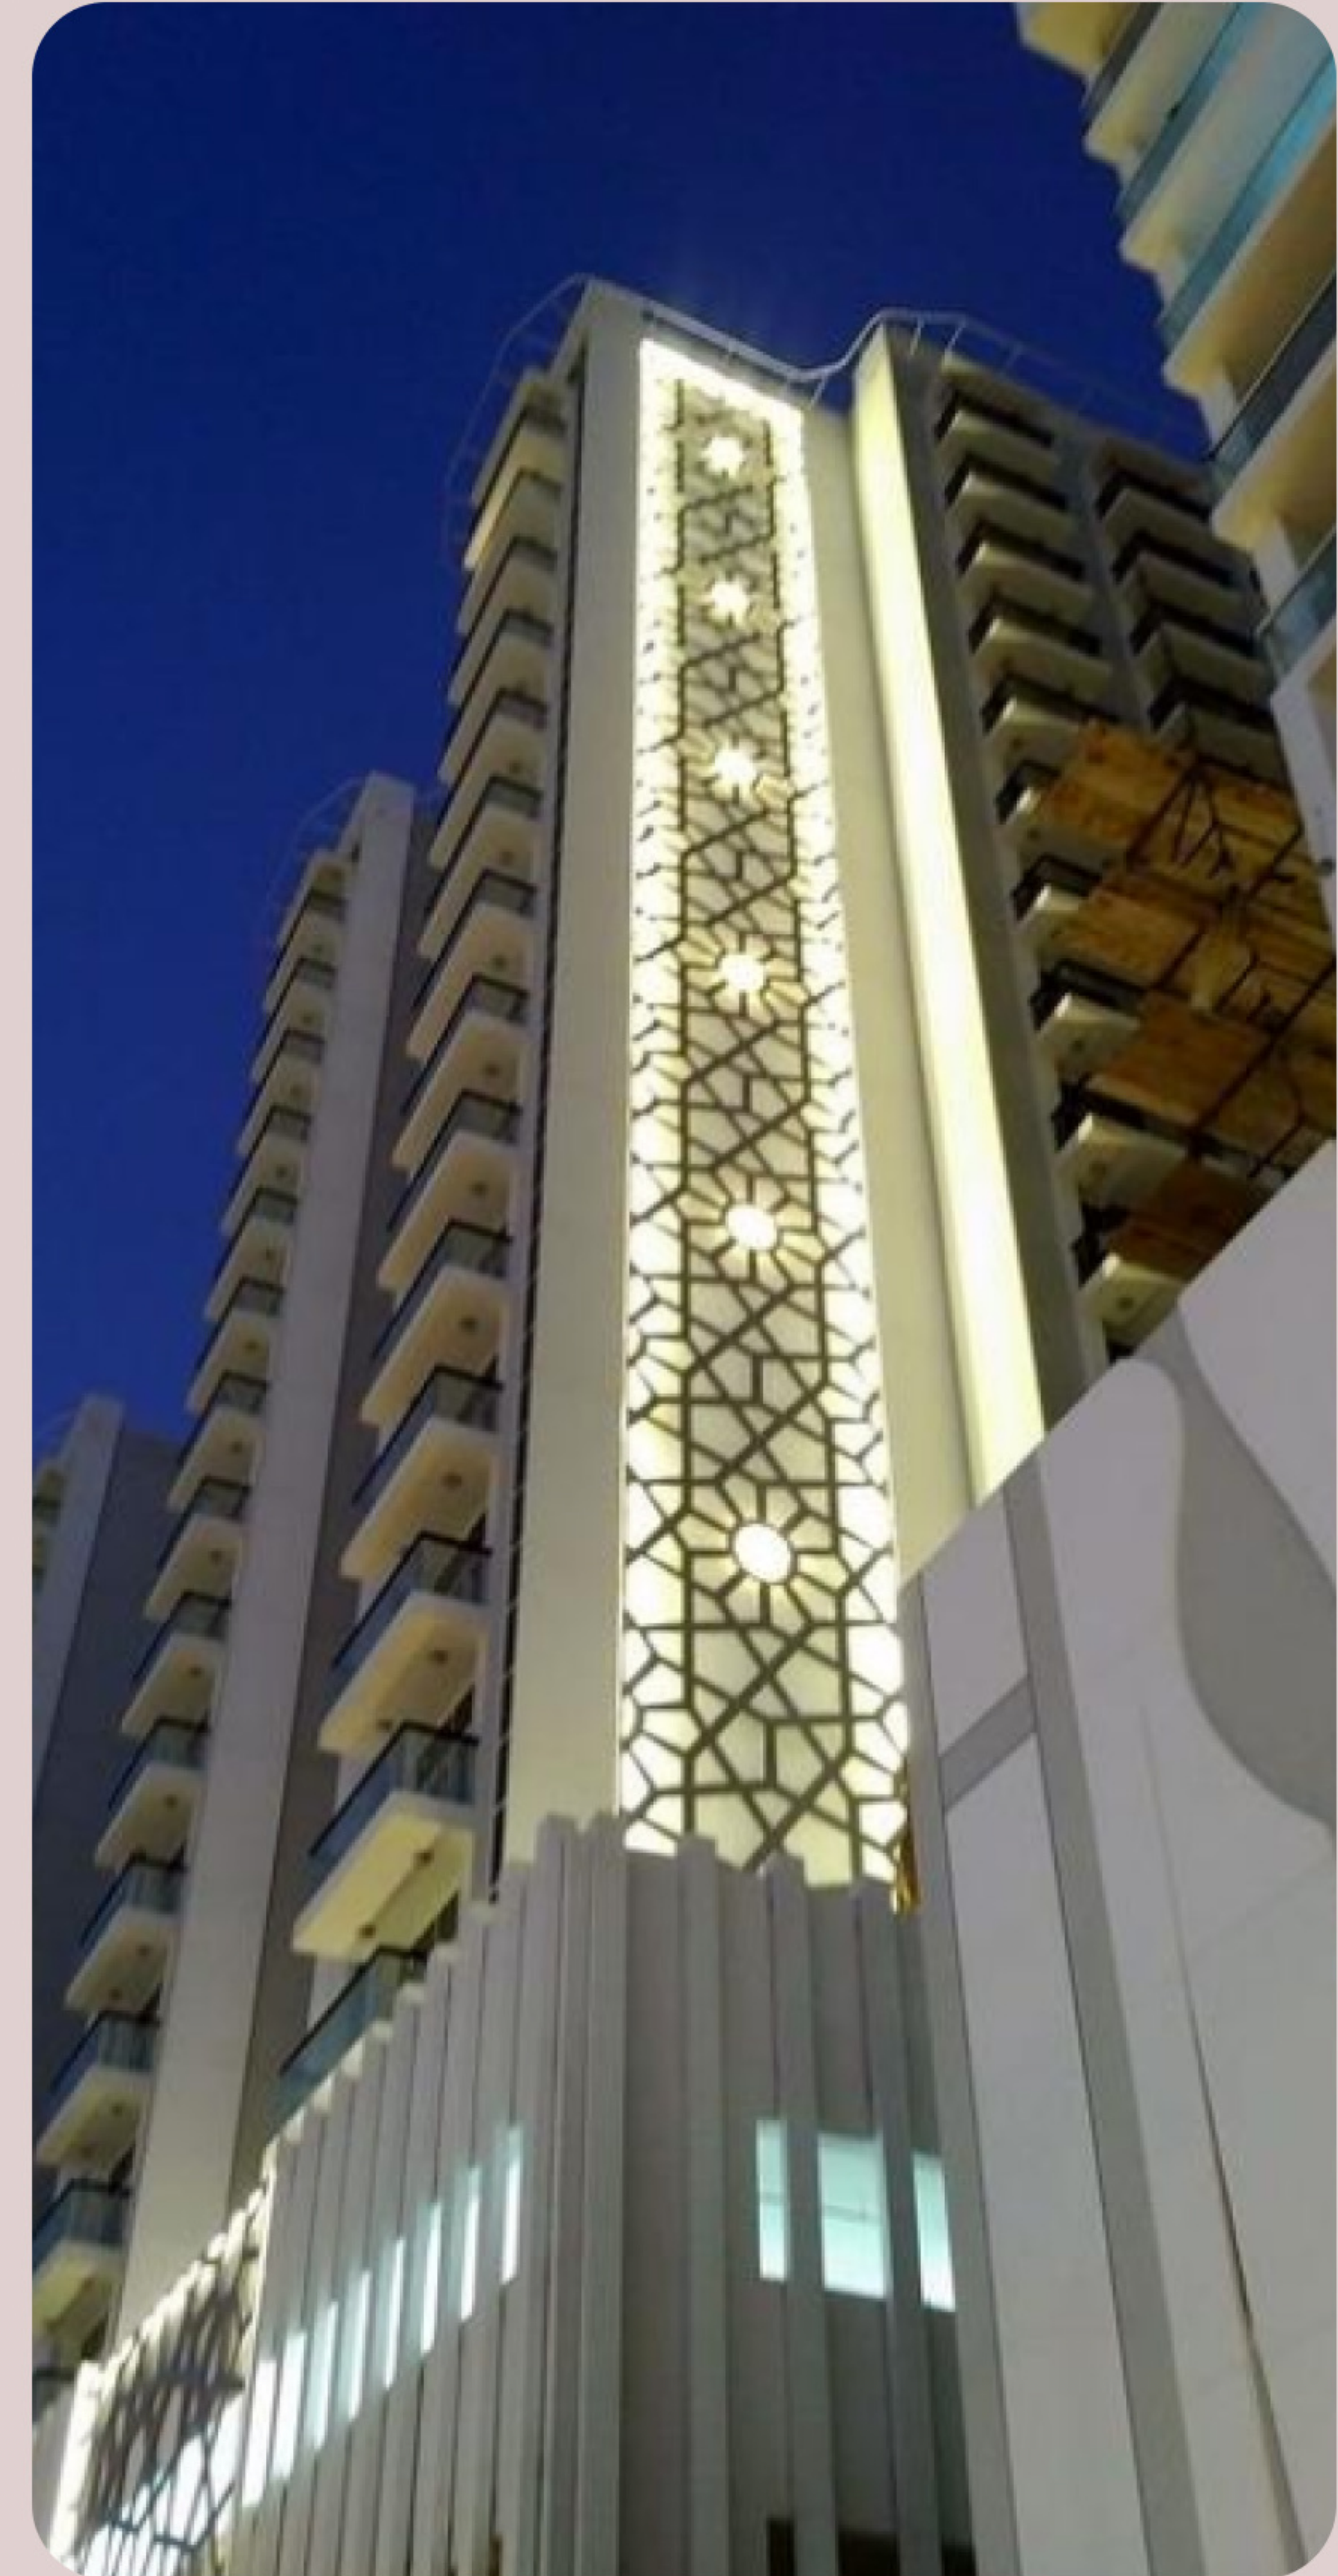

Starz & Glamz By Danube

AlHamy was Assigned to completed 4 towers with the following works:

- Full Elevation Aluminum Cladding work with hidden night lights.
- All Balconies Balustrades works more than 8000lm.
- Aluminum Mashrabiya 4000m2.
- Aluminium Slats 4000lm.
- Anodized Aluminium Balustrades 3000lm.

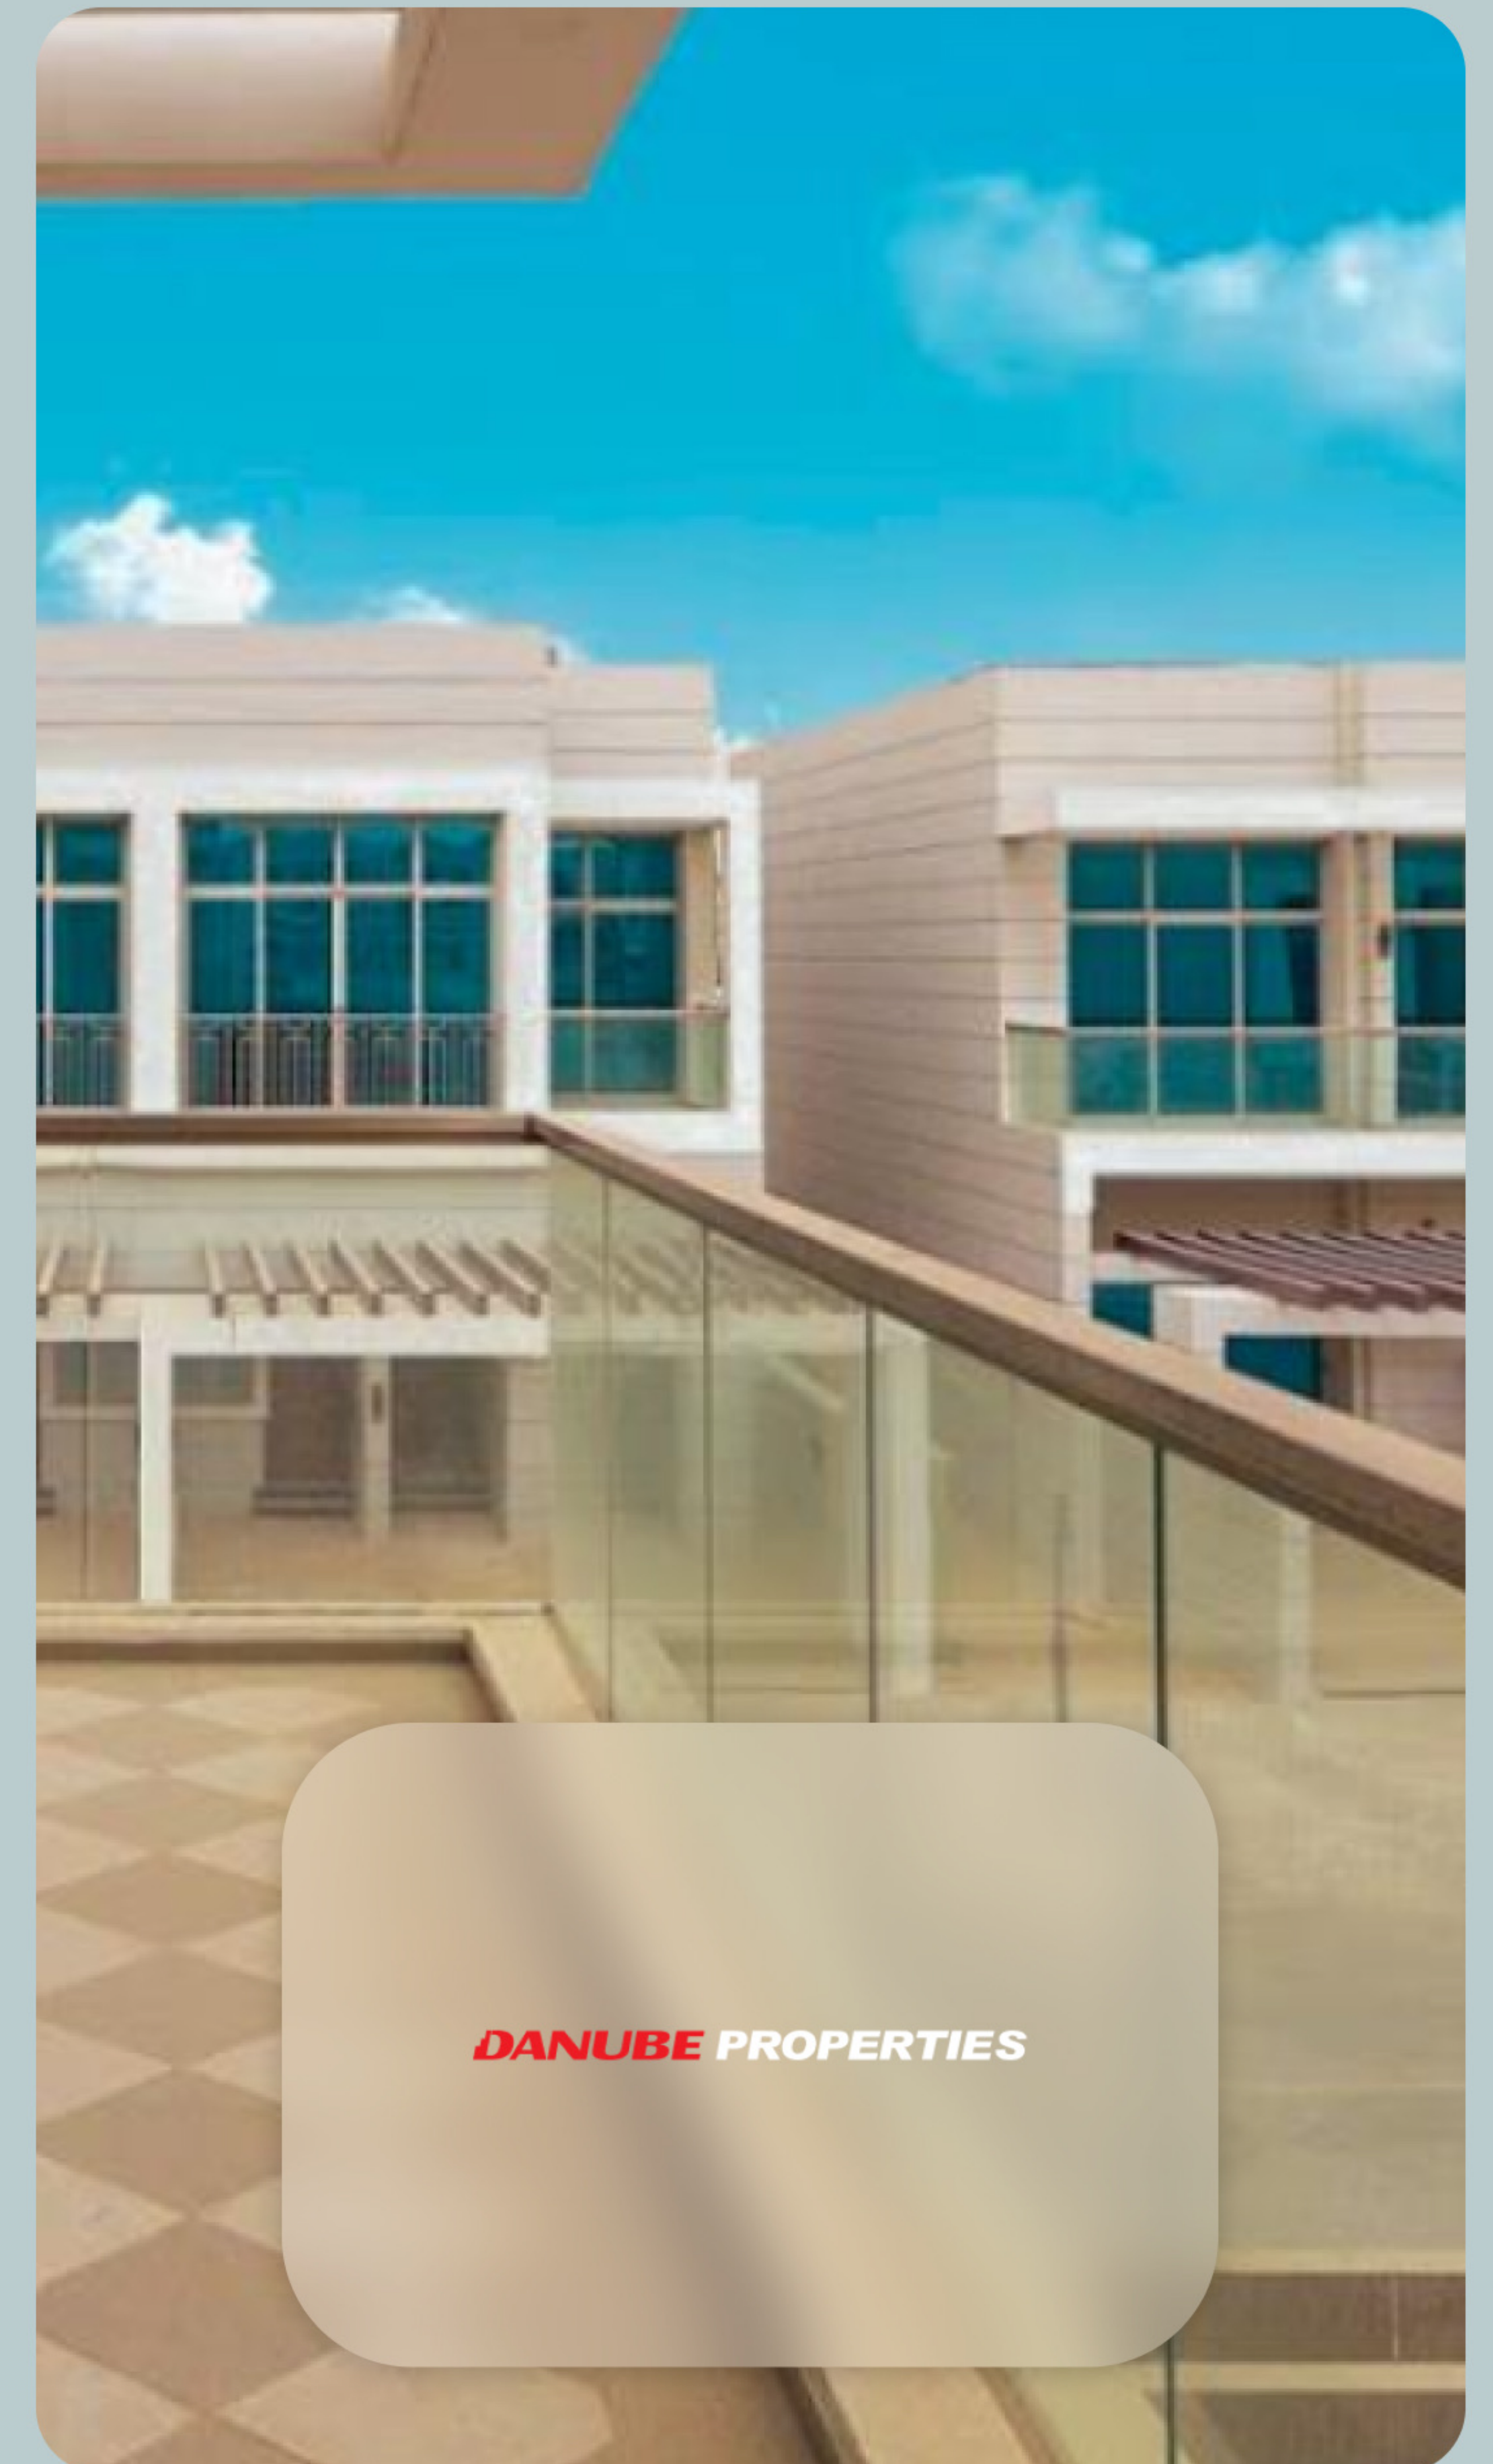

Dreamz Villas

AlHamy did all the stainless steel, glass balustrades and Aluminum cast fences

- We Have completed the work for 171 Villas with Unec.
- Stainless steel Handrail 2000lm.
- S.S Glass Balustrades 2000lm.
- Cast Aluminum Fence 1500lm.

Dubai South GA01, GA02 GA05

AlHamy worked with Pivot as subcontractor for the balustrades and metal works in residential Villas

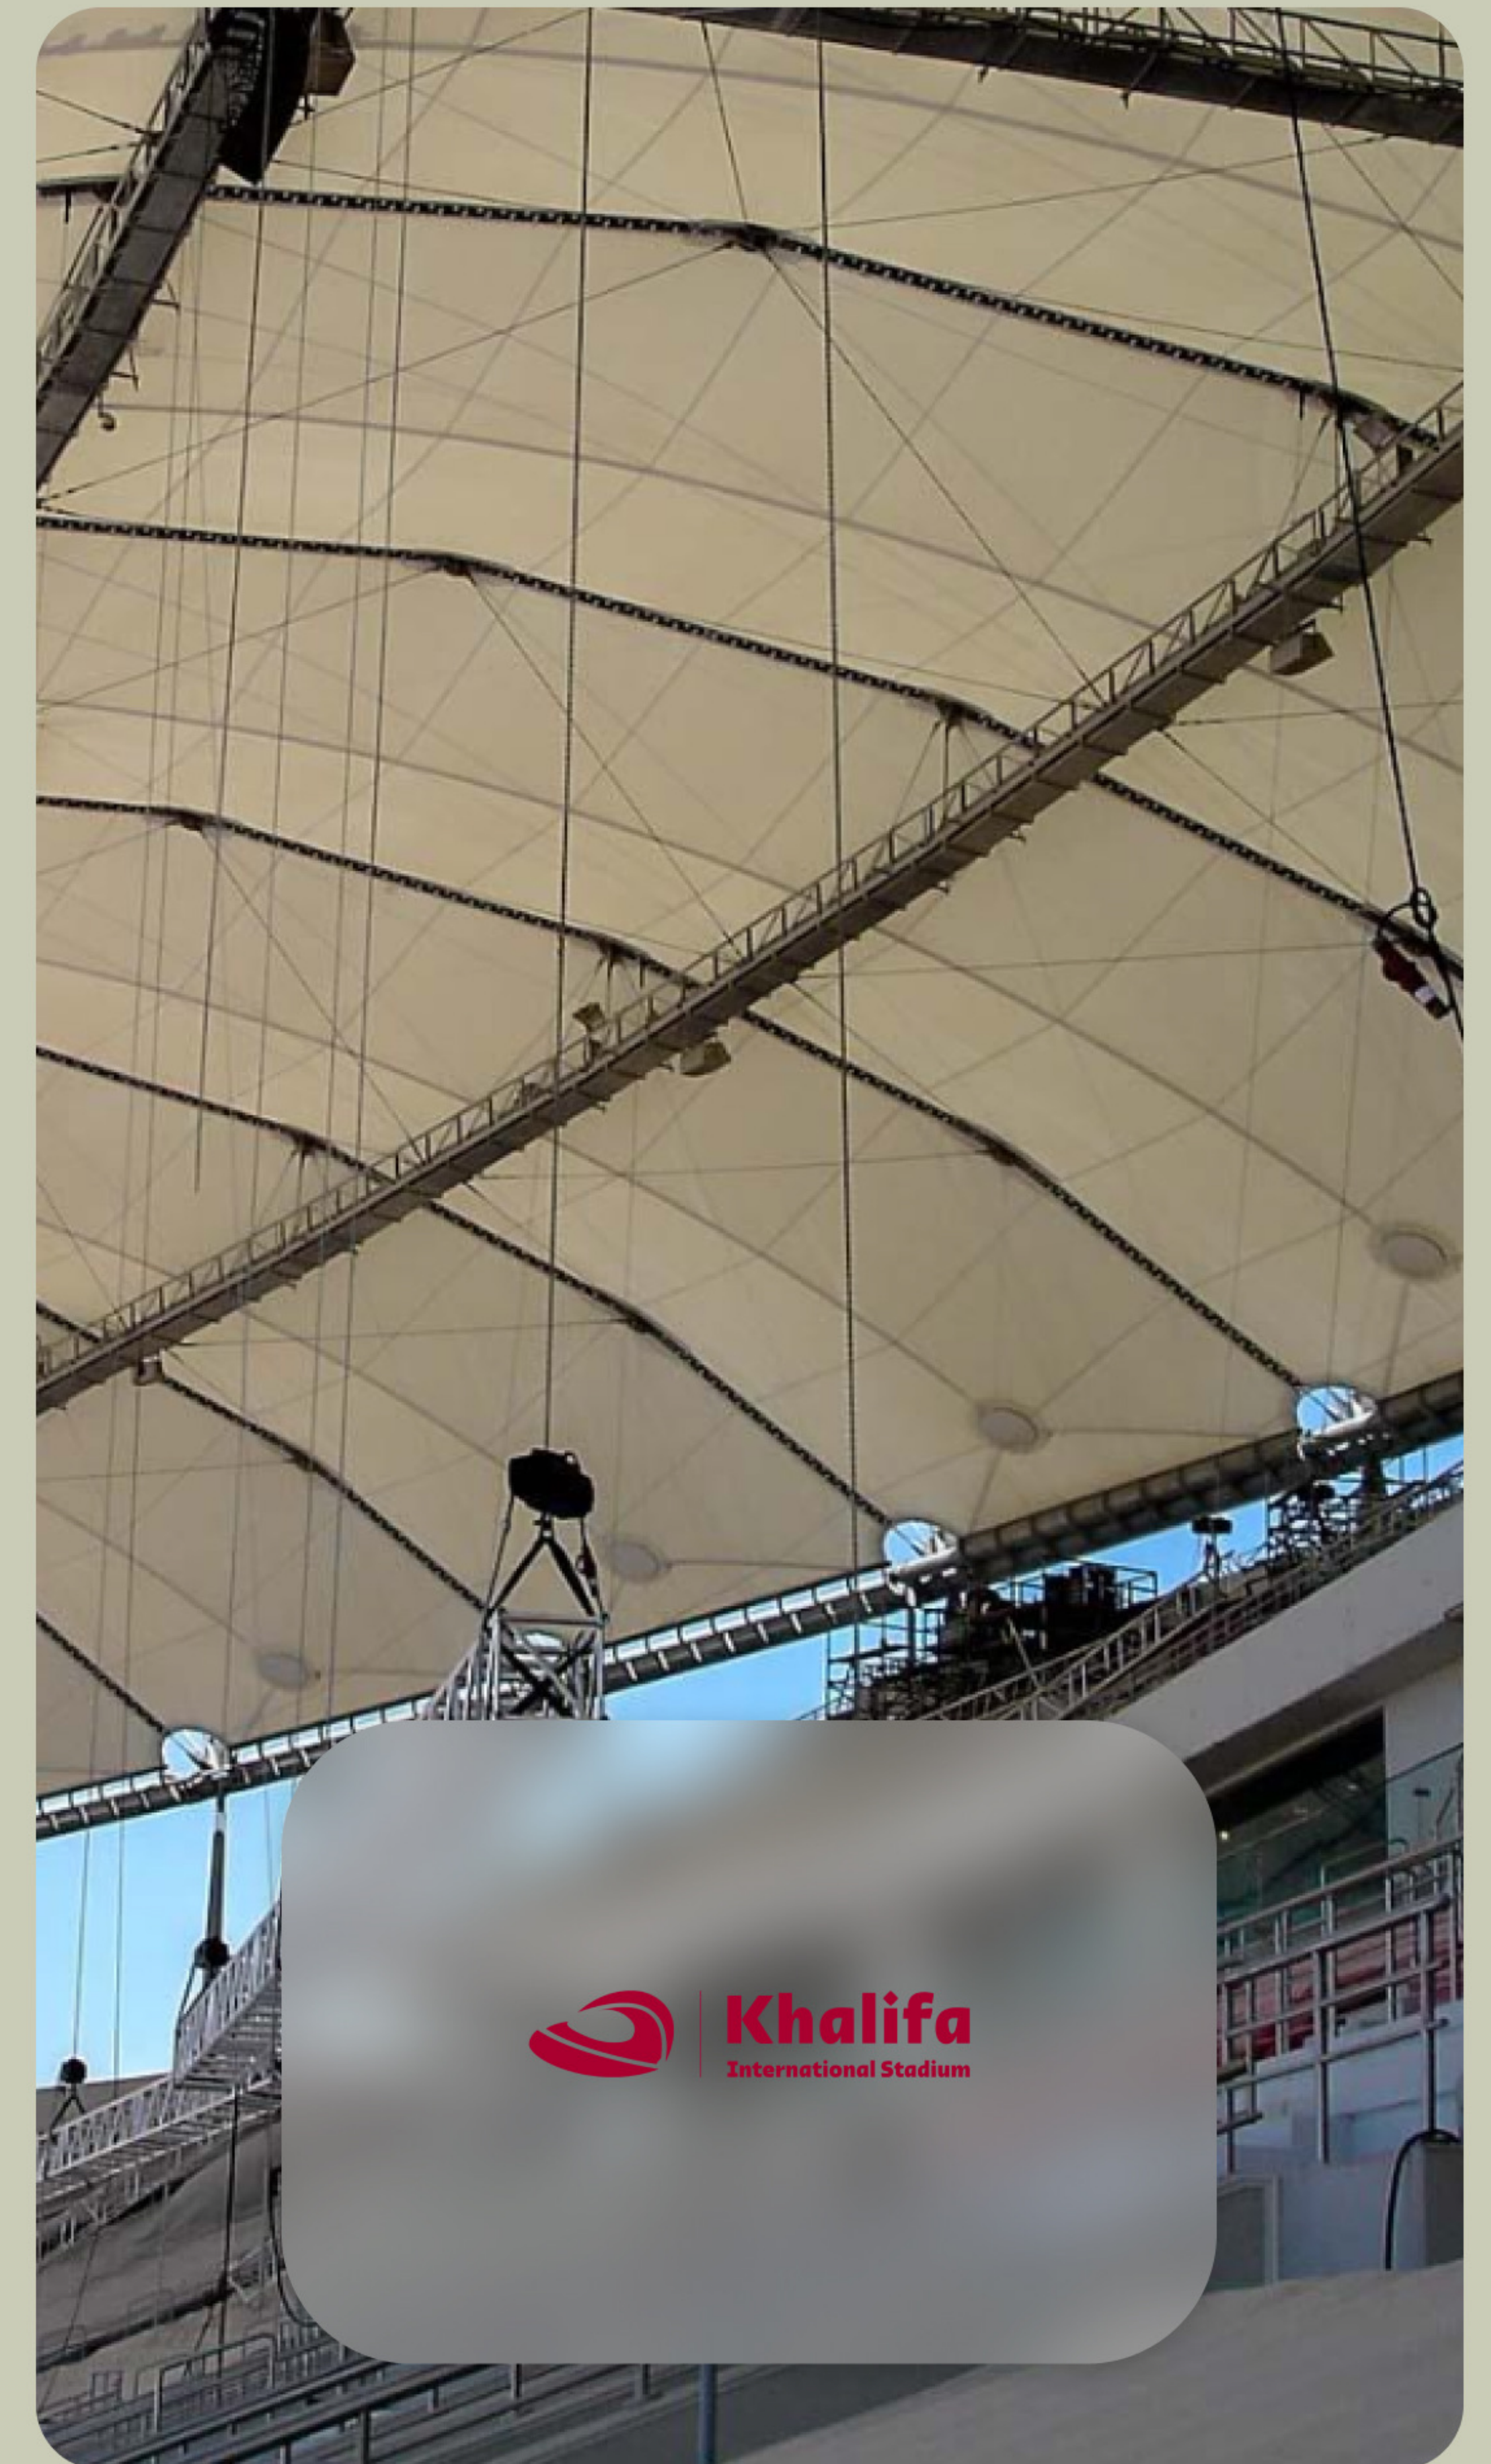

- We Have completed the work for Villas with Pivot
- Steel Handrail 2500lm.
- S.S Glass Balustrades 3500lm.
- Cast Aluminum Fence 2500lm.

Khalifeh Stadium

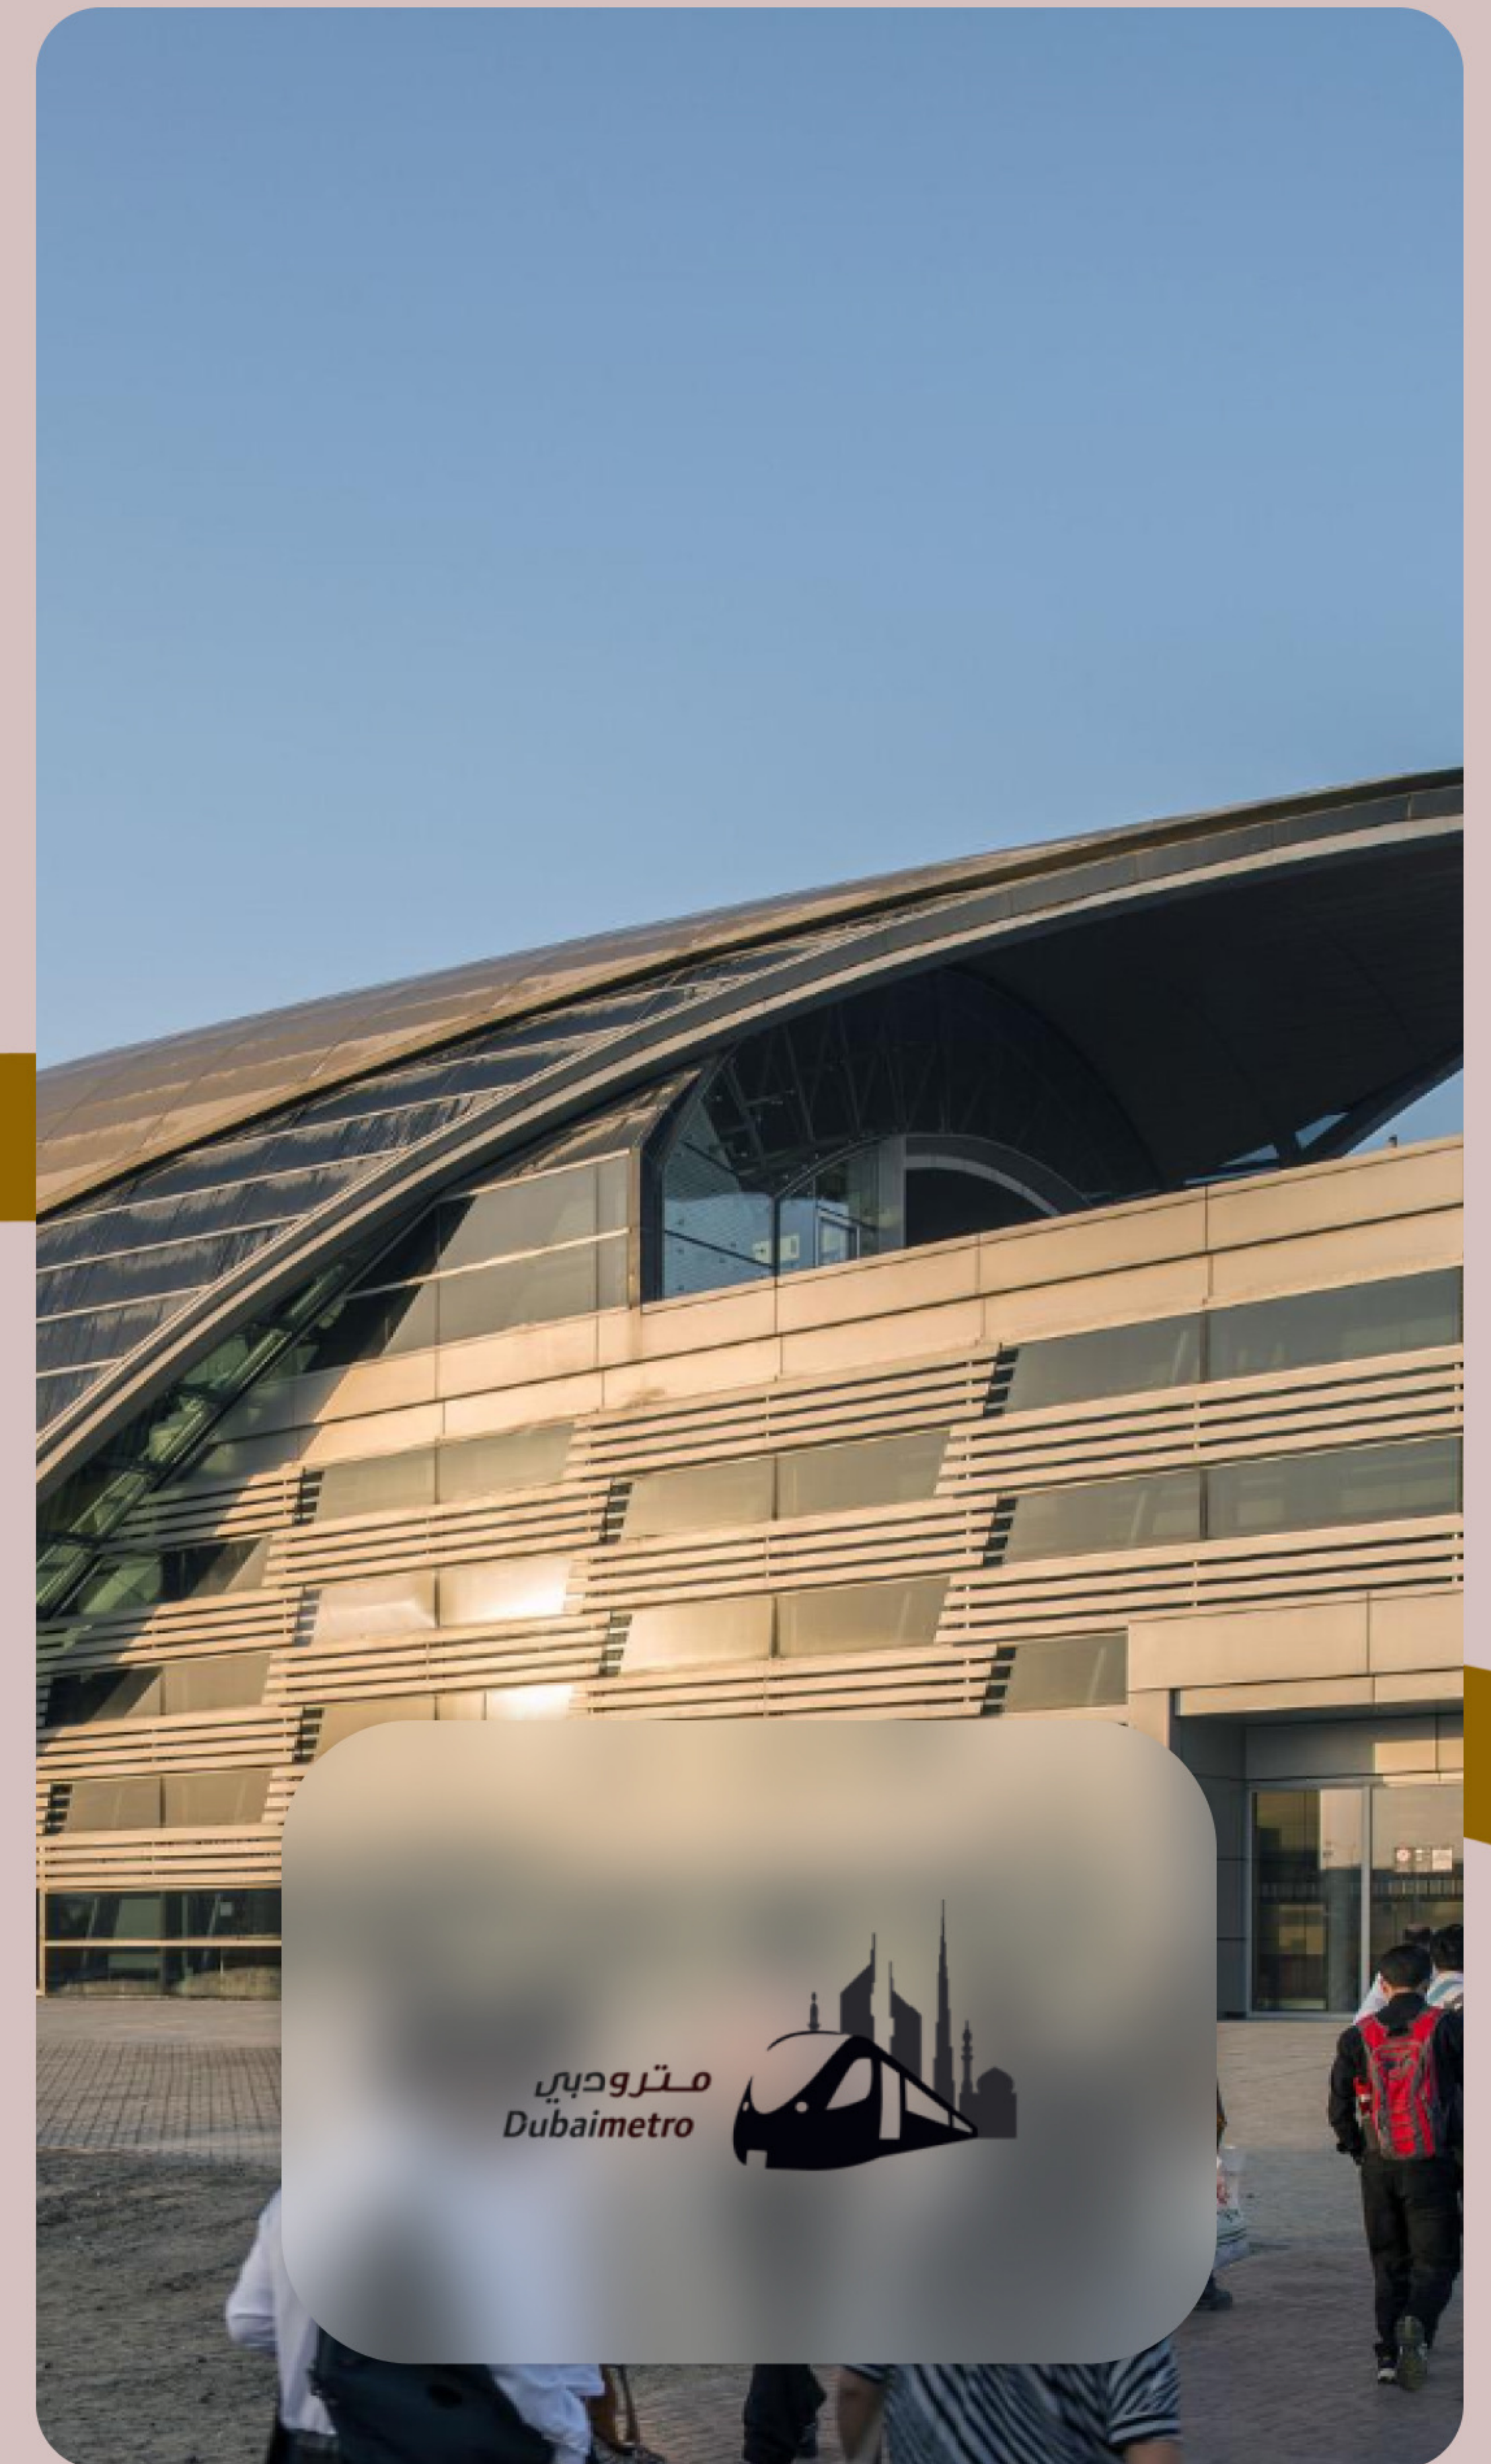

AlHamy did the steel works for all stair cases including the Balustrades , work was under the Main Contractor Besix and deisgned by Keo-Kuwait.

Ibn Battuta Metro

All Metal works including Handrails, Top stainless steel shades and Stainless steel cladding.

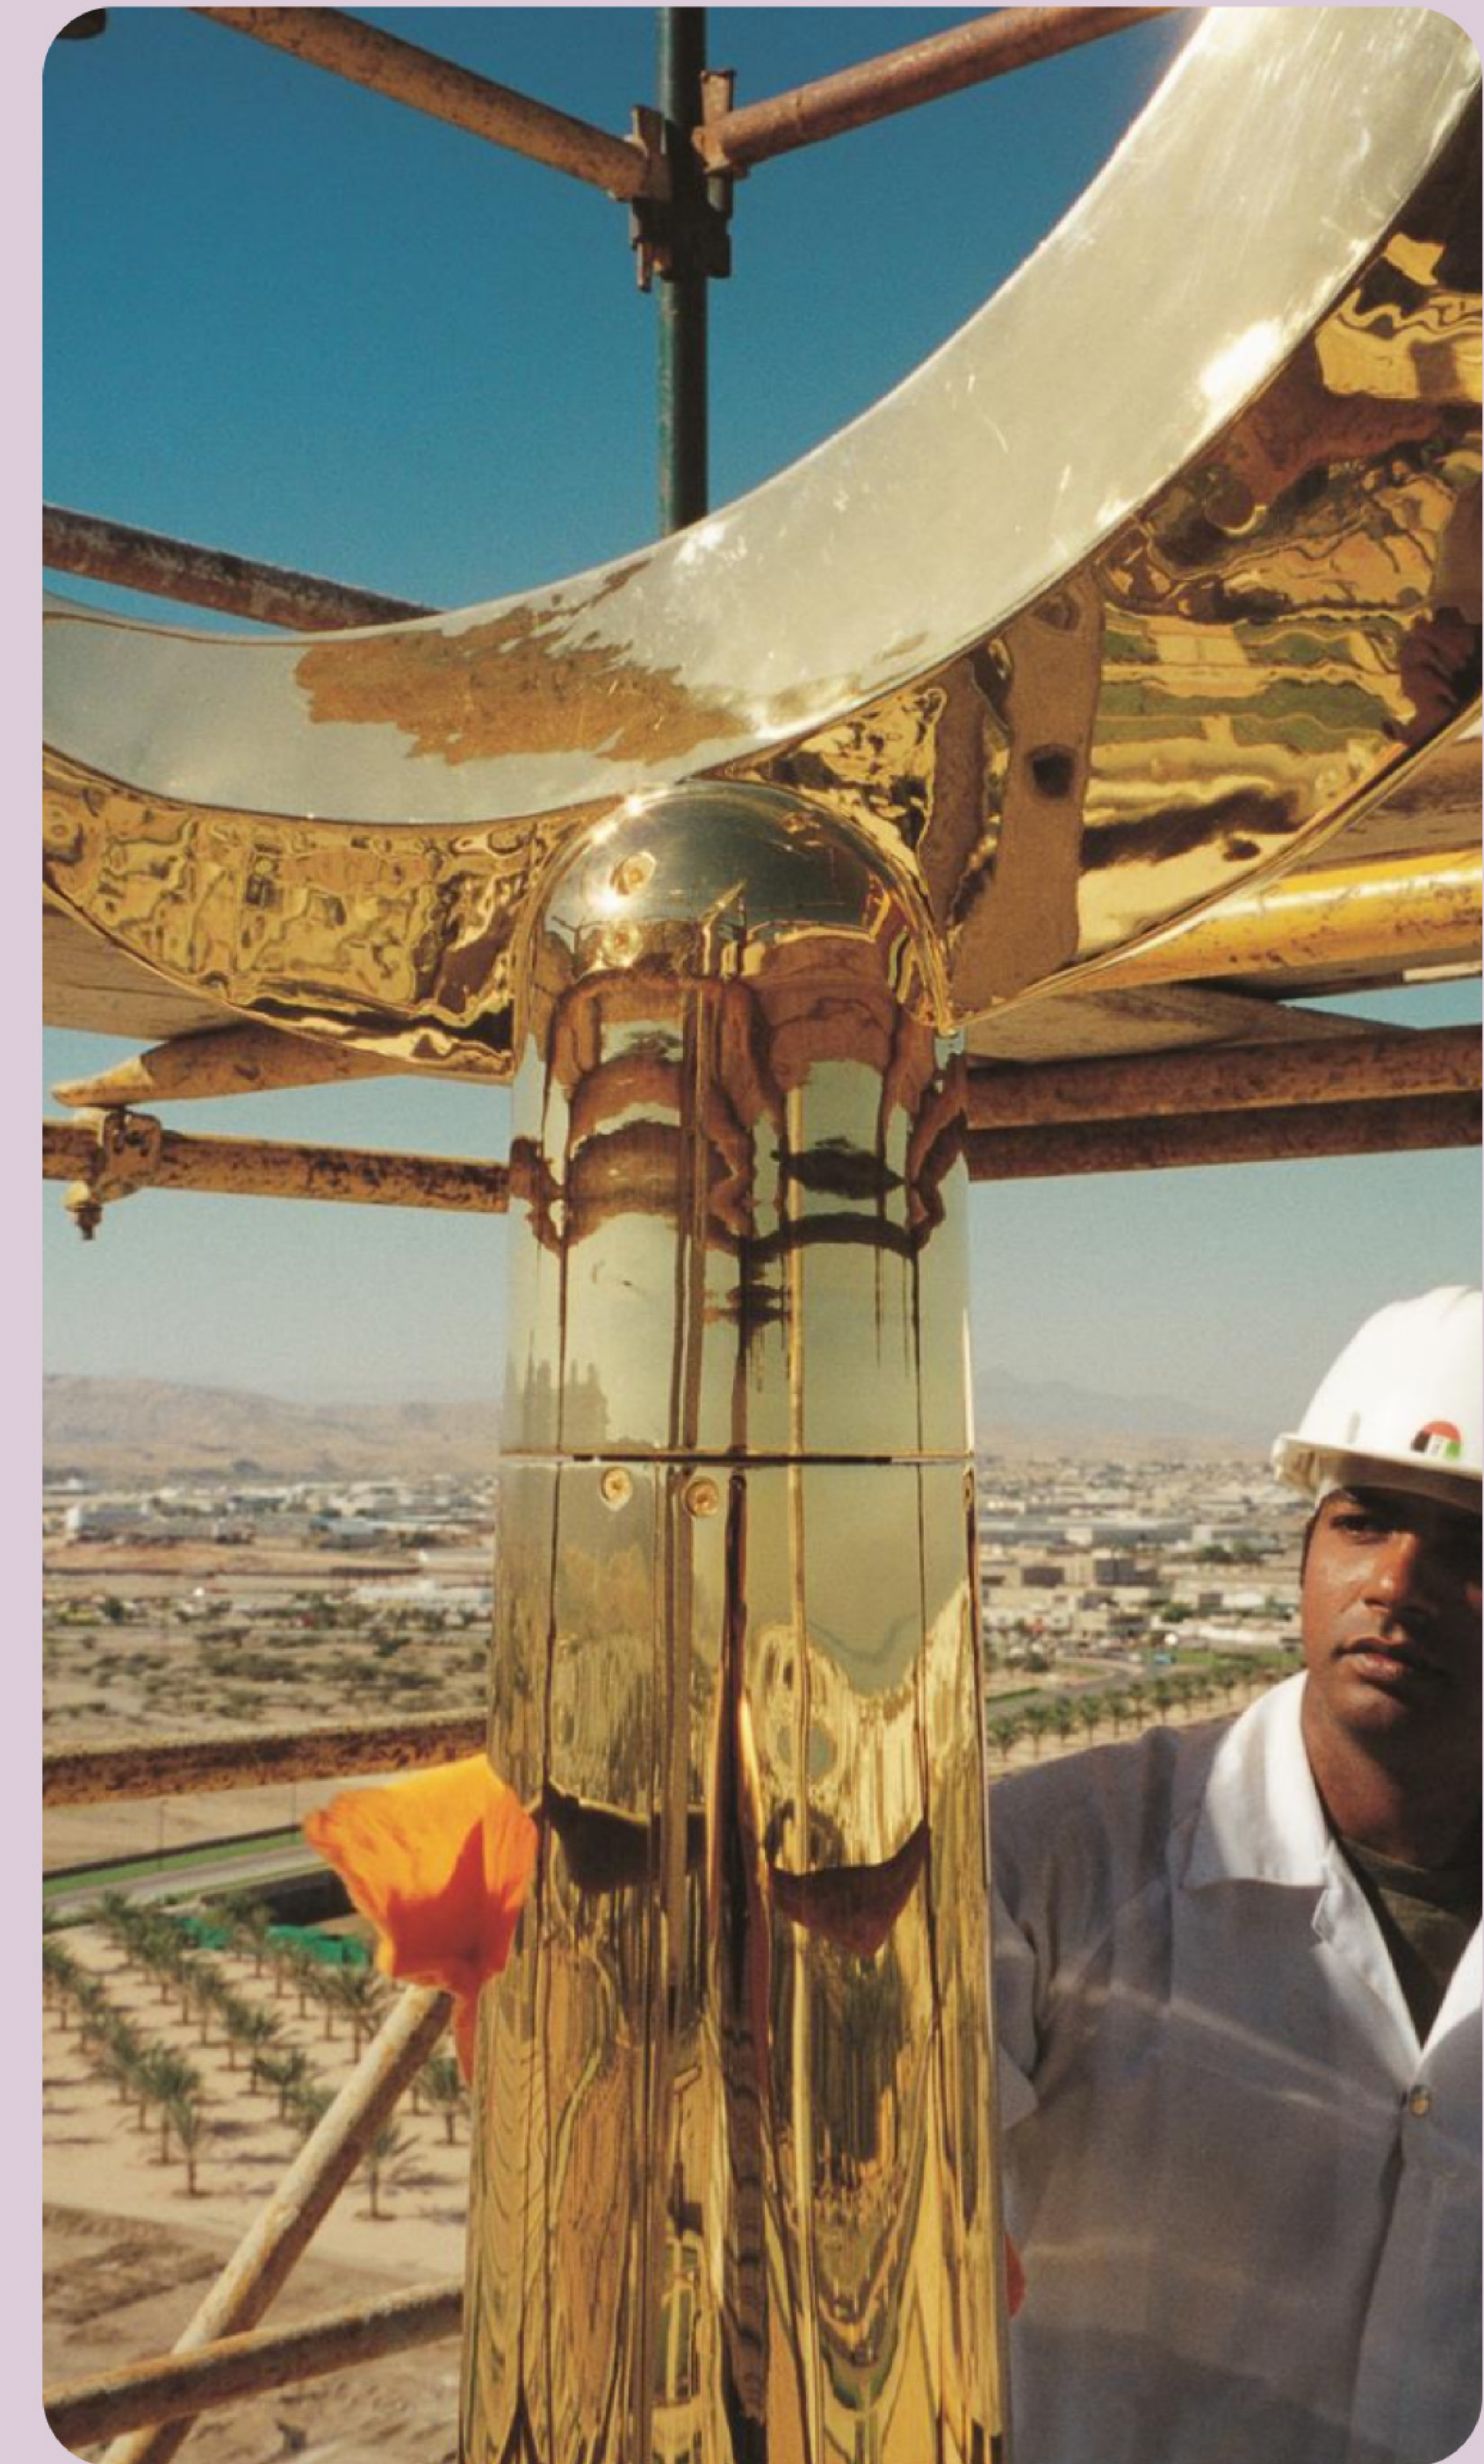

Sultan Qaboos Mosque Oman

All Metal works including Handrails, Top stainless steel shades and Stainless steel cladding.

Sultan Qaboos Grand Mosque | جامع السلطان قابوس الأكبر

Resortz By Dannube

AlHamy did all the balustrades artistic work for the internal and external landscape with special pergola design for the landscape.

Golf Place Villas Emaar

AlHamy is responsible for the following work for Emaar.

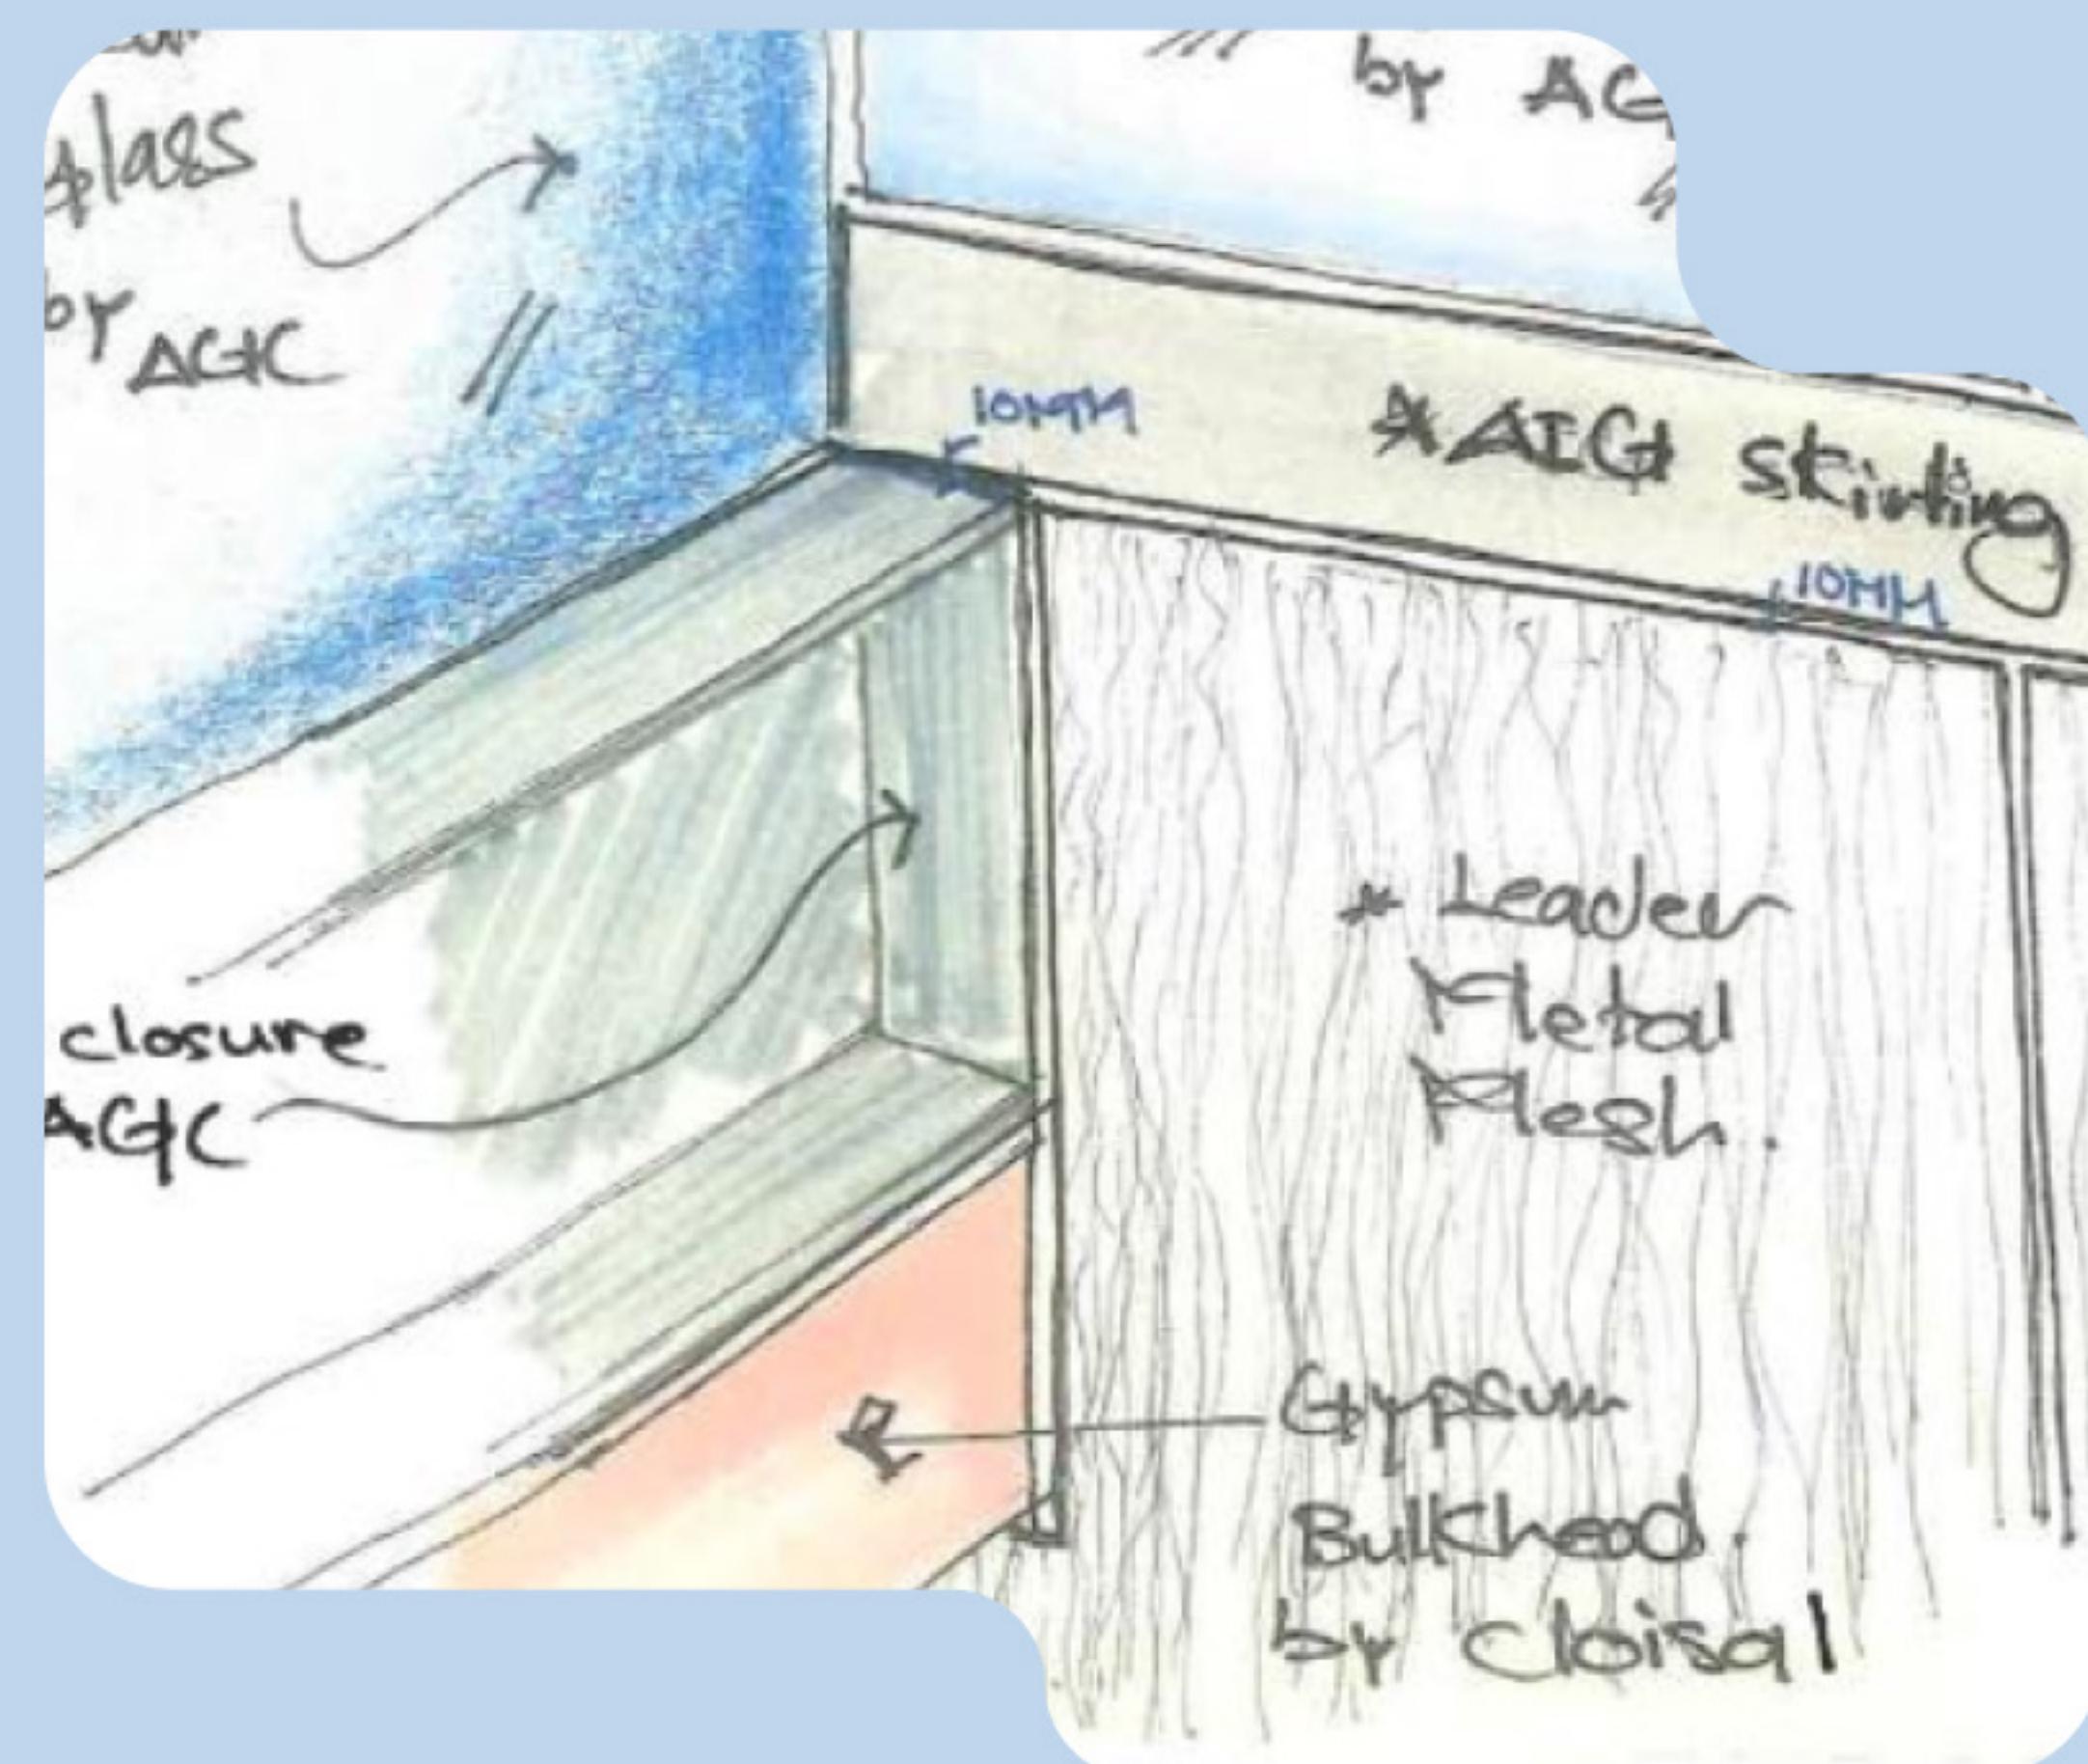

- All Balcony Glass Balustrades for 157 Villas.
- Stairs Glass Balustrades.
- The Design of the Main Lobby Relies.
- Roff Railing Work.
- Shower Glass.
- Water Tanks Covers.

Technical Solutions

We have the experience to solve all kinds of complicated details occurred while working on site and we design our products in a way to be isolated as possible as we can achieve to make the fast track site installation to our work with a proper coordination with other S/C's.

Design Solution

The best approach is to achieve the design goal while being cost-effective.

Time Management

Assuring details will not affect the work on site and enable a fast track installation process.

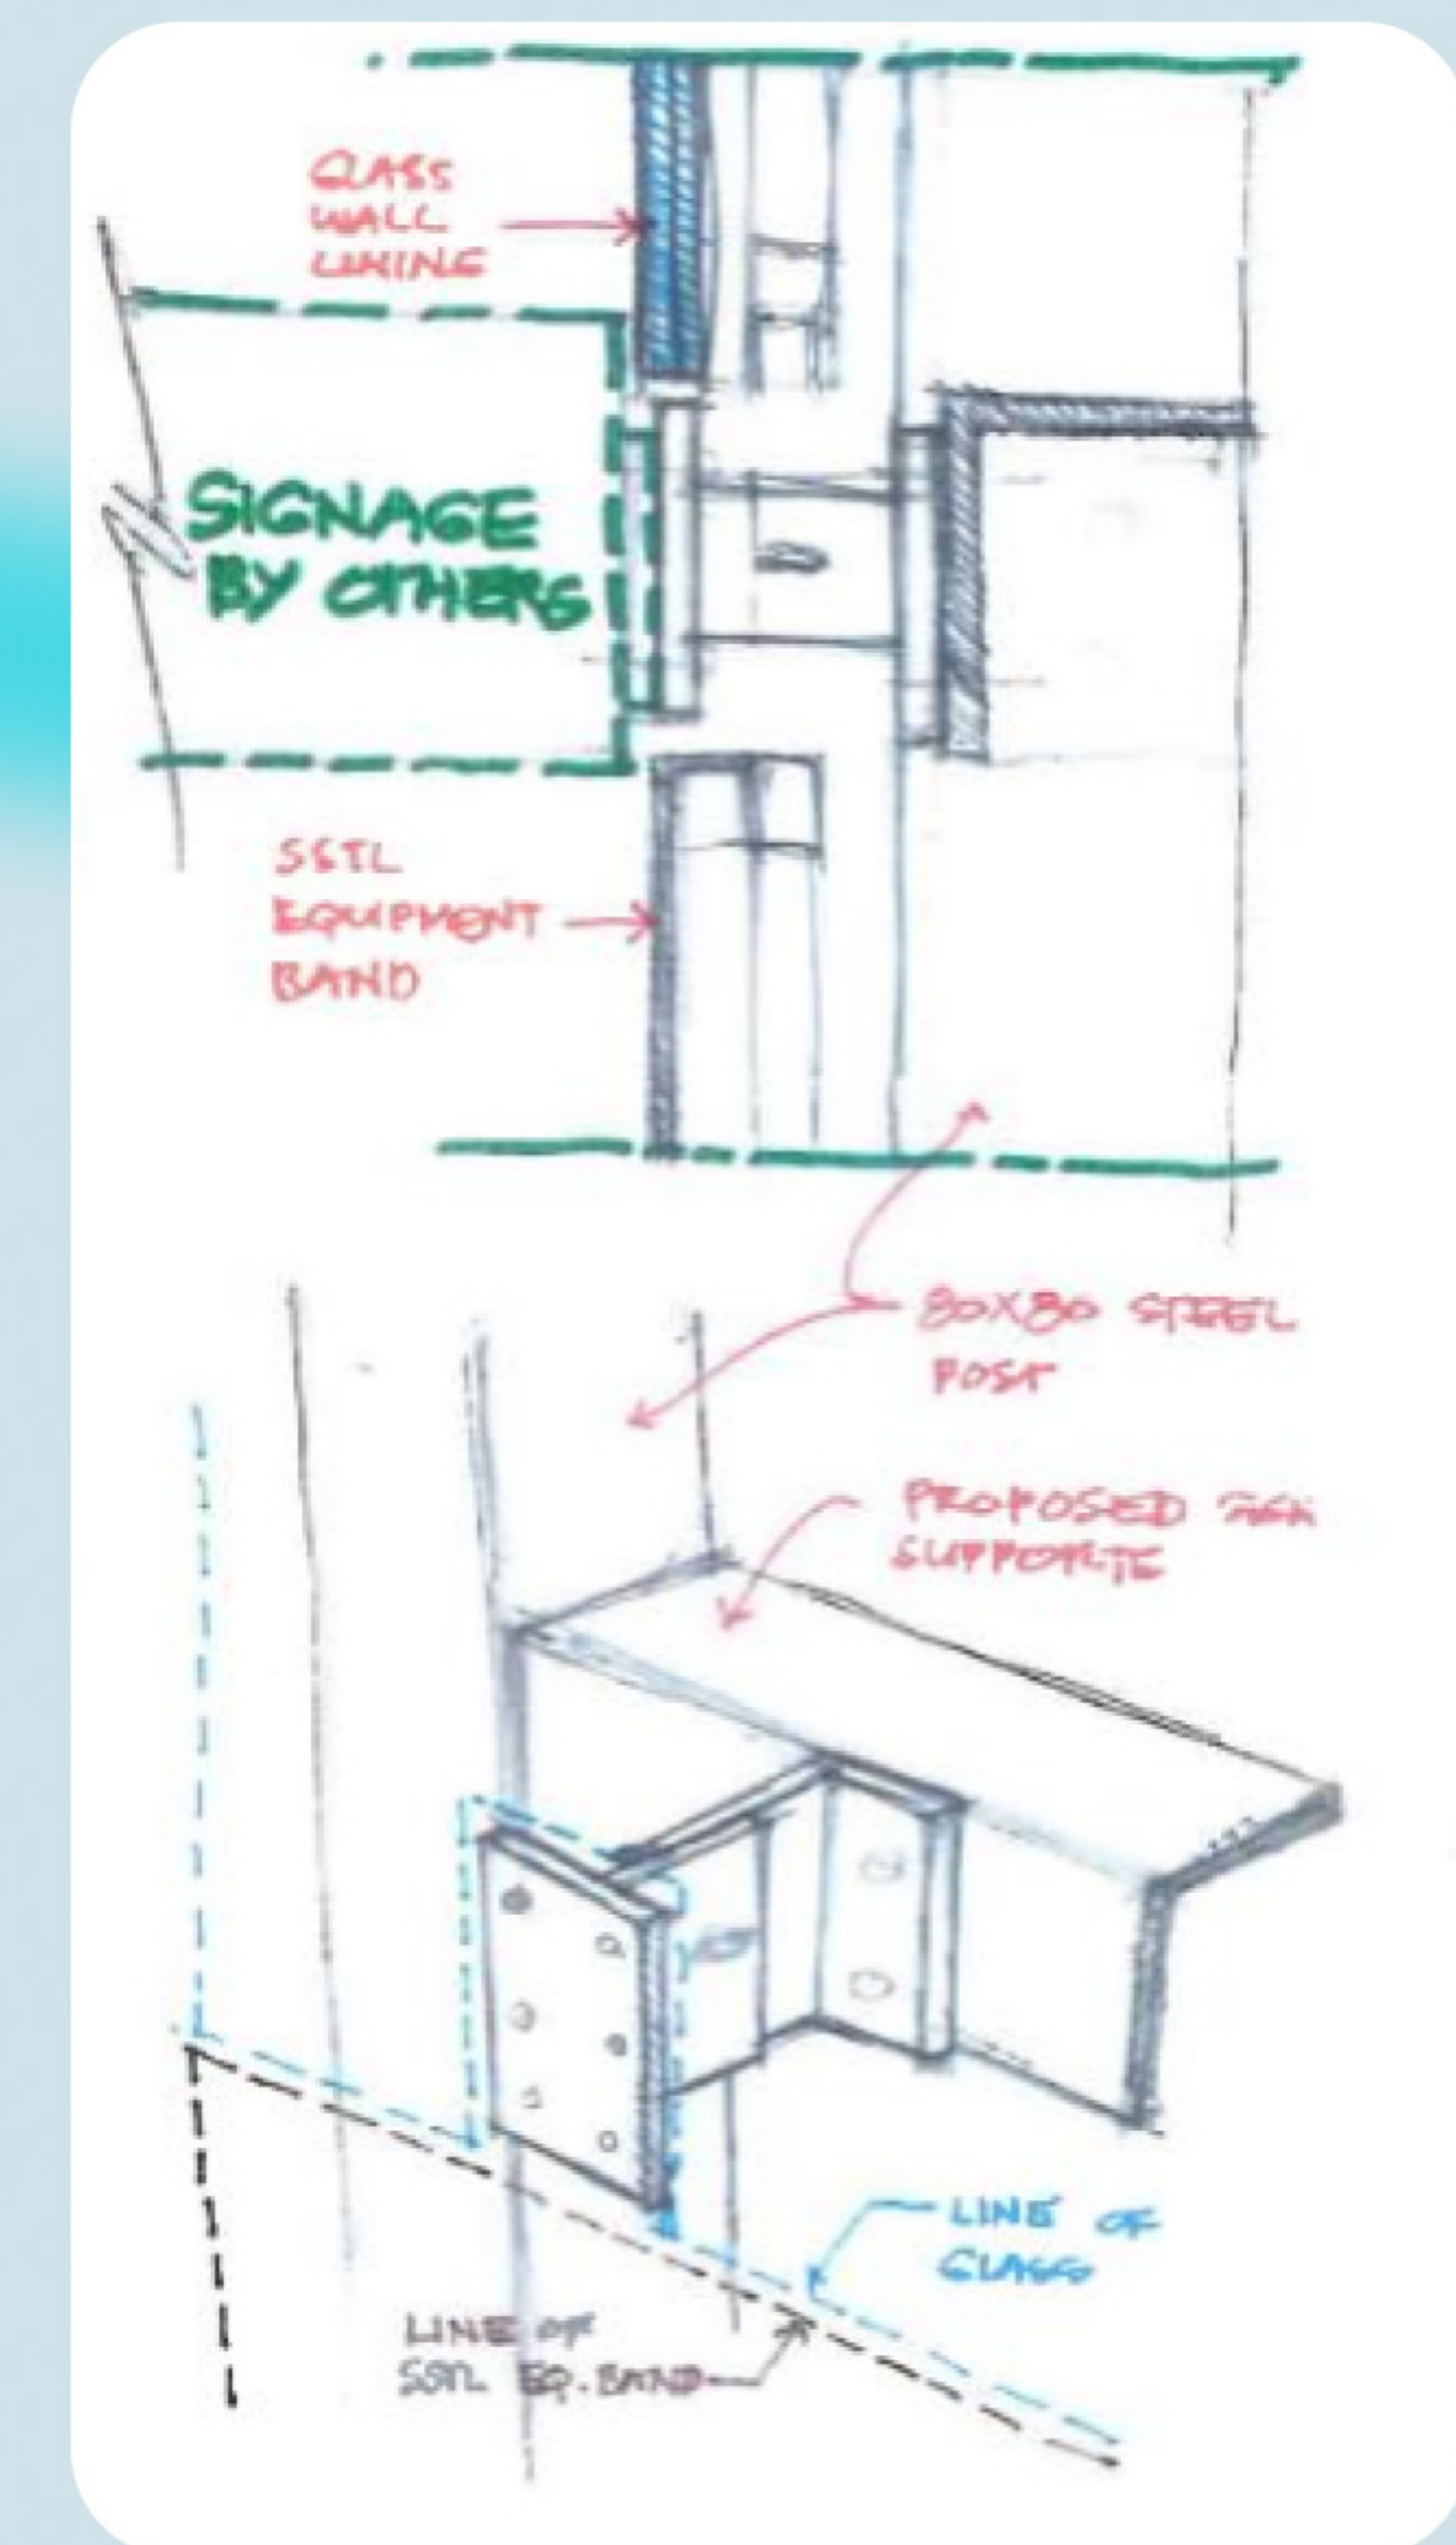

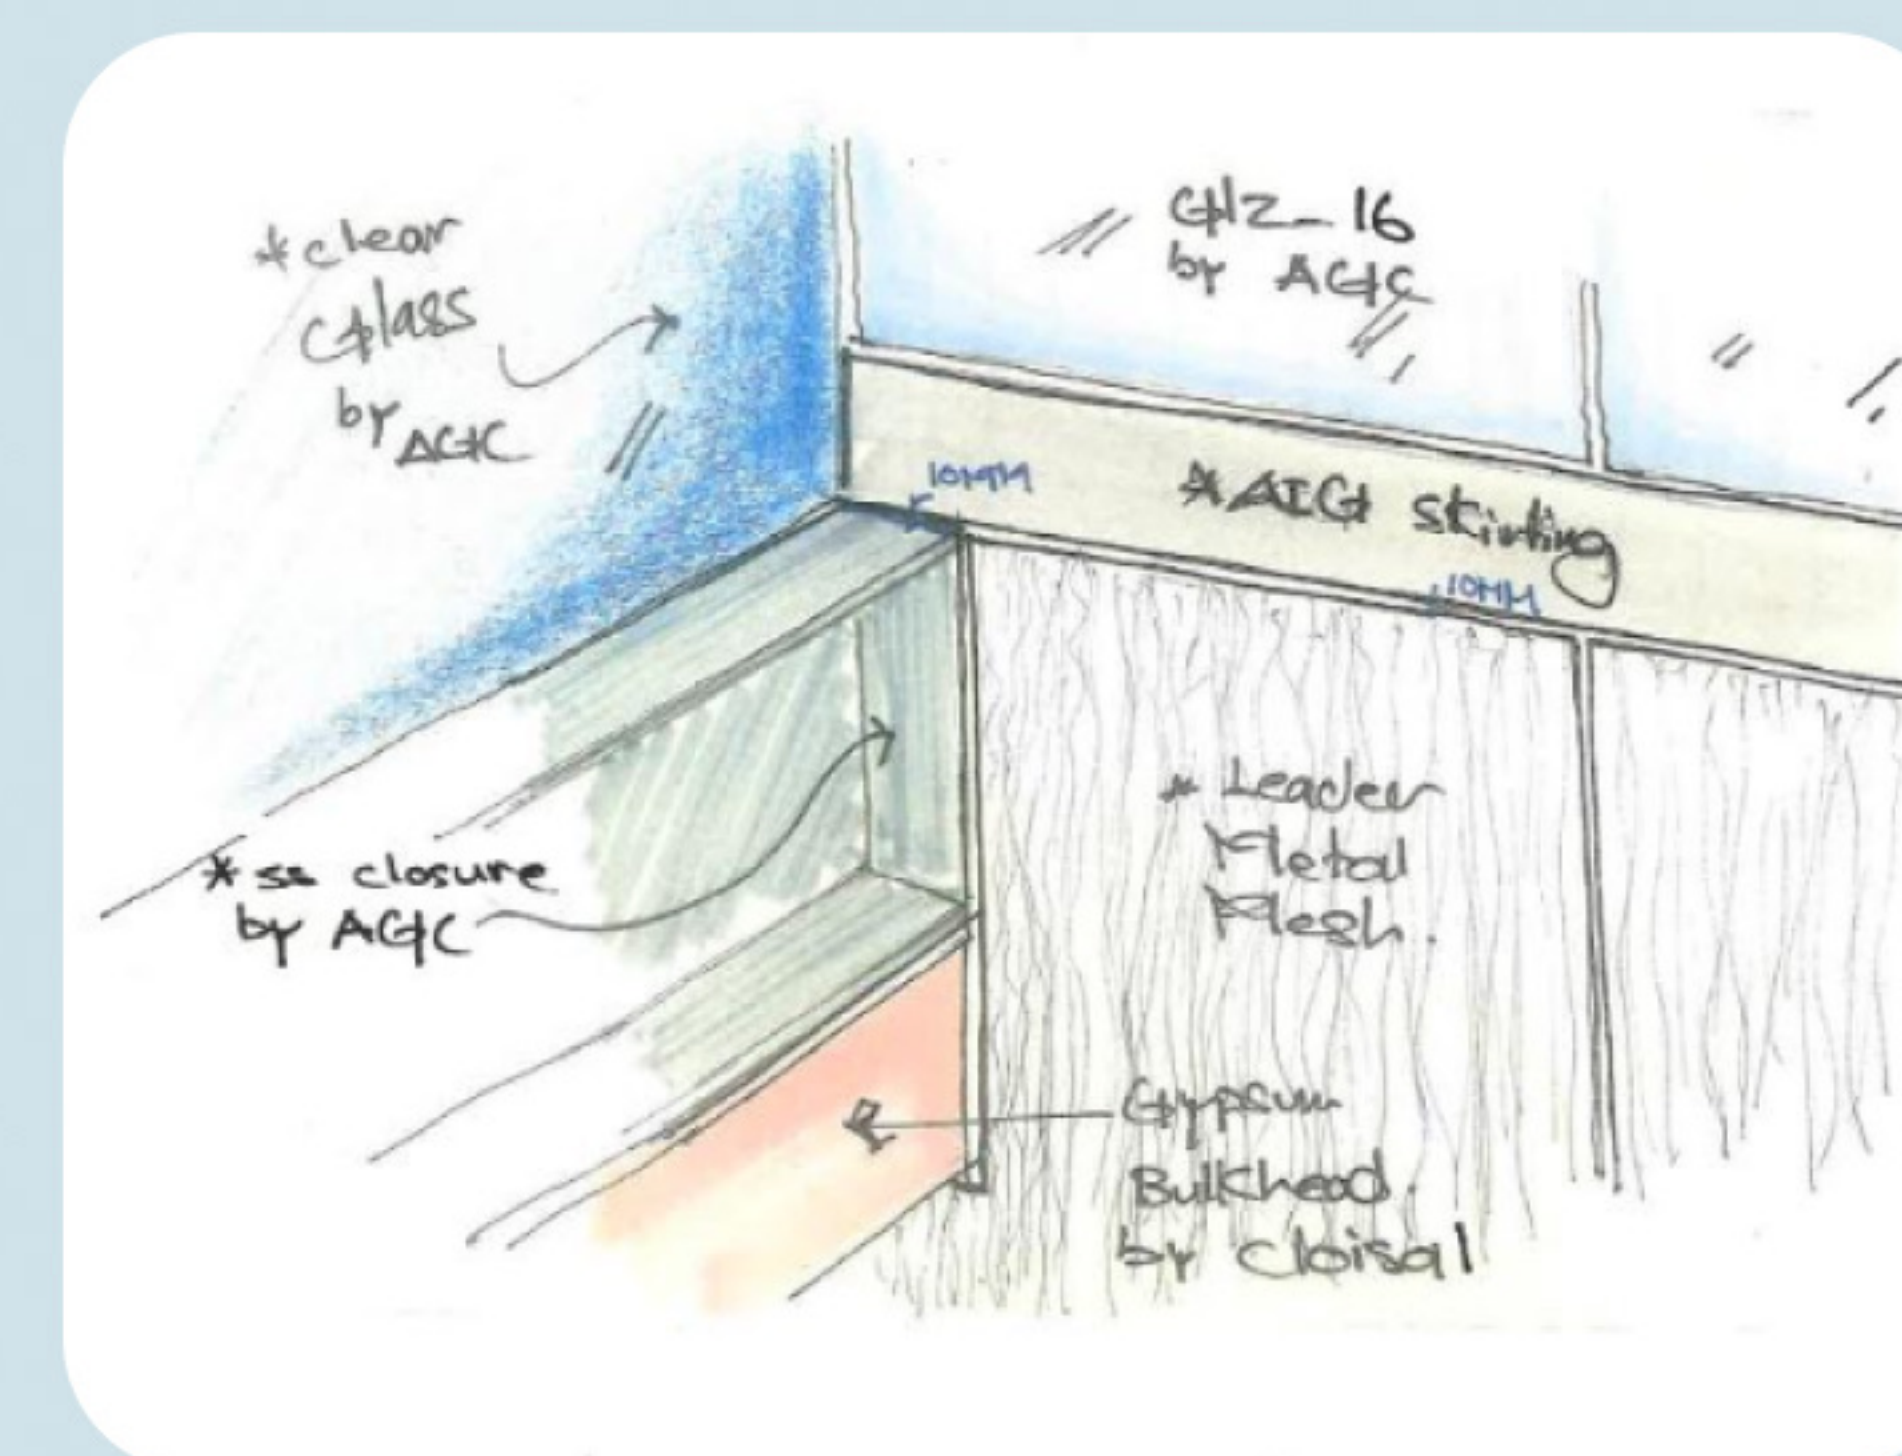

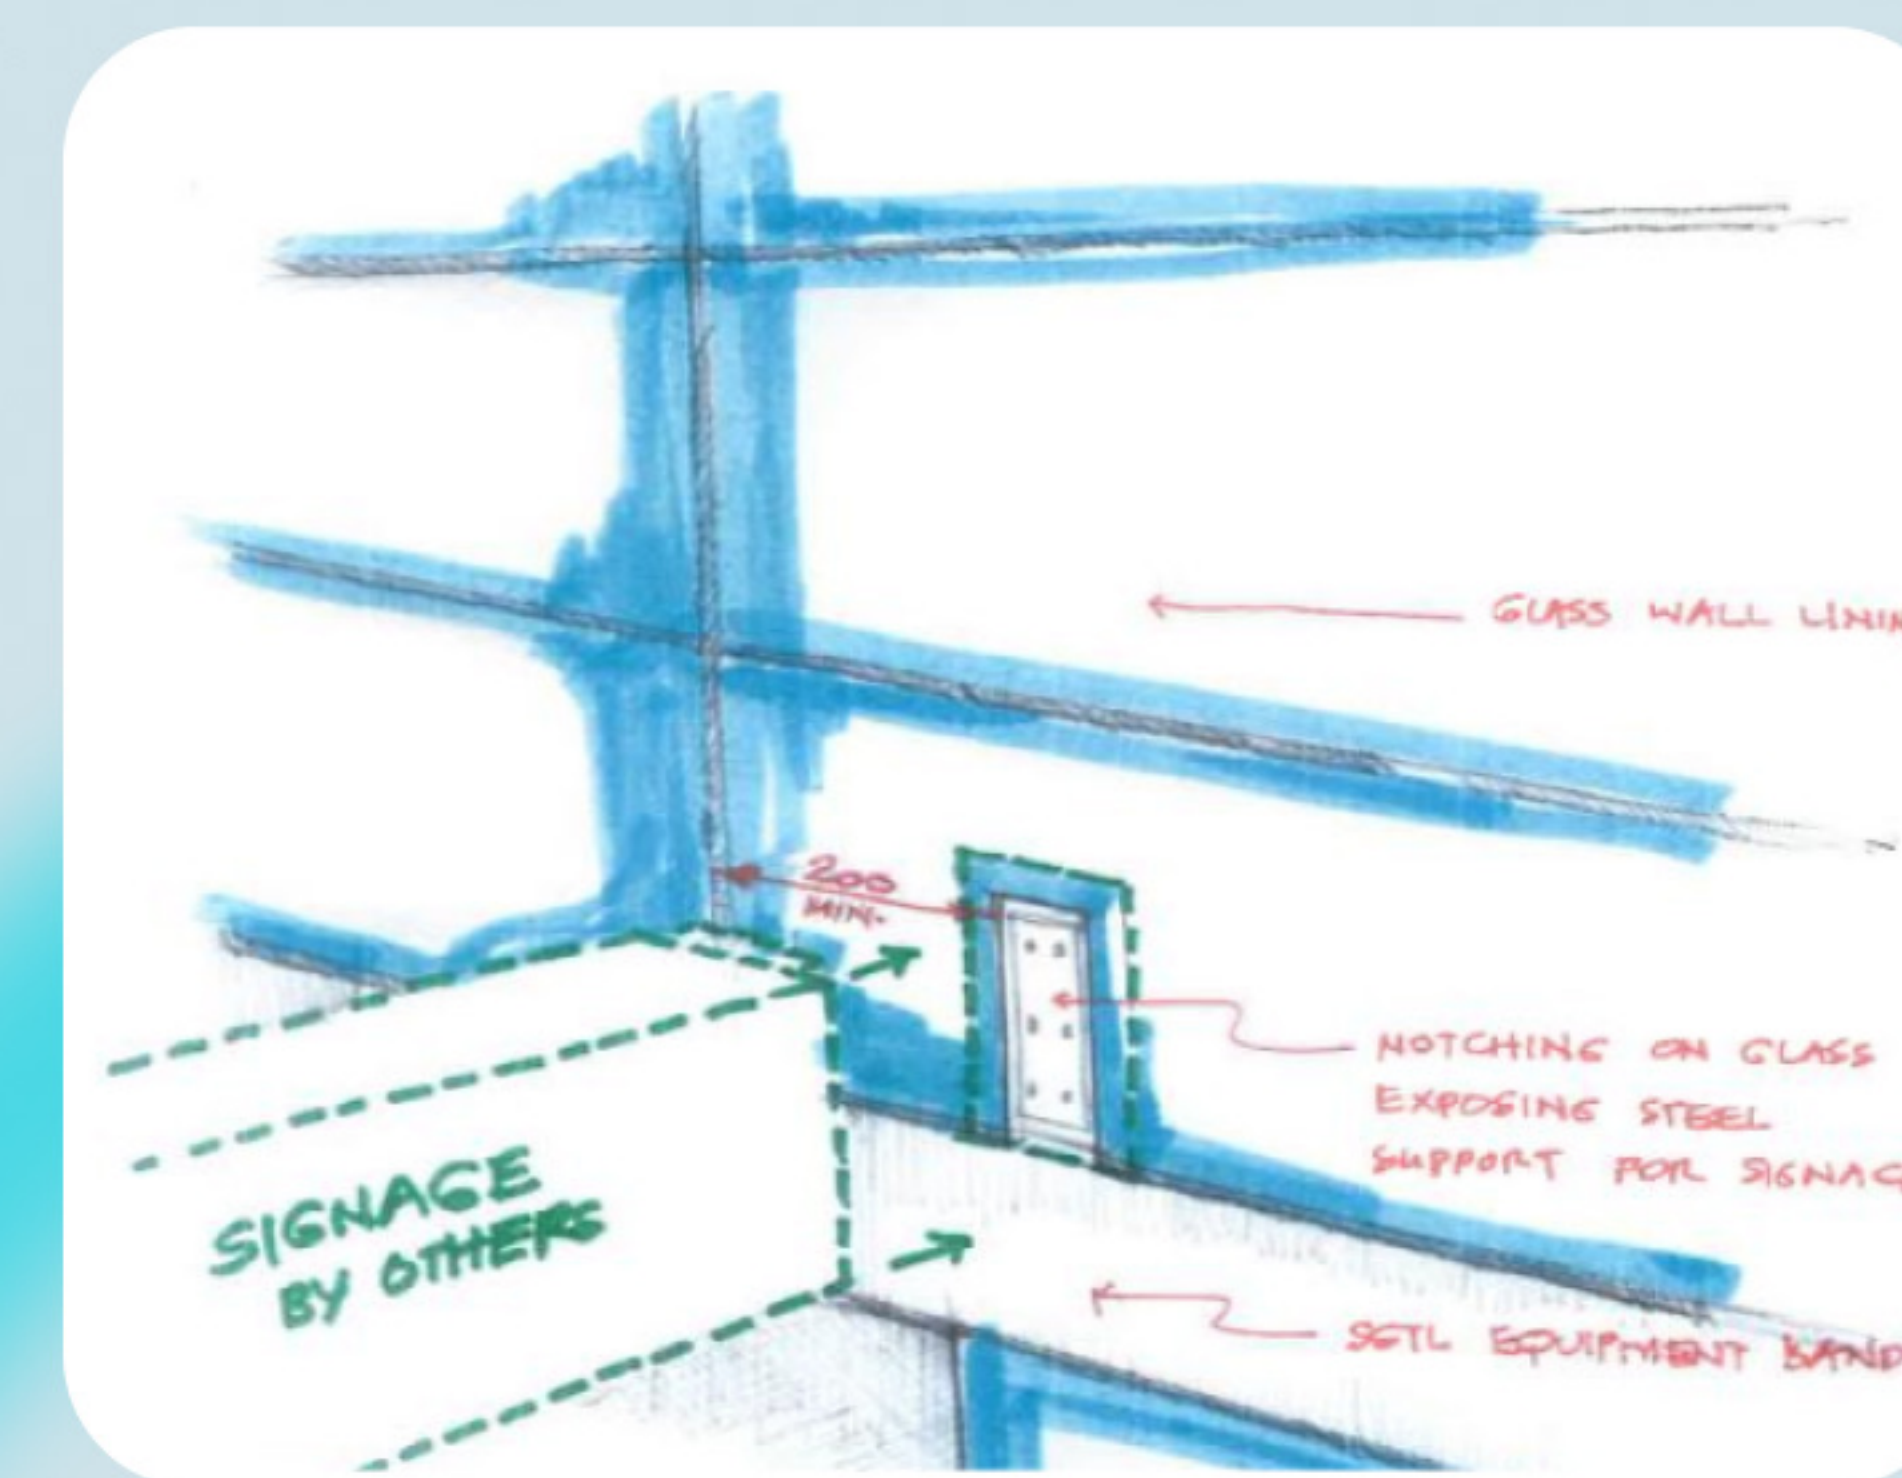

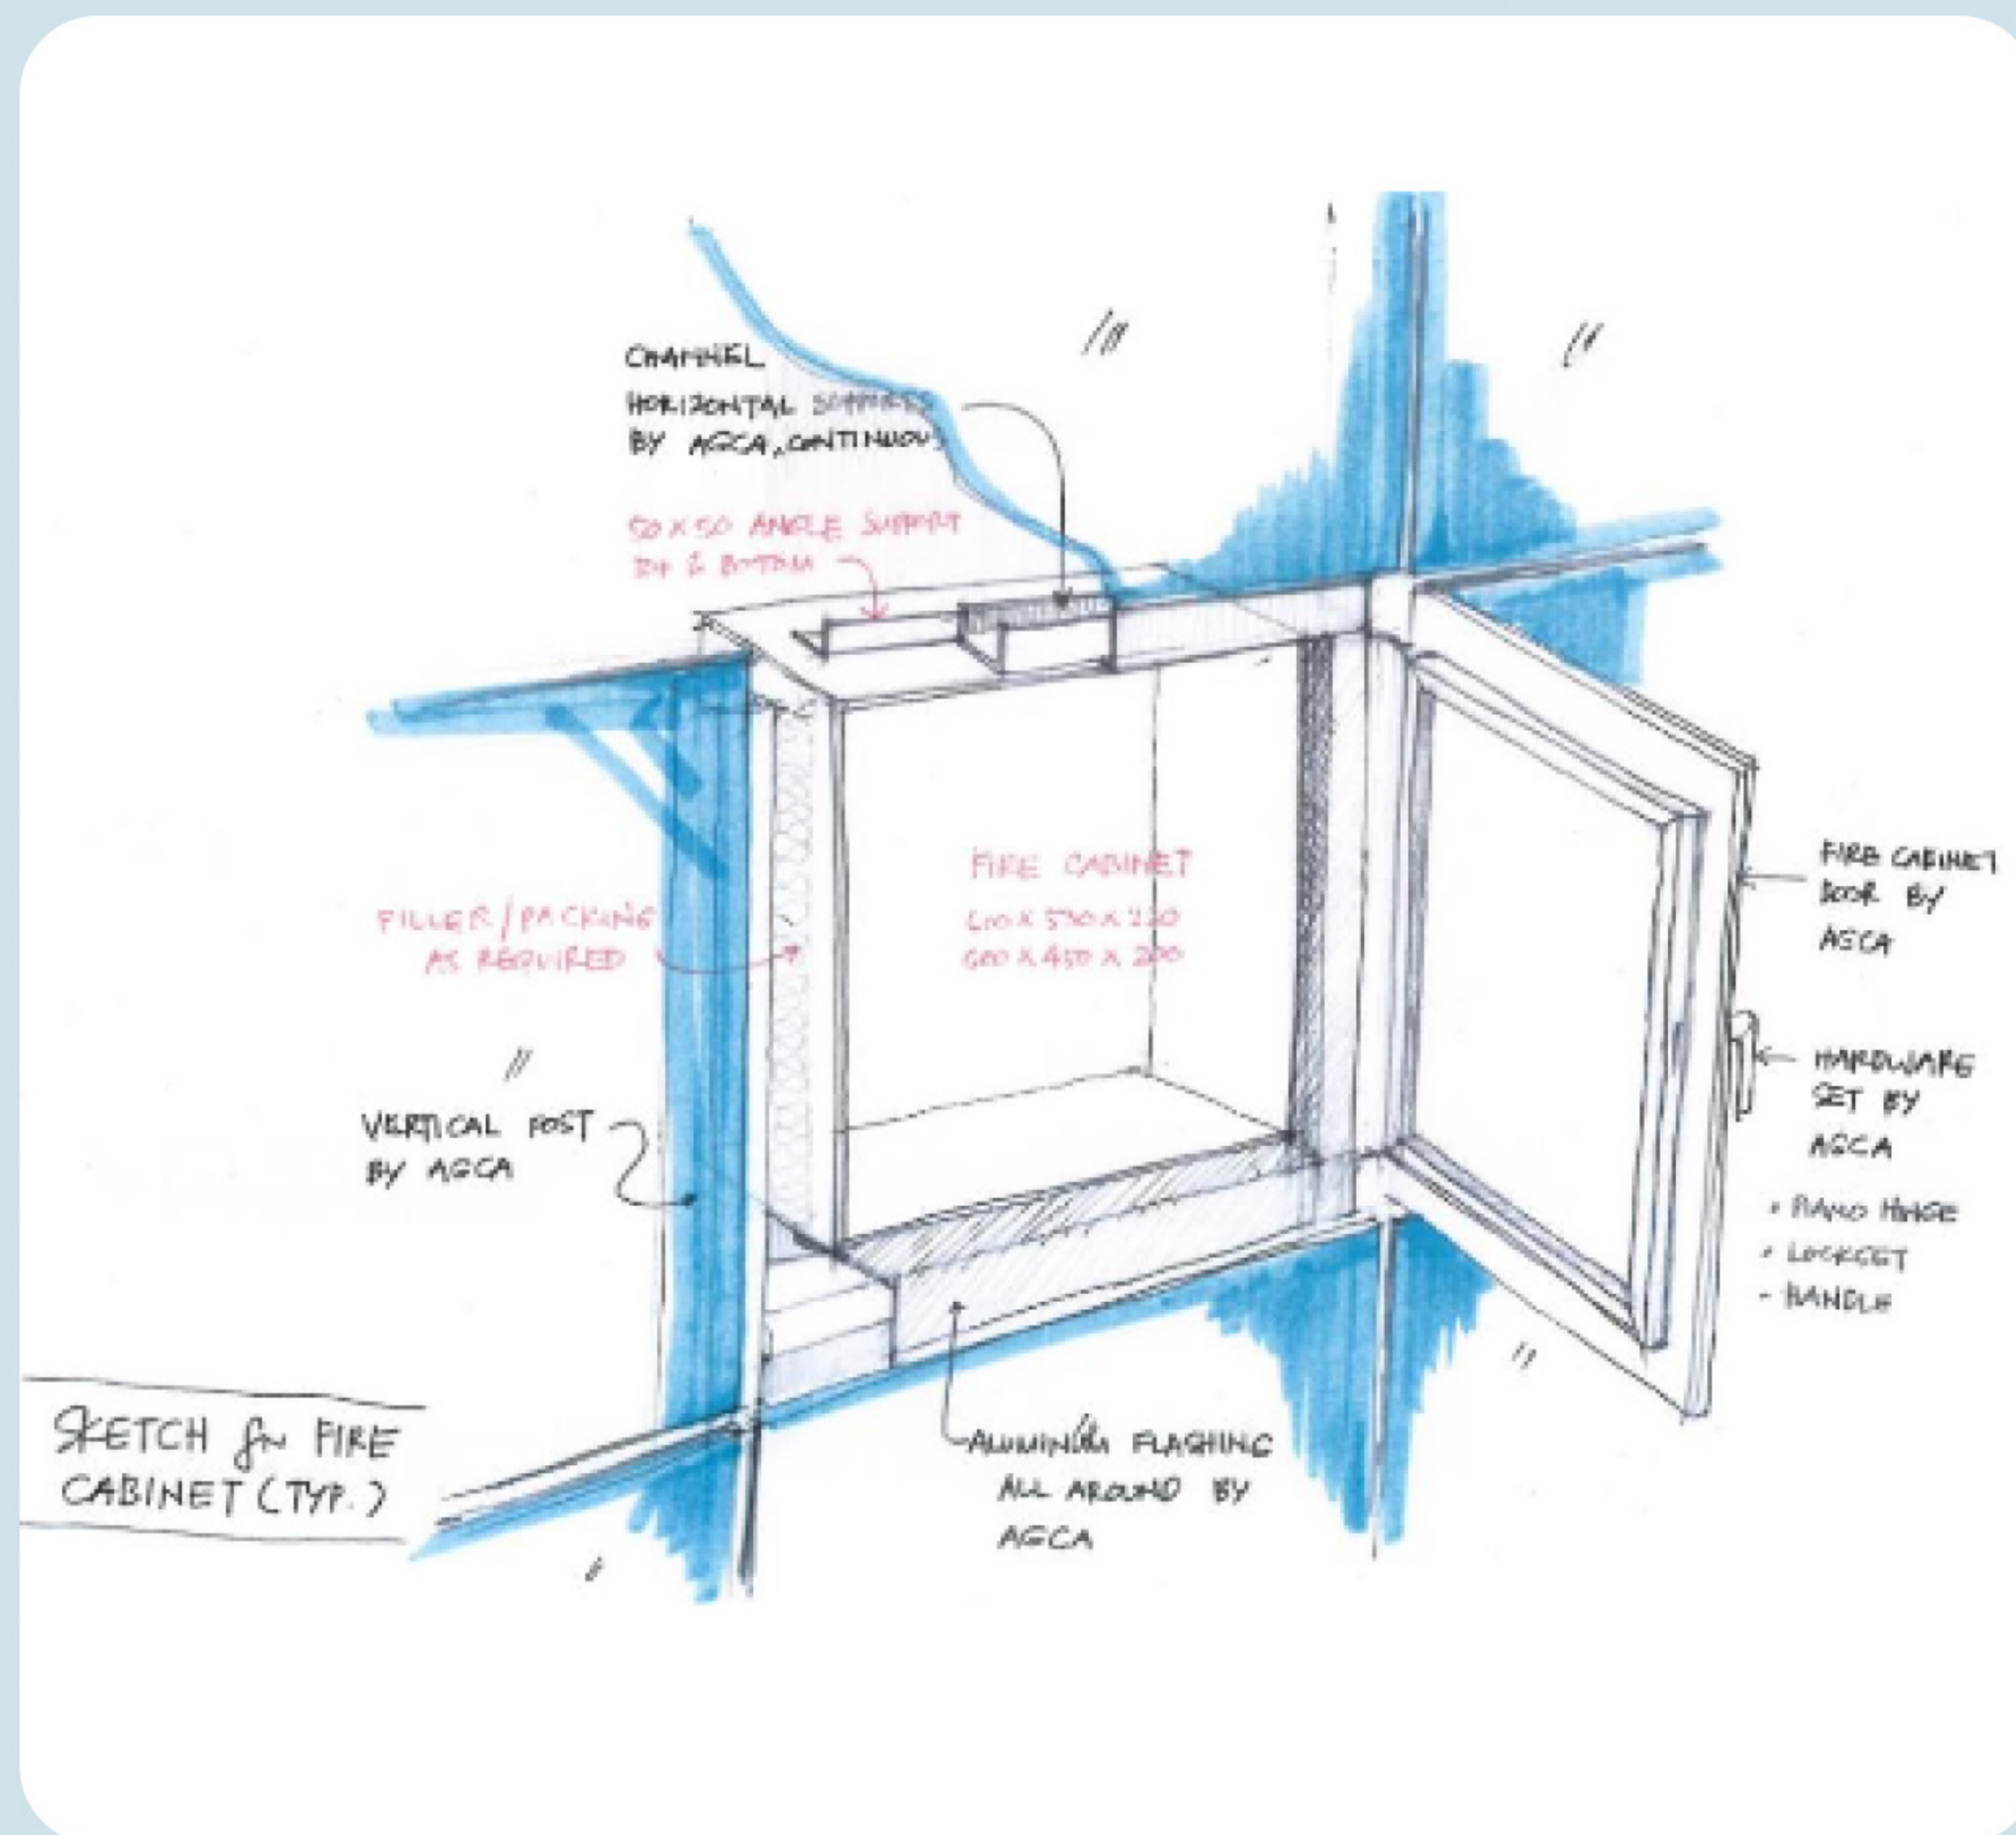

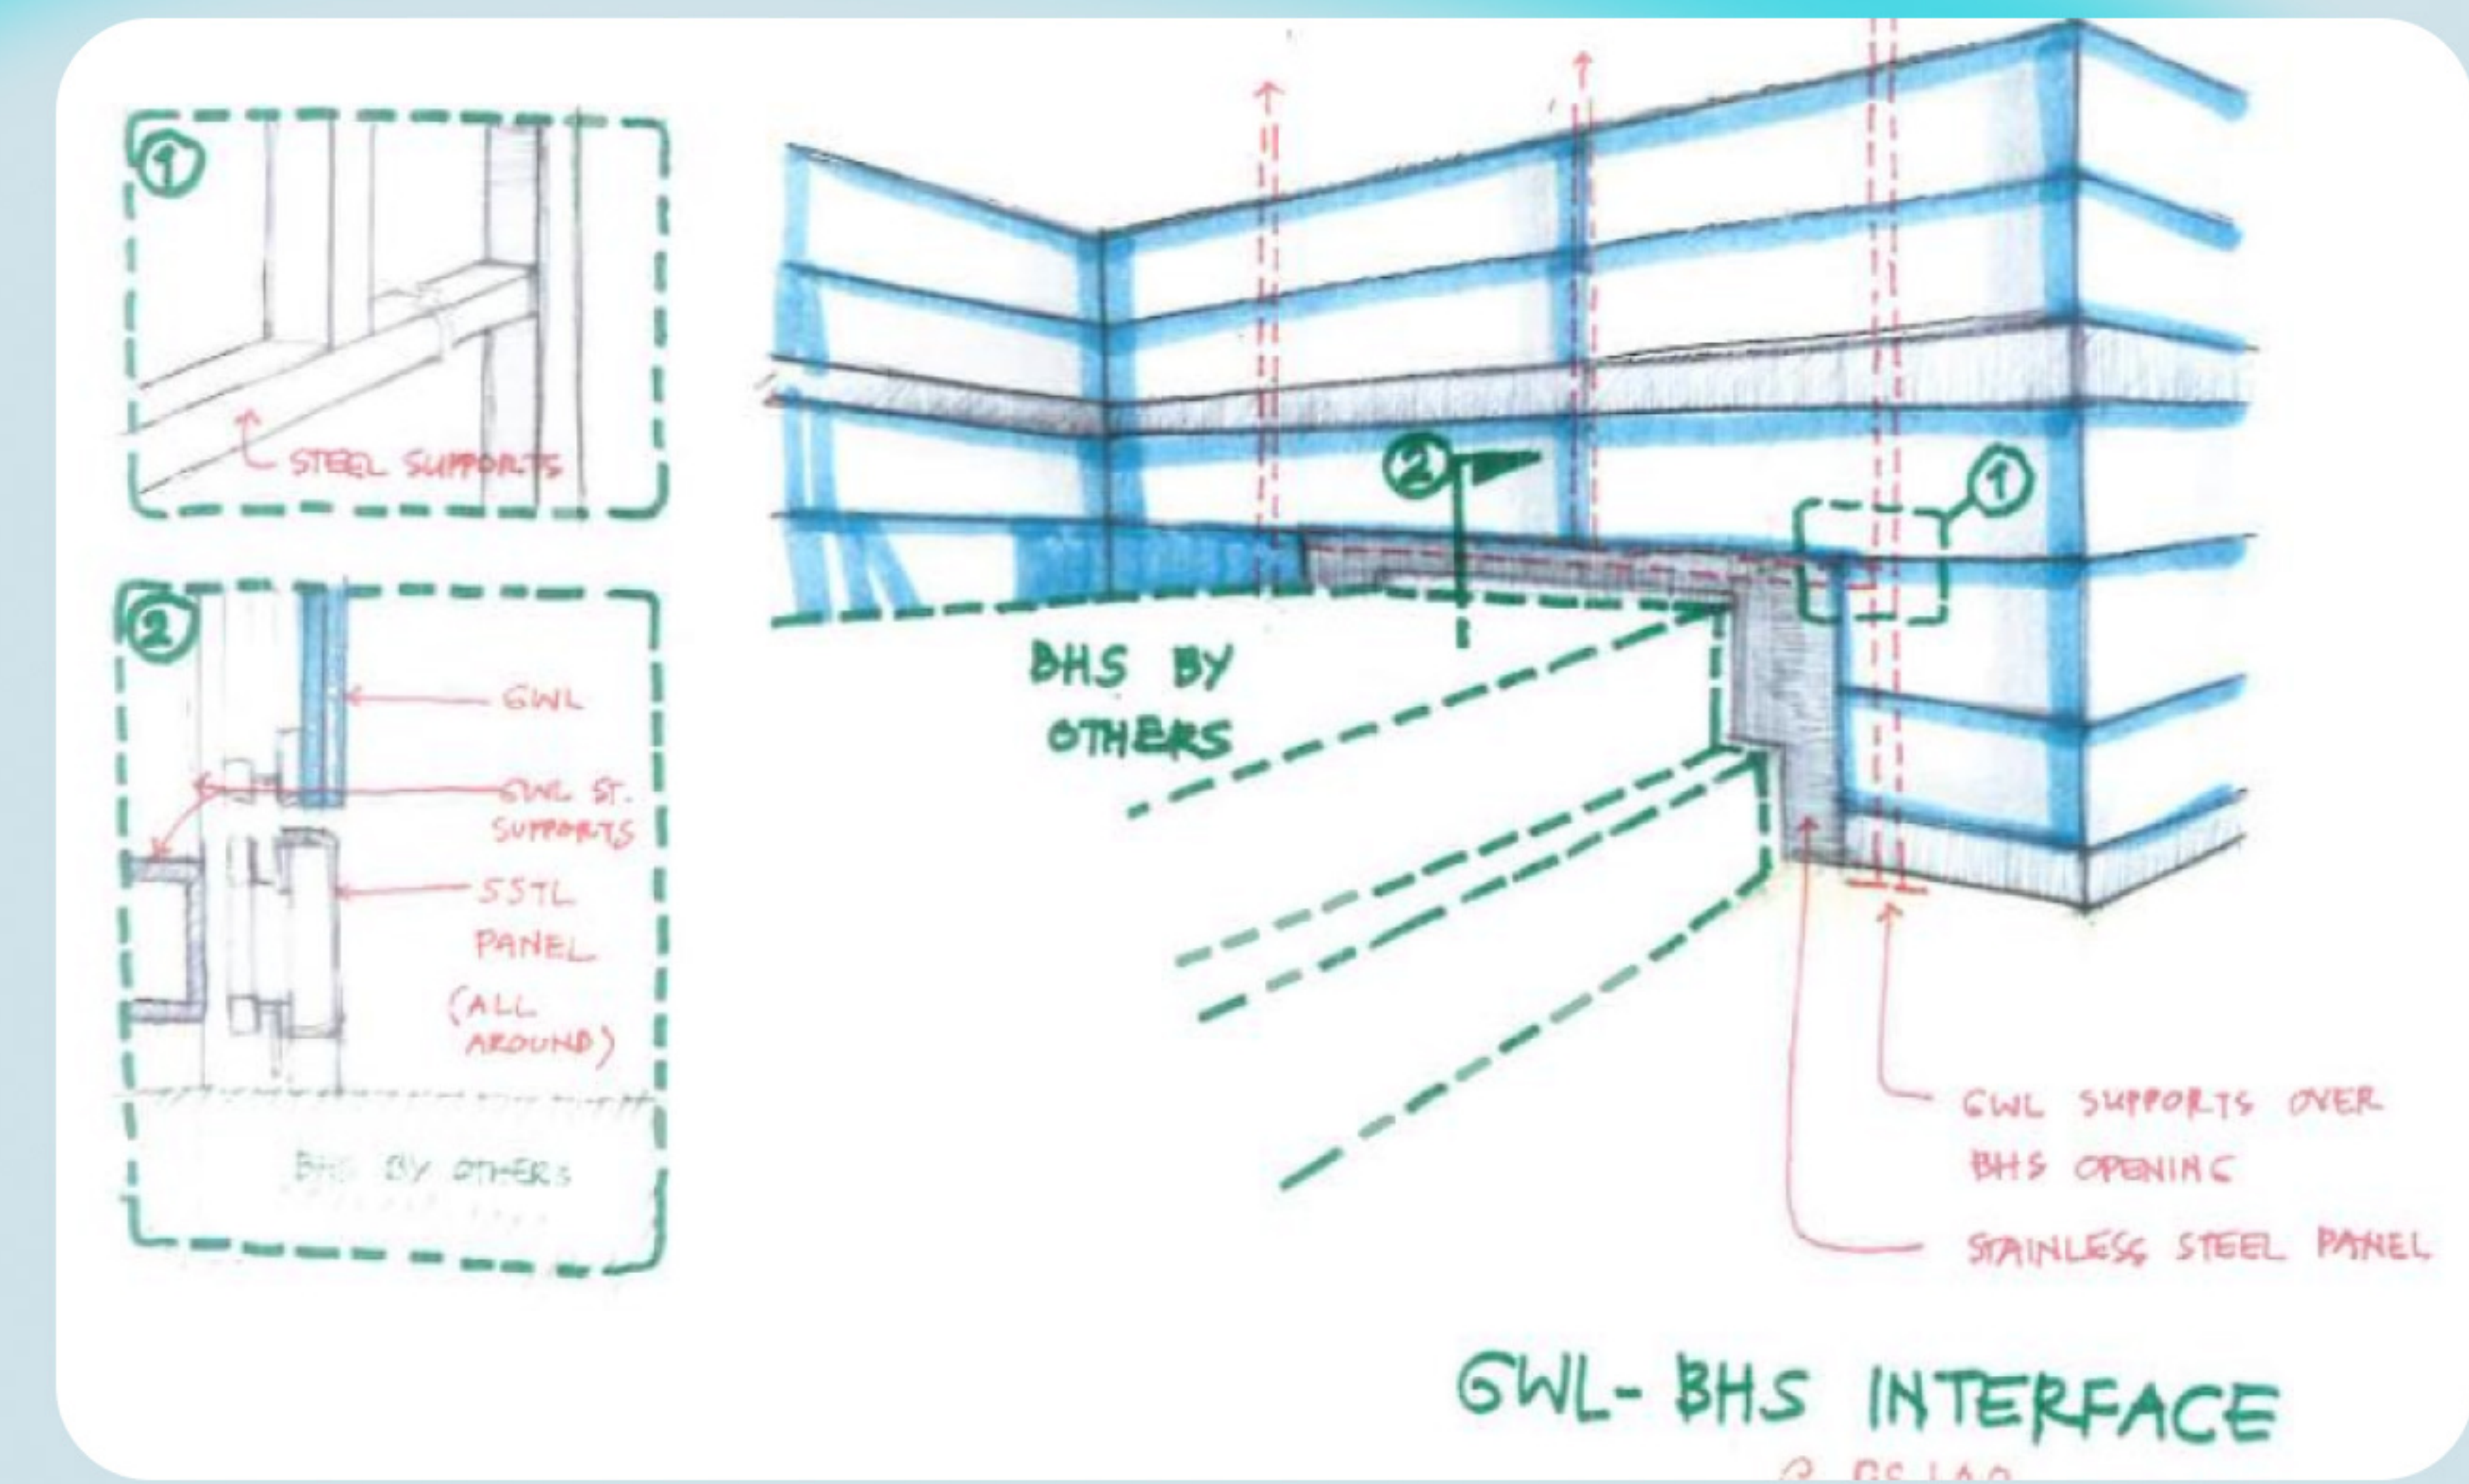

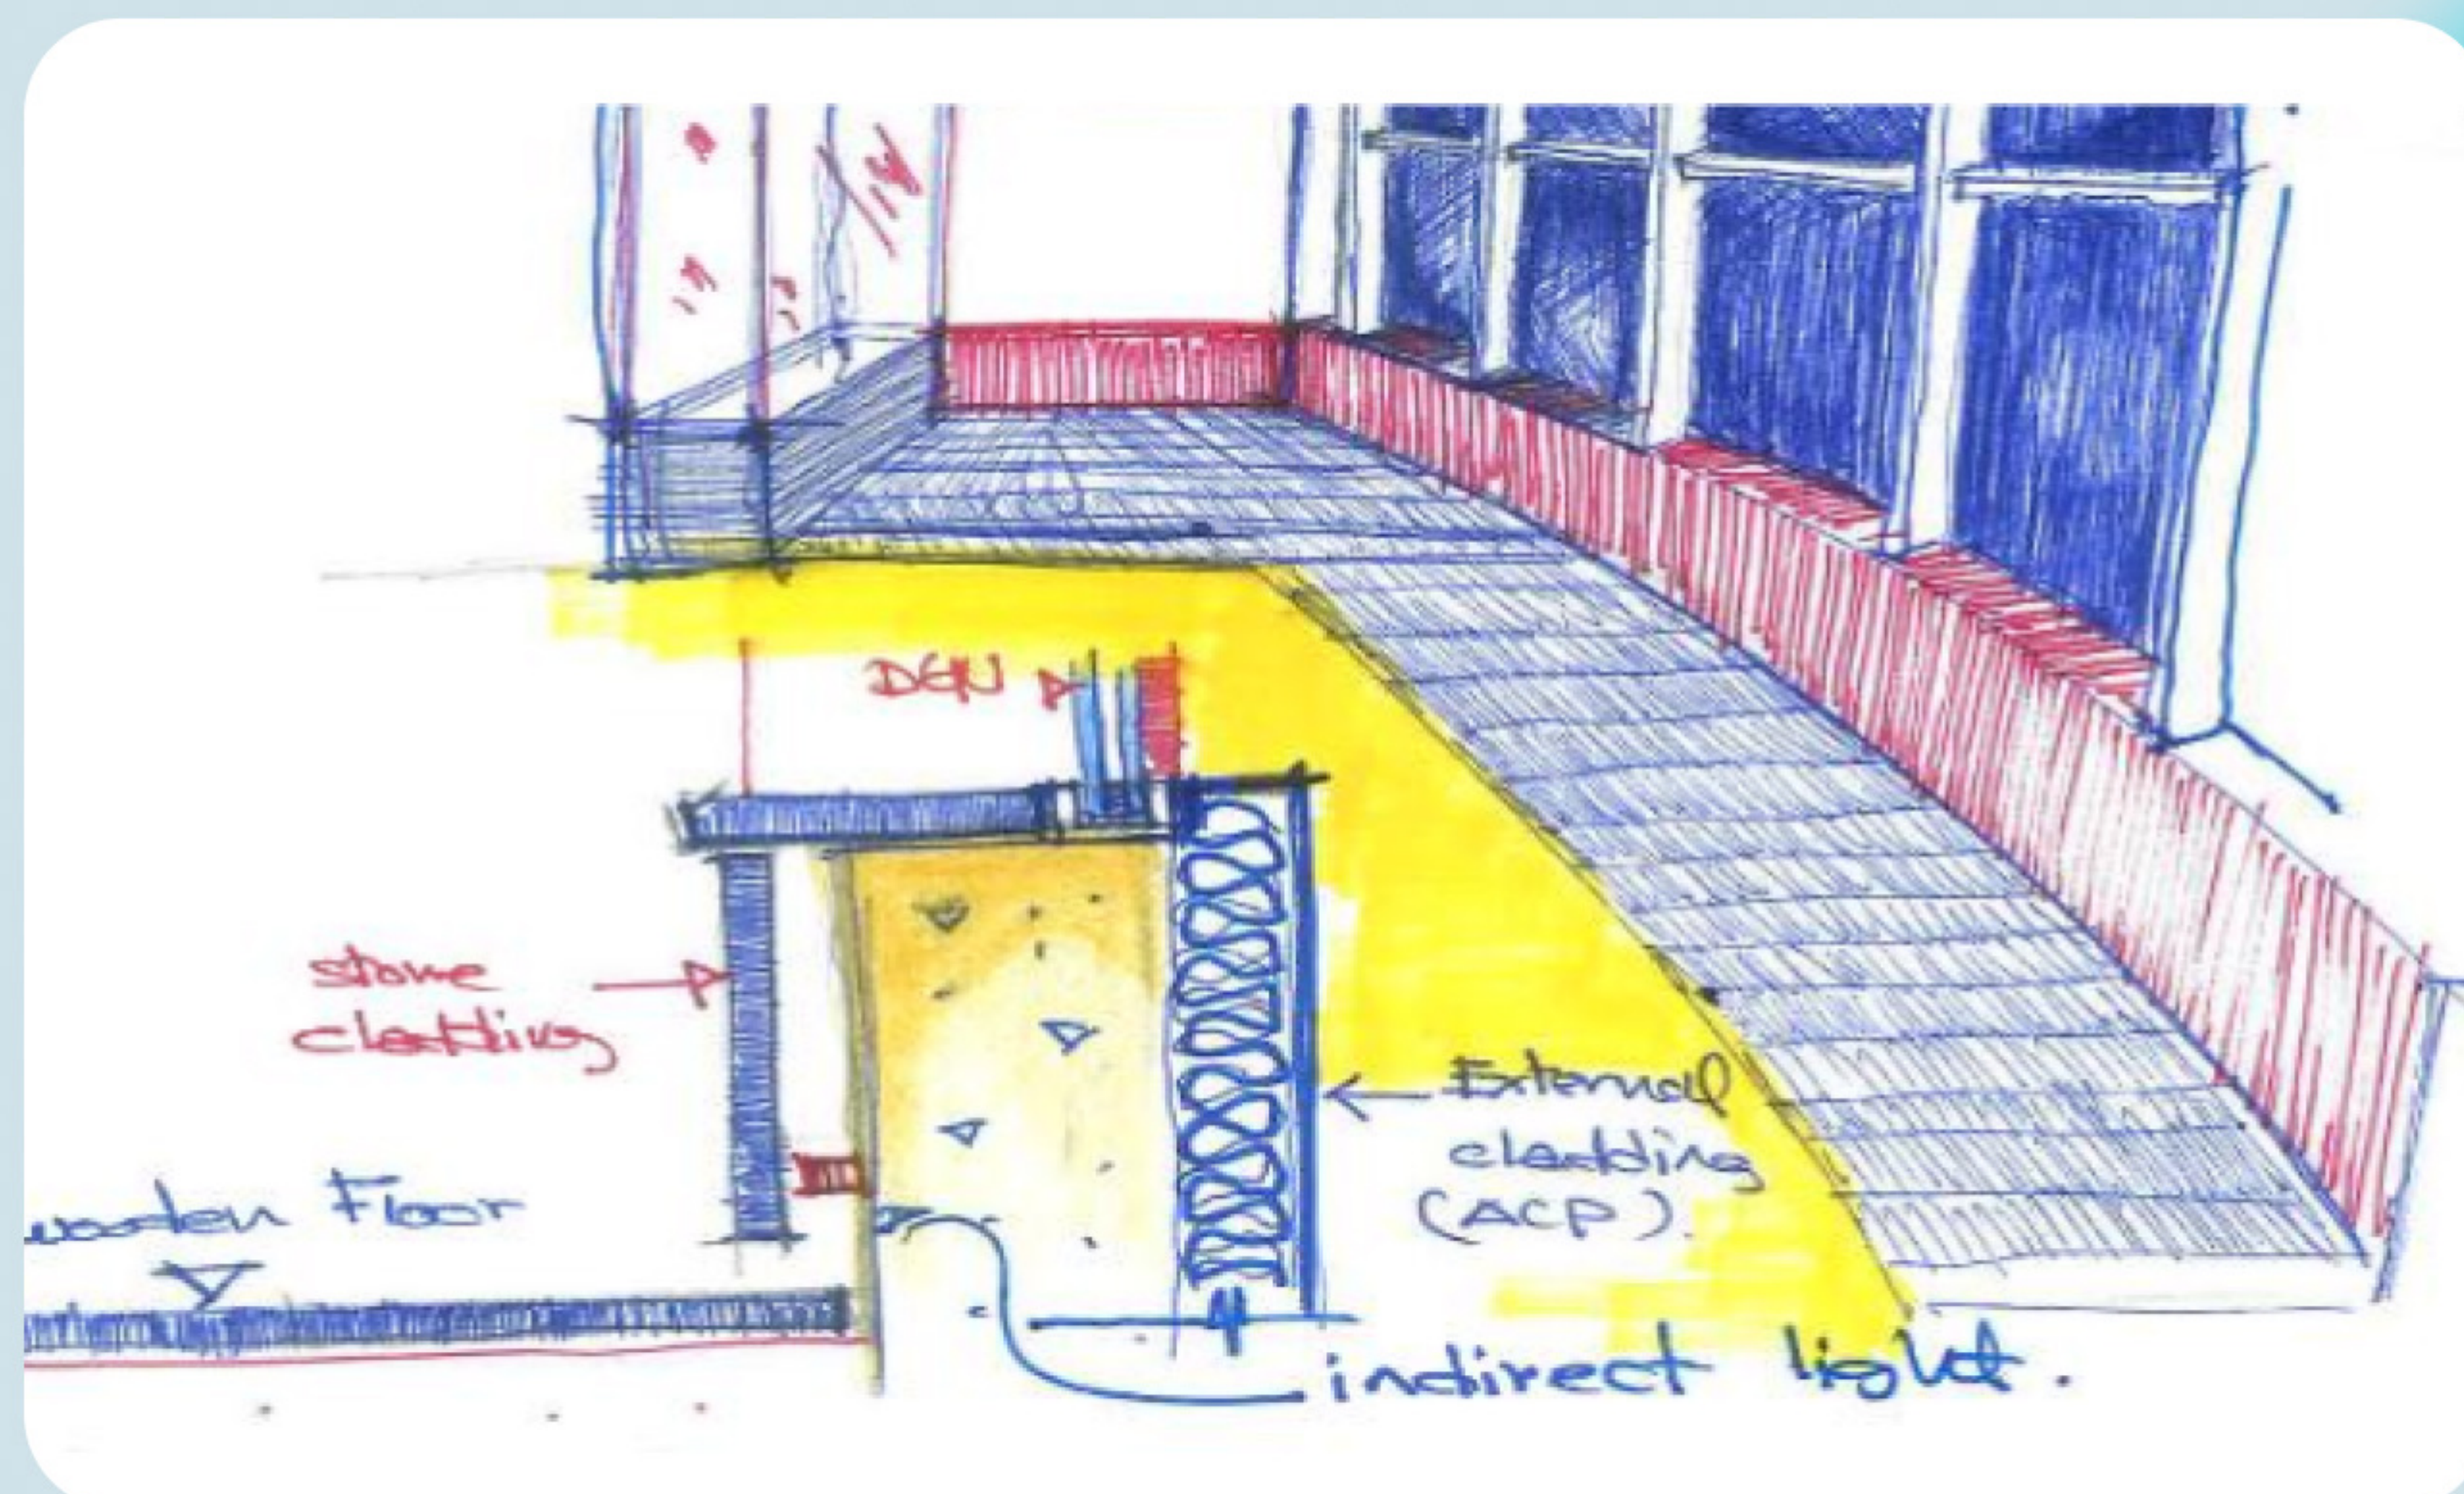

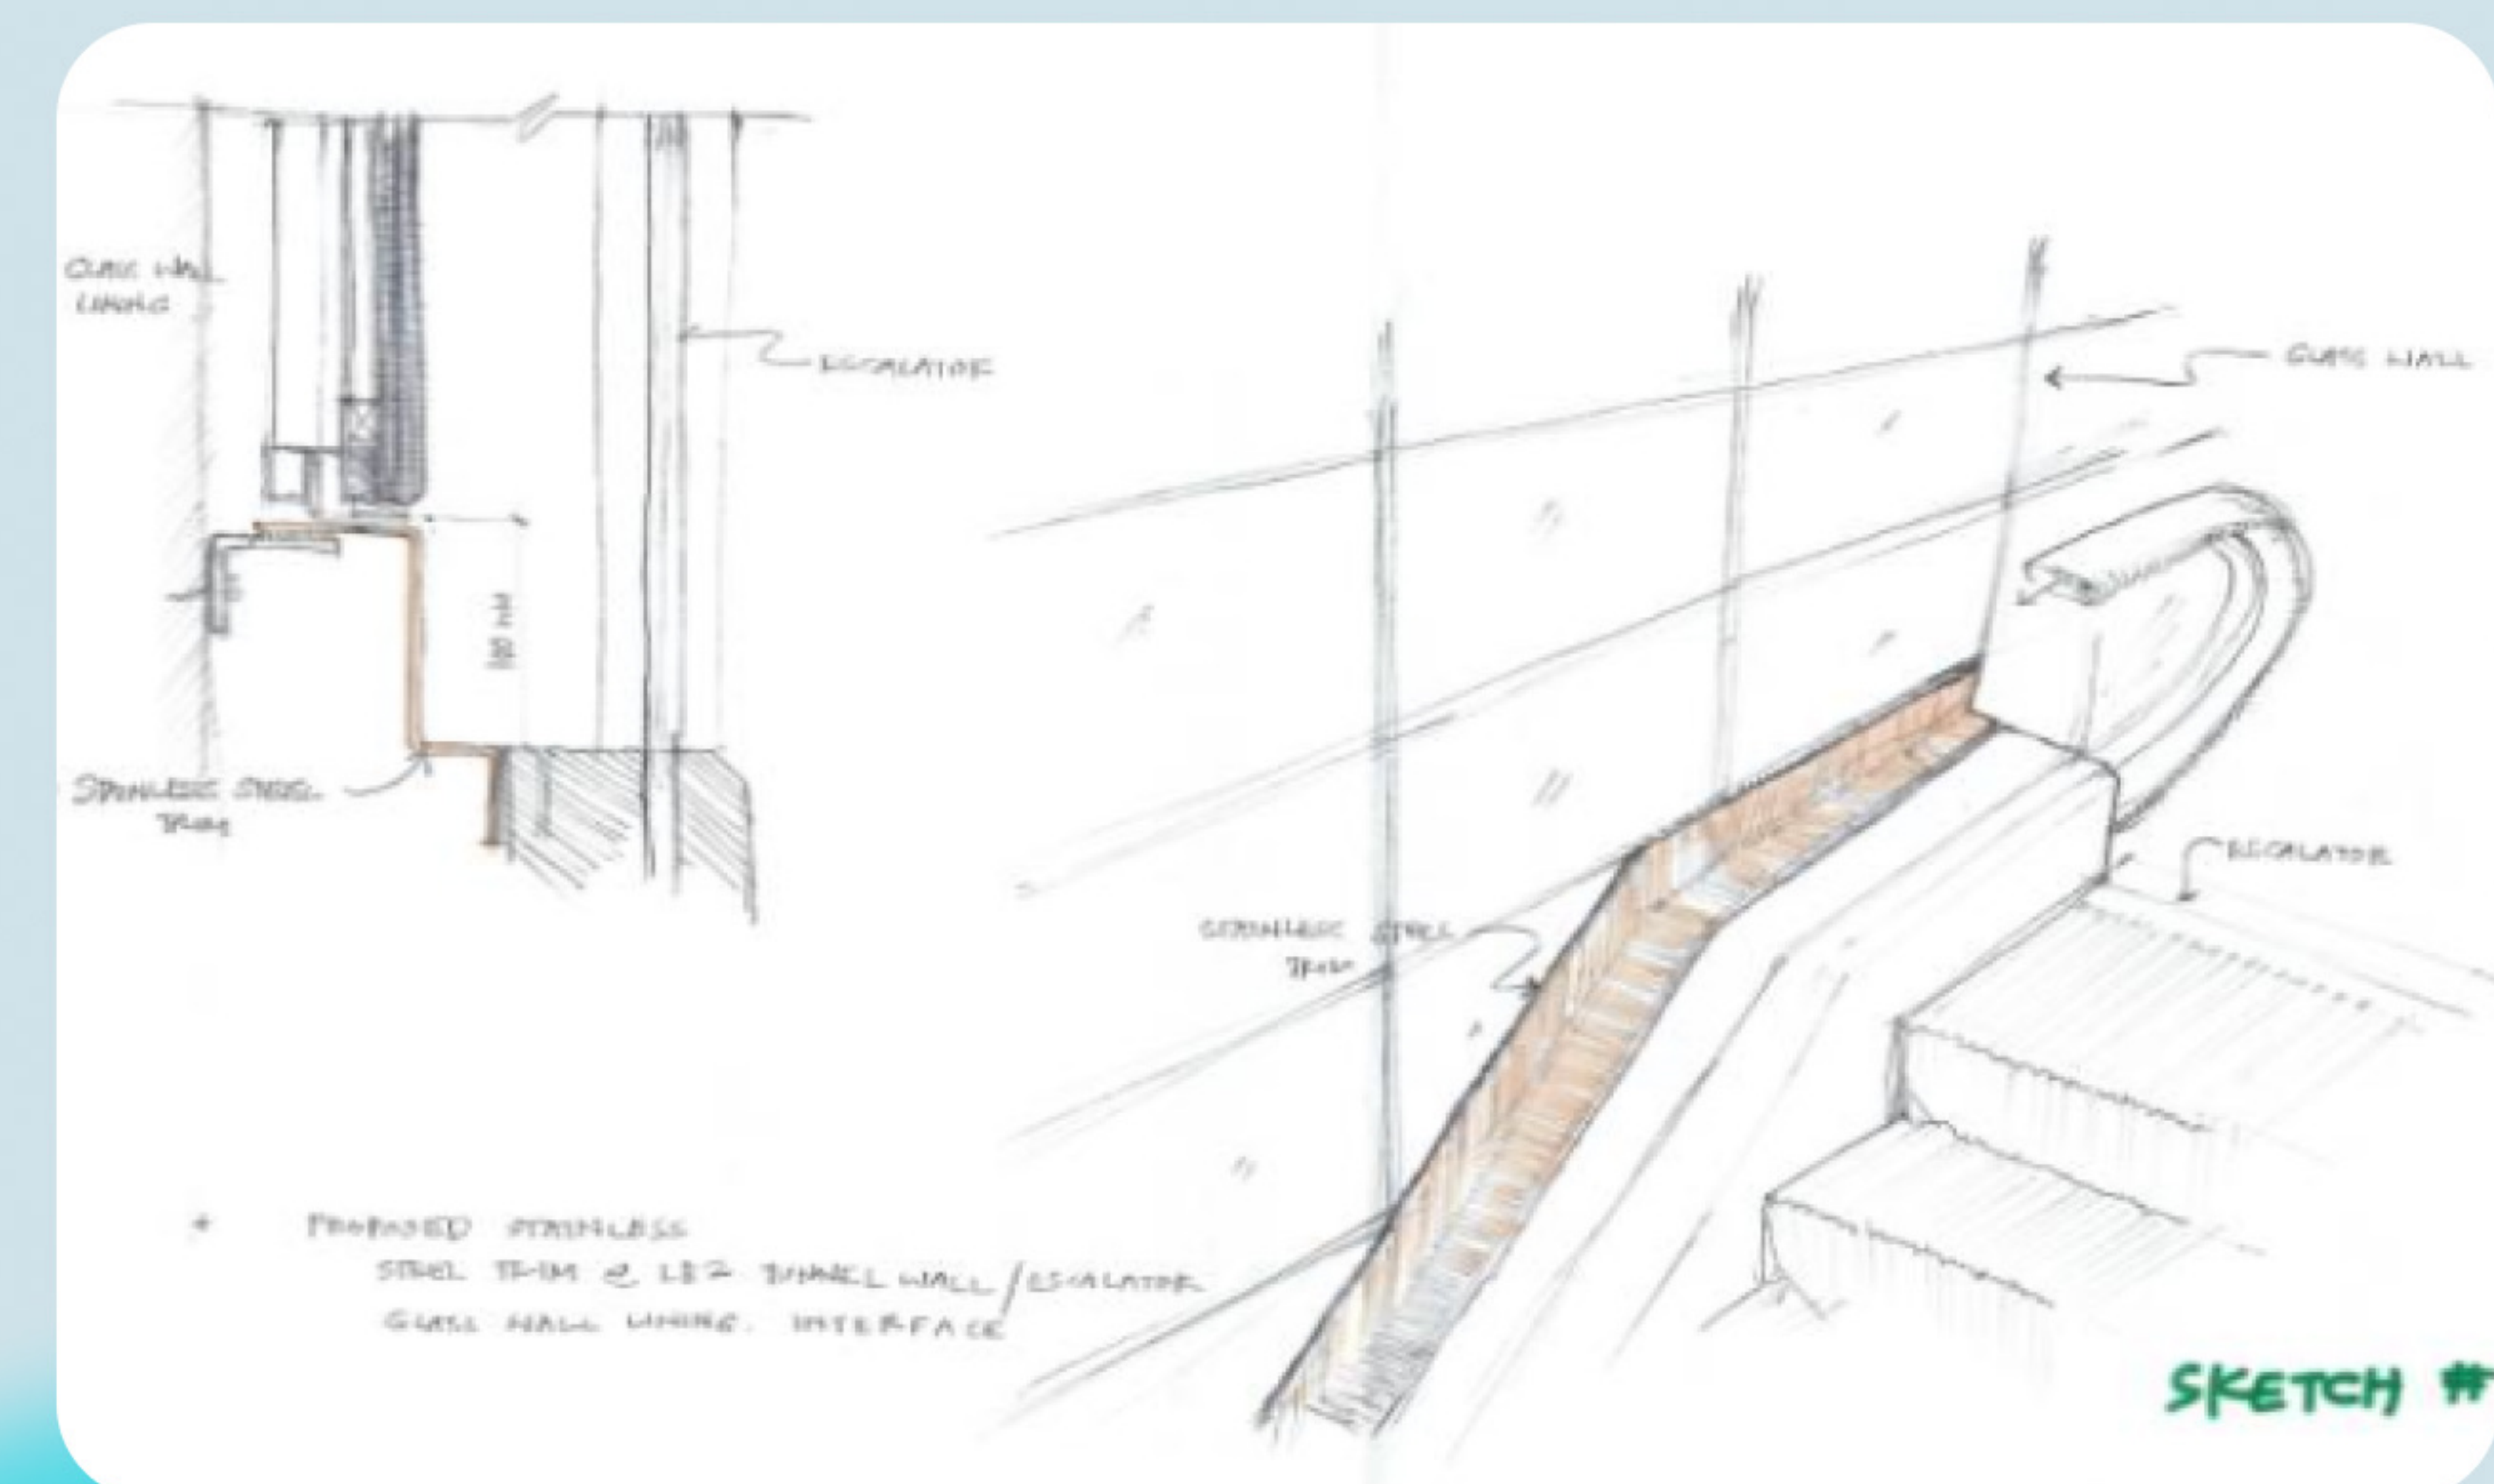

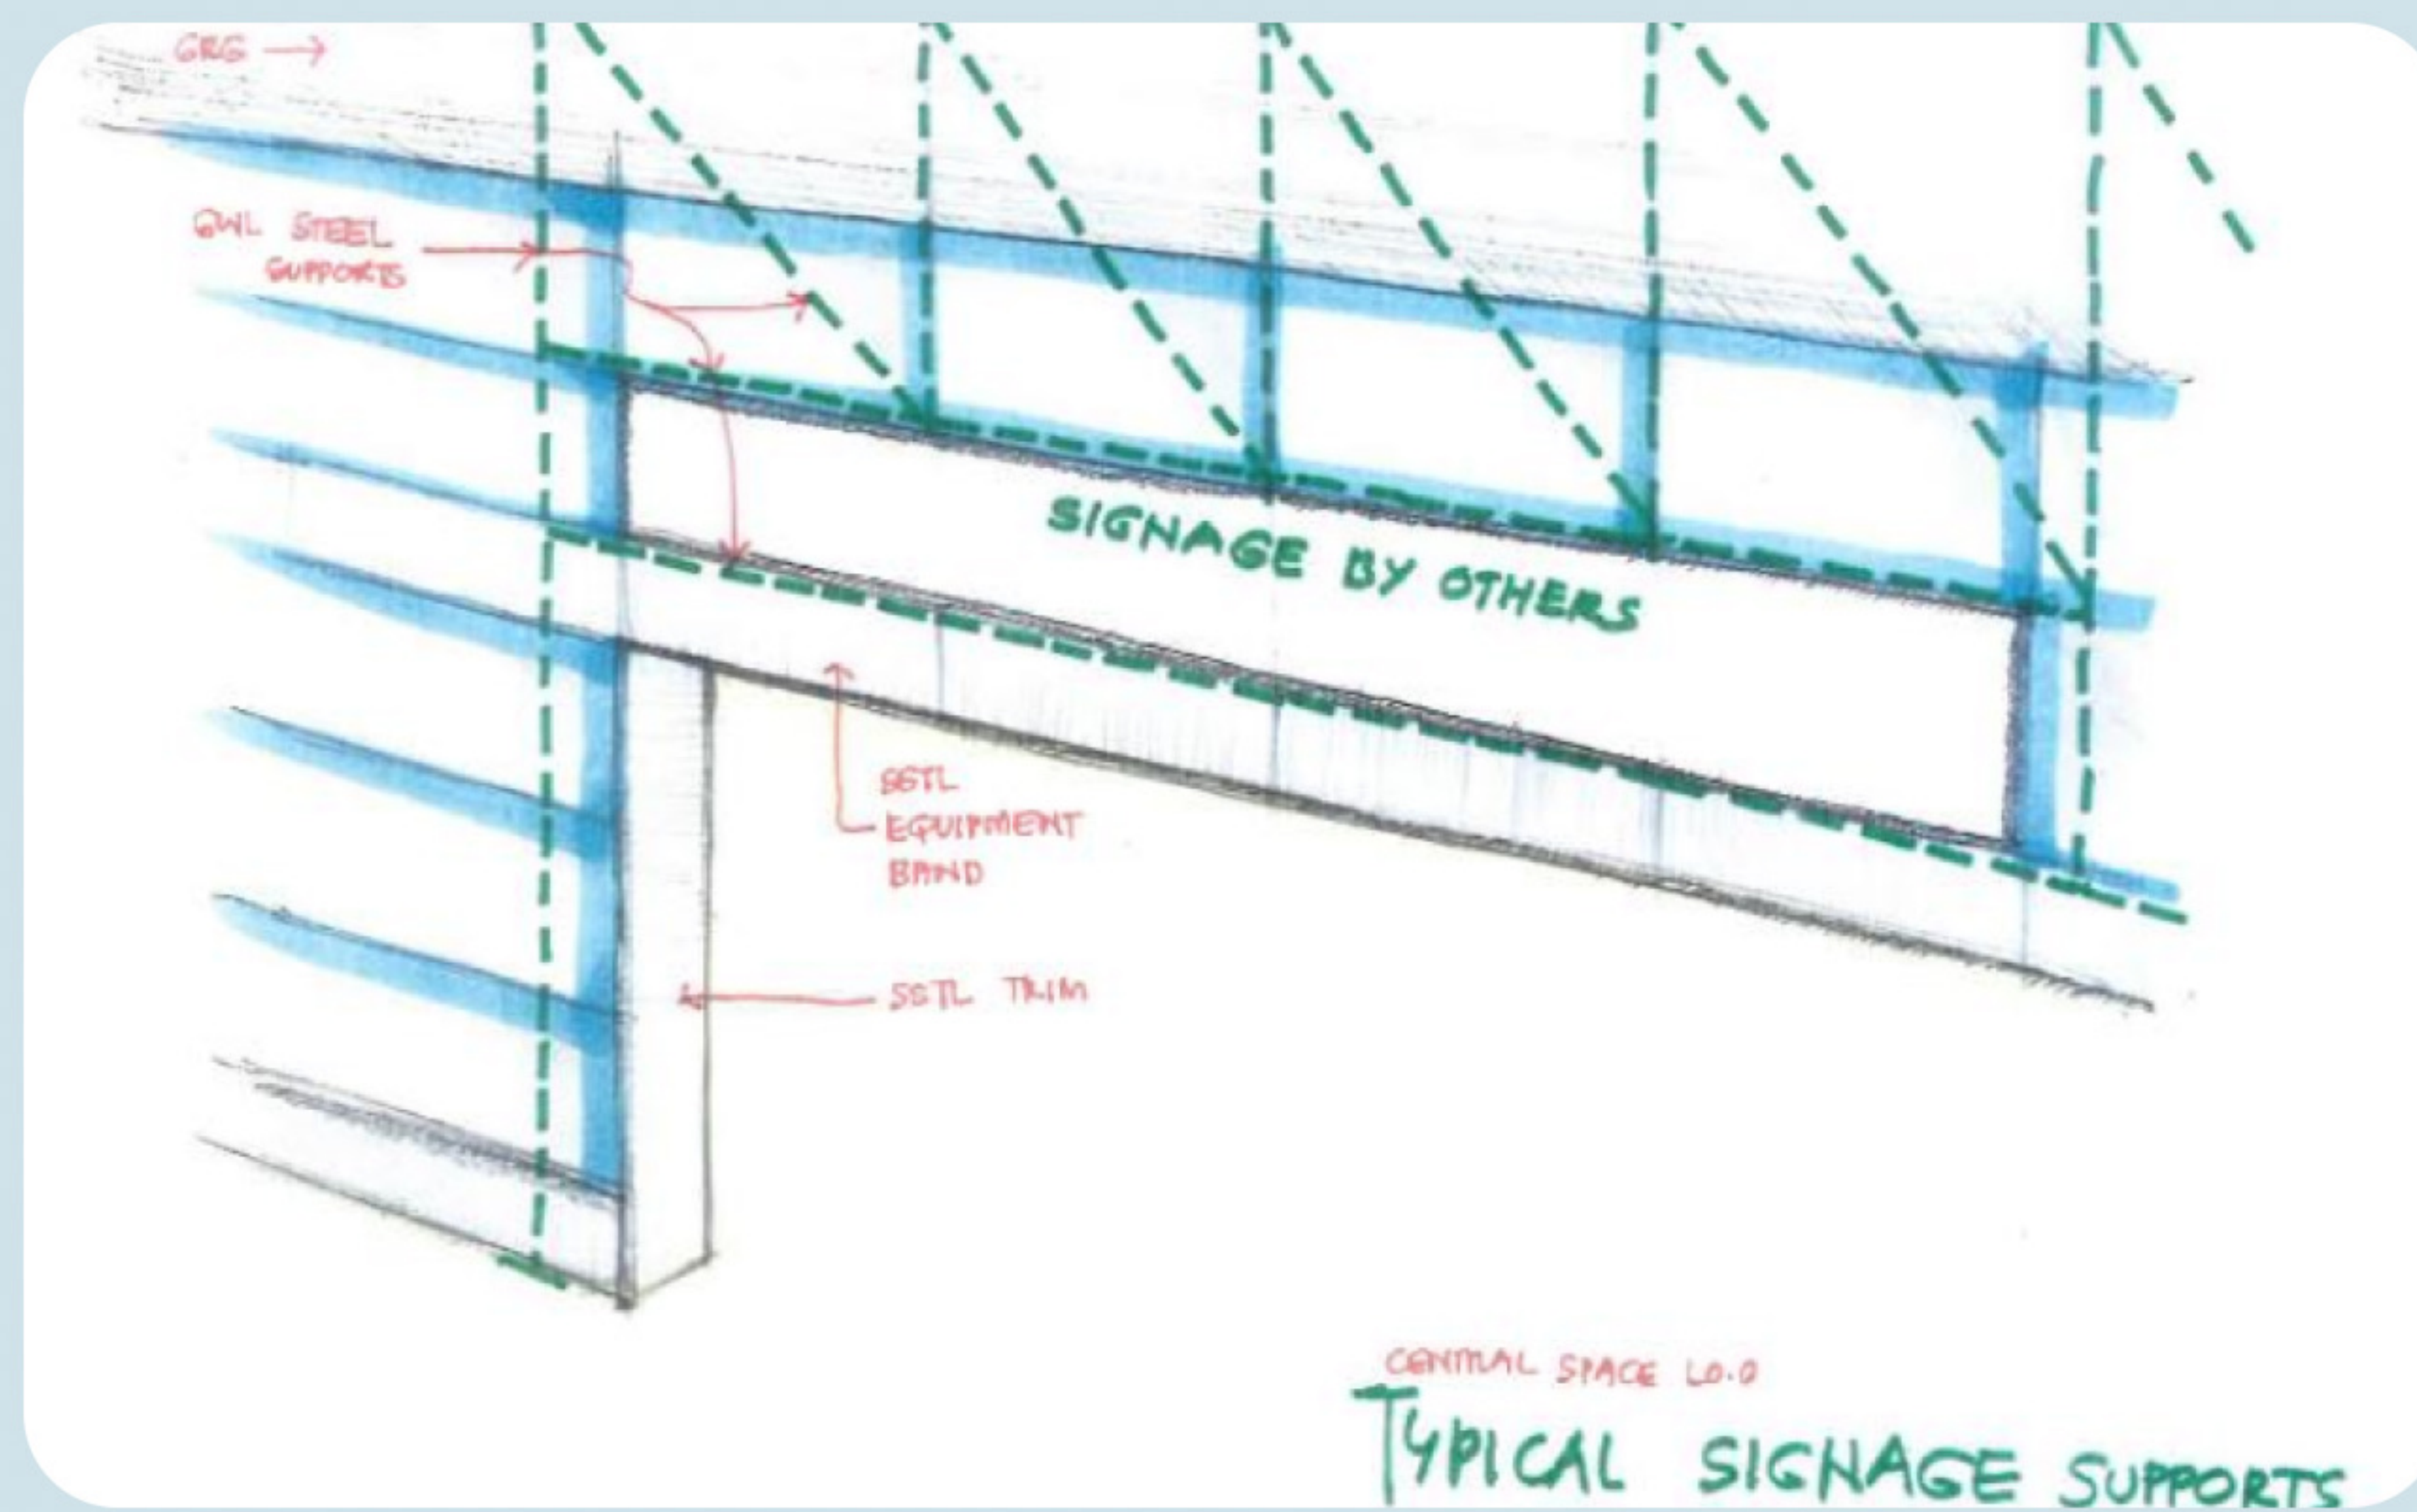

Quality

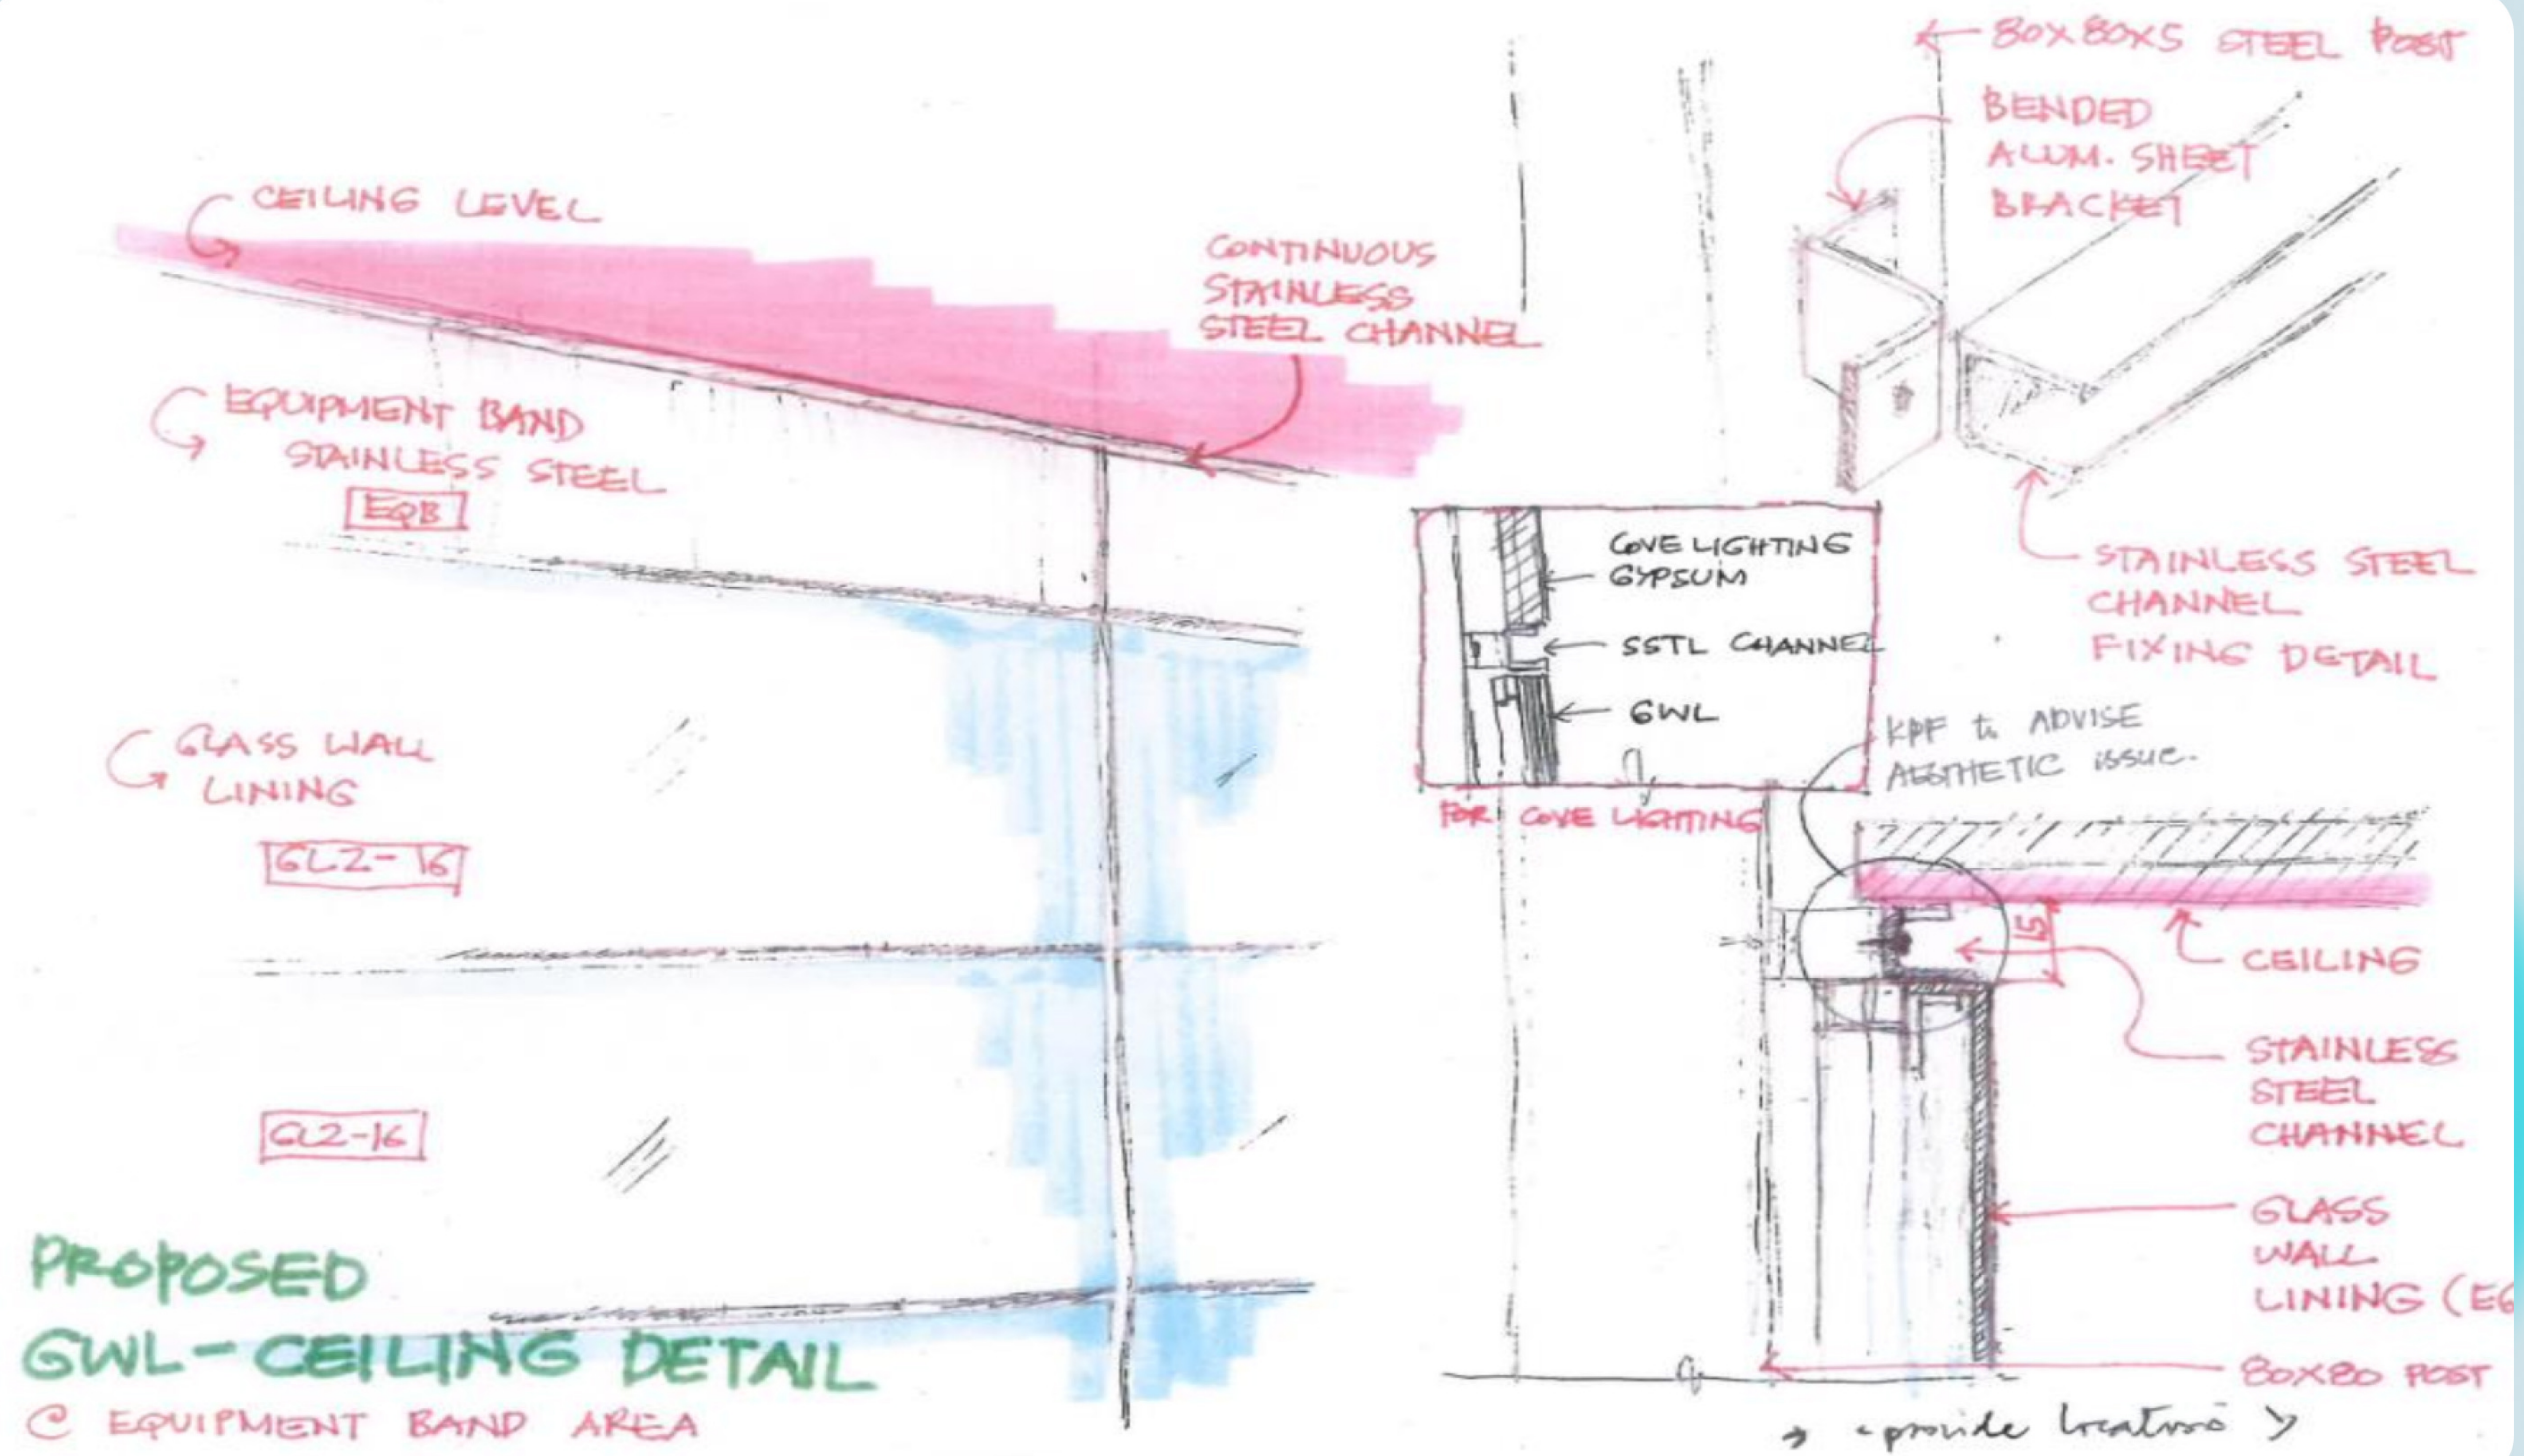

The best high quality products.

Our Sketches & Design

Our Engineering team have strong technical background and have enough experience to deal with all types of metal works and can provide the solution based on each project requirement.

Product

For the past years we have produced products which make us specialist on the fields of metal due to the high quality products satisfying our clients and building trusts for the past 40 years since starting the factory in UAE.

Unique

The Best quality products

Authentic

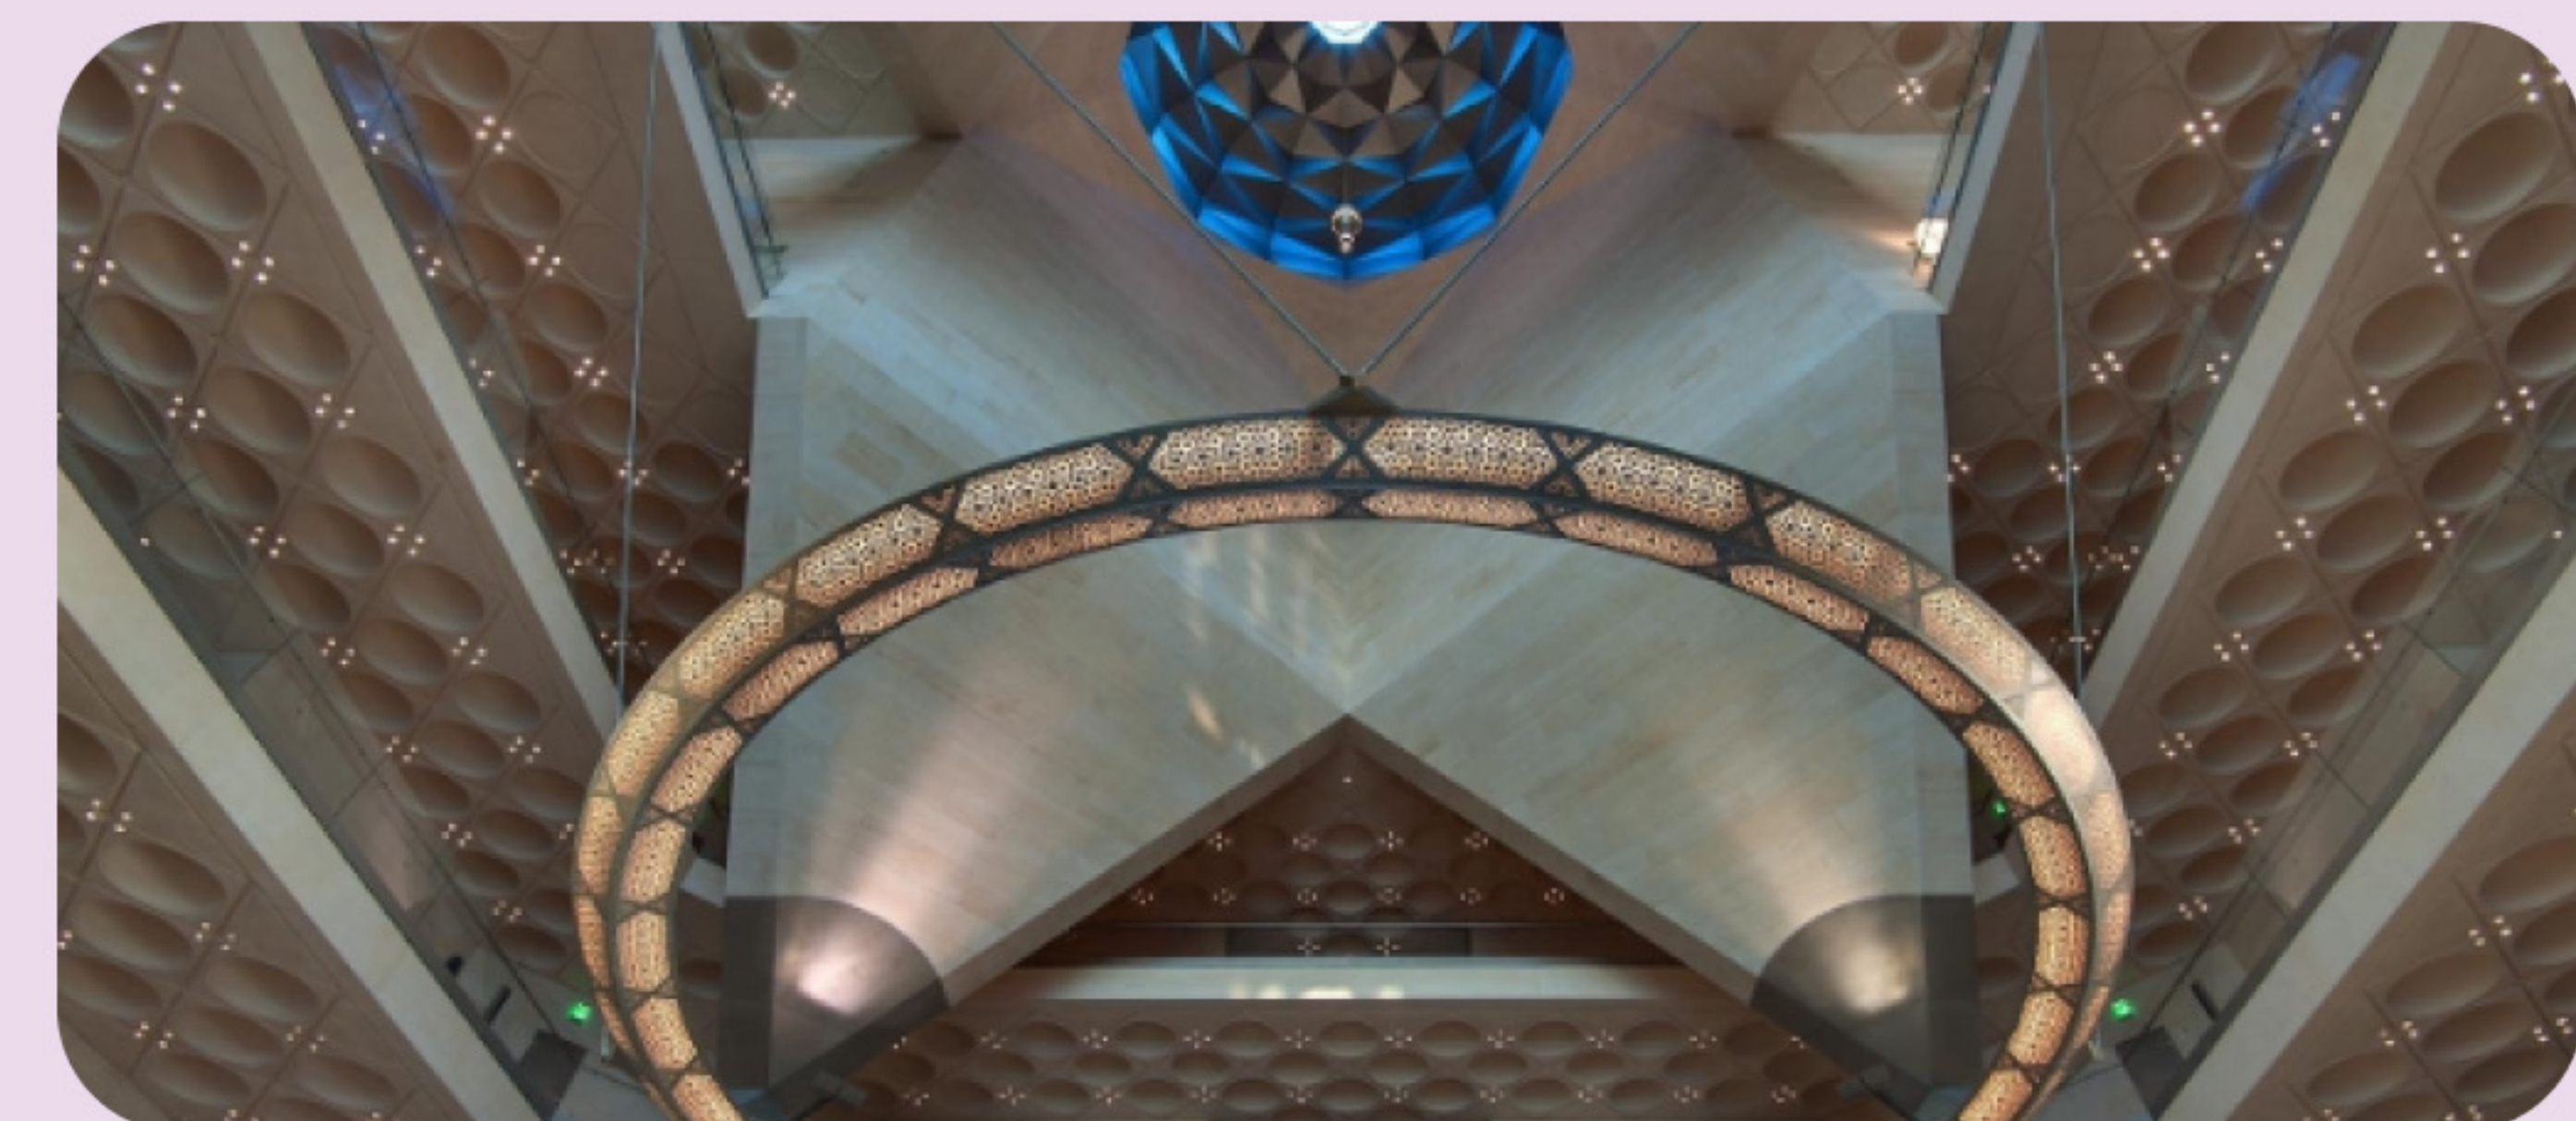

Our products is reflecting the goals of achieving the best qualit

First to Market

We make sure that all product is tested before releasing to market or site as we have build our own testing set-up for glass balustrade.

Tested

We make sure that all product is tested before releasing to market or site as we have build our own testing set-up for glass balustrade.

Robotic (Artificial Intelligence)

12 (4D) Robots

AlHamy Believe in technology and using the Robots To Enhance the quality of our products and to satisfy the clients, AlHamy factory believe on enhancing the production lines by using the Robots arms this have the following advantages:

- Better Products Quality
- Fast production
- Controlling the Welding process to avoid defects

In-house Glass Balustrade Testing

Keynote Presentation

We Chase Perfection Until We Can Catch Excellence.
